The Science of Religion in the Science of Life Dr David Murphy,2023-08-18 This is a work that challenges the modern scientific world view that nothing of any order producing significance created the ordered sum of everything Some however seem to think that when they discover the means by which something came into existence this is one less thing we need God to explain until we get to that point when we can conclude that nothing produced the ordered sum of everything The fact is that for things to be investigated intelligently they first have to be ordered intelligently Moreover a living being needs to be explained in terms of a living life producing cause a cause that can explain all that we predicate of the life defining nature of their existence We can see the origin meaning and purpose of something in that which it has been ordered to be Therefore it must be dangerously naive for scientists to suppose that living beings were ordered intelligently to reason intelligently by means that has nothing to do with intelligence and that there is no fool so foolish as he who thinks they can be wiser than their creator And as we have been created to be moral beings our creator must of logical necessity be a moral being who has the ability create this ineffable life generating effect in us and this in turn reveals something of His purpose in creating us To claim that all that exists has nothing to do with an intelligent and sufficient cause breaks all the laws of logic and takes us into the domain of farce and us as fools and all to avoid that we are answerable our maker who created us moral beings

better on the physical plane **What Happens When We Die?** Sam Parnia, M.D.,2007-01-01 A critical care doctor interviews hundreds of patients about their near death experiences taking readers on a fascinating tour through human consciousness and demystifying what may await us after death Dr Sam Parnia faces death every day Through his work as a critical care doctor in a hospital emergency room he became very interested in some of his patients accounts of the experiences that they had while clinically dead He started to collect these stories and read all the latest research on the subject and then he conducted his own experiments That work has culminated in this extraordinary book which picks up where Raymond Moody s *Life After Life* left off Written in a scientific balanced and engaging style this is powerful and compelling reading This fascinating and controversial book will change the way you look at death and dying **The Christians' God Does Not Exist! Yes, He/She Does!** Prncell F. Johnson Jr.,2018-02-22 The Christians God Does Not Exist Yes He She Does By Prncell F Johnson Jr Carl Sagan popular astronomer cosmologist astrophysicist and astrobiologist wrote *We are Star Stuff* which has taken its destiny into its own hands The scientific community basically agrees that everything is made of atoms Prncell F Johnson Jr says that they are all wrong Johnson shows that the material universe along with us mortals is one big illusion for all things are actually incorporeal spiritual the manifestation of the spiritual being we Christians have come to call God He says that the realization of and utilization of this fact will enable one to duplicate for himself the so called miracles of Christ Jesus in degrees thus proving the existence of this God and the non existence of matter Johnson s proof is based upon a law of physics that make it all but impossible to refute as the below reviews confirm

Scanning and Sizing the Universe and Everything in It Harold Toliver,2023-02-03 One of the faults in philosophy generally even the philosophy of science is ignoring the extended scale of the natural continuum and putting in its place something Anthropomorphic This book suggests a means of keeping score that puts common situations places topography and even home ground in the context of that continuum the whole of atomic matter and its history As shown here the discrepancy between normal measurements and what actually exists is similar to that between yardsticks and light years

Nietzsche Was Probably Right: A Postcritical Assessment of the Christian Paradigm and Its Deity Steven Malinak, 2014-07-13 For a variety of reasons recent literature that focuses on the rationality of belief in God and the viability of the Christian worldview fails to stimulate critical thinking in the general population of believers Nietzsche Was Probably Right succeeds where many of these other works miss the mark It educates rather than coerces it focuses on issues critically relevant to the vast majority of Christians most importantly it does not preach to the choir but instead offers a balanced objective comprehensive overview of the issues Its tone and inclusive unbiased approach welcomes nonbelievers and believers into this important conversation offering a perspective that will satisfy anyone seeking a critical understanding of the Christian faith and its deity

The Causal Power of Social Structures Dave Elder-Vass, 2010-06-17 The problem of structure and agency has been the subject of intense debate in the social sciences for over 100 years This book offers a solution Using a critical realist version of the theory of emergence Dave Elder Vass argues that instead of ascribing causal significance to an abstract notion of social structure or a monolithic concept of society we must recognise that it is specific groups of people that have social structural power Some of these groups are entities with emergent causal powers distinct from those of human individuals Yet these powers also depend on the contributions of human individuals and this book examines the mechanisms through which interactions between human individuals generate the causal powers of some types of social structures The Causal Power of Social Structures makes particularly important contributions to the theory of human agency and to our understanding of normative institutions

Energy and the Unexpected Keith James Laidler, 2002 From the steam engine to $E=mc^2$ and beyond the concept of energy offers an essential key to our understanding of the Universe In this entertaining and highly readable book Professor Laidler explains the concept of energy and its characteristics as they have been discovered over the past two centuries Having looked at energy on a small scale and then on the scale of the Universe itself he shows the link with chaos theory according to which the unexpected is inevitable
