Signal Transduction in the Cardiovascular System in Health and Disease Ashok K. Srivastava, Madhu B. Anand-Srivastava, 2008-10-17 Signal Transduction in Cardiovascular System Health and Disease highlights the major contributions of different signaling systems in modulating normal cardiovascular functions and how a perturbation in these signaling events leads to abnormal cell functions and cardiovascular disorders This title is volume 3 in the new Springer series Advances in Biochemistry in Health and Disease

Hypertensive Cardiovascular Disease: Pathophysiology and Treatment A. Amery, R. Fagard, P. Lijnen, J. Staessen, 2012-12-06 Hypertension is a major world wide health problem With high blood pressure there is a greater risk of stroke heart attack heart failure kidney disease and renal failure Far too few people realize what the risks are and what can be done to prevent these risks even in the countries where programs in hypertension research are active and the full significance of hypertension is best understood Some studies of the known hypertensive population indicate that one half or less are receiving adequate treatment and of those on therapy only half have their high blood pressure satisfactorily controlled These realizations emphasize the need to inform all segments of society throughout the world on the importance of detection and control of high blood pressure The great incidence of hypertension makes it of paramount importance that all practicing physicians have available the latest information on diagnosis and treatment of hypertensive cardiovascular disease This treatise on hypertension arrives at a time when there is an increasing recognition the world over of the importance of detecting and treating high blood pressure The book has been edited by Dr A Amery and his associates in the University of Leuven Professor Amery is one of the leaders in the field of hypertension and serves on the Council of the International Society of Hypertension

Catecholamines and Heart Disease Pallab K. Ganguly, 2024-12-20 A concise in depth analysis of the status of the sympathetic system in heart diseases This book summarizes the functional status of the sympathetic neural system in cardiological diseased states and highlights aspects of sympathetic neural activity that are important to an overall understanding of the pathophysiology process Critical reviews of methods for evaluating sympathetic activity are discussed existing data is closely scrutinized and attempts are made to delineate the factors derived from increased sympathetic activity The book provides a physiologically and clinically based approach to the investigation of the involvement of catecholamines in cardiovascular diseases which makes it a valuable addition to the reference collections of researchers clinical scientists and graduate students

Excitation-Contraction Coupling and Cardiac Contractile Force Donald Bers, 1993-08-31 The main aim of this monograph is to provide an overview of calcium regulation in cardiac muscle cells particularly with respect to excitation contraction coupling and the control of cardiac contractile force It is my hope that this book will be useful to students of the cardiovascular system and muscle at all different levels and in different disciplines such as physiology biochemistry

pharmacology and pathophysiology I also hope that it will find use for those studying developmental comparative and disease processes as well as more integrative phenomenon I kept several goals in mind in writing this monograph First it should be easily readable Second I chose to include numerous illustrations and tables to help integrate results from numerous investigators in practical formats and also present key figures from important papers Thus this monograph may serve as a resource of information for people working in the areas described herein Third the presentation is a very personal one and I have necessarily drawn extensively on my personal experience in this field over the past 15 years This I think helps maintain a certain continuity of thought from chapter to chapter Fourth I have made serious attempts to make each chapter up to date despite the breadth of topics covered I have also tried to be equitable in choosing references while not intending to be comprehensive or exhaustive Neither of these aims can be perfectly matched and I apologize to the many investigators whose papers I have not cited but should have
