**Alternative Approaches to the Assessment of Achievement** David L. McArthur, 2012-12-06 Ingrained for many years in the science of educational assessment were a large number of truths about how to make sense out of testing results artful wisdoms that appear to have held away largely by force of habit alone Practitioners and researchers only occasionally agreed about how tests should be designed and were even further apart when they came to interpreting test responses by any means other than categorically right or wrong Even the best innovations were painfully slow to be incorporated into practice The traditional approach to testing was developed to accomplish only two tasks to provide ranking of students or to select relatively small proportions of students for special treatment In these tasks it was fairly effective but it is increasingly seen as inadequate for the broader spectrum of issues that educational measurement is now called upon to address Today the range of questions being asked of educational test data is itself growing by leaps and bounds Fortunately to meet this challenge we have available a wide panoply of resource tools for assessment which deserve serious attention Many of them have exceptionally sophisticated mathematical foundations and succeed well where older and less versatile techniques fail dismally Yet no single new tool can conceivably cover the entire arena Alternative Approaches to Outcomes Assessment for Postsecondary Vocational Education Debra D. Bragg, 1992 Alternatives in Assessment of Achievements, Learning Processes and Prior Knowledge Menucha Birenbaum, F. Dochy, 2012-12-06 Achievement assessment has undergone a major shift from what some call a culture of testing to a culture of assessment Nowadays a strong emphasis is placed on the integration of assessment and instruction on assessing processes rather than just products and on evaluating individual progress relative to each student's starting point This book addresses assessment issues in light of the present state of affairs The first part discusses new alternatives in the assessment of achievement in various subject areas focusing on agenda practice impact and evaluation of the assessment The second part deals with issues related to assessment of the learning process specifically questions concerning the assessment of individual differences in prior knowledge learning skills and strategies *International Encyclopedia of Education*, 2009-04-17 The field of education has experienced extraordinary technological societal and institutional change in recent years making it one of the most fascinating yet complex fields of study in social science Unequaled in its combination of authoritative scholarship and comprehensive coverage *International Encyclopedia of Education* Third Edition succeeds two highly successful previous editions 1985 1994 in aiming to encapsulate research in this vibrant field for the twenty first century reader Under development for five years this work encompasses over 1 000 articles across 24 individual areas of coverage and is expected to become the dominant resource in the field Education is a multidisciplinary and international field drawing on a wide range of social sciences and humanities disciplines and this new edition comprehensively matches this diversity The diverse background and multidisciplinary subject coverage of the Editorial Board ensure a balanced and objective academic framework with 1 500 contributors representing
