Conceiving Of Europe:

The Idea of Europe, 2021-03-22 Recent developments within and beyond Europe have variously challenged the very idea of Europe calling it into question and demanding reconsideration of its underlying assumptions. The essays collected here reassess the contemporary position of a perceived European identity in the world overshadowed as it is by the long antecedents and current crisis of triumphalist Eurocentrism While Eurocentrism itself is still a potent mind set it is now increasingly challenged by intra European crises and by the emergence of autonomously non European perceptions of Europe The perspectives assembled here come from the fields of political cultural and literary history contemporary history social and political science and philosophy Contributors are Damir Arsenijevi Luiza Bialasiewicz Vladimir Biti Lucia Boldrini Gerard Delanty C sar Dom nguez Nikol Dziub Rodolphe Gasch Aage Hansen L ve Shigemi Inaga Joep Leerssen and Vivian **The Idea of Europe** Shane Weller, 2021-06-03 This book offers a new critical history of the idea of Europe from Liska classical antiquity to the present day **The Limits of Europe** Daniel C. Thomas, 2021 This book is a multi method study of the European Union's decision making on enlargement over seven decades showing how membership norms shape decision making on which states are considered eligible to join the EU and which are not Europe, or The Infinite Task Rodolphe Gasché, 2008-12-22 What exactly does Europe mean for philosophy today Putting aside both Eurocentrism and anti Eurocentrism Gasch returns to the old name Europe to examine it as a concept or idea in the work of four philosophers from the phenomenological tradition Husserl Heidegger Pato ka and Derrida Beginning with Husserl the idea of Europe became central to such issues as rationality universality openness to the other and responsibility Europe or The Infinite Task tracks the changes these issues have undergone in phenomenology in order to investigate Europe's continuing potential for critical and enlightened resistance in a world that is progressively becoming dominated by the mono perspectivism of global market economics Rather than giving up on the idea of Europe as an anachronism Gasch aims to show that it still has philosophical Locating Europe Rodolphe Gasché, 2021-06-01 Is the idea of Europe outdated The concept of European unity the legs animating spirit of the European Union seems increasingly fragile in the face of far right populist movements In Locating Europe Rodolphe Gasch attempts to answer the question of how to think about Europe Is it a figure a concept or an idea Is there anything still compelling and urgent about the idea of Europe By looking at phenomenologist and postphenomenological thinkers in the second half of the 20th century Gasch reveals that Europe is more than just one geographical and cultural entity The idea of Europe is based on common foundations a distinctive conception of reason of self criticism of responsibility freedom equality human rights and democracy and it is these foundations that are under threat In Locating Europe A Figure a Concept an Idea Gasch engages the philosophy of Hans Georg Gadamer Karl Jaspers Karl L with and others focuses on the most significant philosophical representations of Europe and explores the potential and especially the limits of the notion of Europe Socialist Parties and the Question of Europe in the 1950's Richard T.

Griffiths, 2023-08-21 During the 1950 s the West European Socialist parties found themselves divided on the question of European integration This cleavage not only separated different national parties from each other but caused deep and painful rifts within national parties themselves The related controversies form the core of this volume consisting of a synthetic analysis thirteen national case studies and testimonies of three eyewitnesses Marinus van der Goes van Naters Christian Pineau Mario Zagari closely involved with the events described The collection deals with an important aspect of the pre history of the European Economic Community and provides a useful tool for its comparative study Europe Alexander Stephan, 2006 Using Germany as a case study of the impact of American culture throughout a period characterized by a totalitarian system two destructive wars ethnic cleansing and economic disaster this book explores the political and cultural parameters of Americanization and anti Americanism **Explaining European Identity Formation** Stephanie Bergbauer, 2017-10-24 What makes people identify with Europe To answer this question this book analyzes the development and determinants of a common European identity among EU citizens from the Maastricht Treaty in 1992 to the recent financial and economic crisis The author examines citizens identification with Europe for all EU member states and systematically explores the theoretical and empirical implications of two turning points in the recent history of EU integration namely the EU s enlargement to Central and Eastern Europe in 2004 2007 and the financial and economic crisis that started in 2008 The book integrates theoretical approaches to European identity in sociology social psychology and EU public opinion research in a comprehensive model for explaining individual identification with Europe The empirical analysis employs a multilevel framework to systematically assess the influence of individual characteristics and the political economic and social context on citizens feelings of identity The long analysis period spanning from 1992 to the present allows inferences to be drawn about the long term developments in the sources of European identification as well as the immediate impact of EU enlargement and the crisis on the determinants of European identification **Multinational Federations** Michael Burgess, John Pinder, 2007-04-11 This is the first comparative volume available on multinational federations bringing together an international range of experts on federalism Multinational federations are federal states intended to provide a framework that can accommodate manage and resolve some of the most intractable political conflicts of our time that emerge from identity politics those that stem from competing national visions whether within or between established states Featuring key experts in the field such as Michael Burgess Alain Gagnon and Ronald Watts this unique book draws on a wide geographical range of country studies including Belgium Canada India Malaysia Spain Russia Cyprus India Switzerland and the EU in order to illustrate the pivotal relationship between federalism and nationalism In so doing it addresses the practical relevance of federalism to the new political recognition of difference and diversity in the specific form of national minoritarianism Multinational Federations will be of strong interest to students and researchers of federalism democracy and nationalism A Companion to the Anthropology of Europe Ullrich Kockel, Máiréad Nic Craith, Jonas

studies the growing transnational activities of state institutions societal organizations and people in the museum field such as attempts to Europeanize collection policy and collections as well as different strategies for making narratives more transnational like telling stories of European integration as shared history and discussing both inward and outward migration as a common experience and challenge The book thus provides fascinating insights into a fast changing museum landscape in Europe with wider implications for cultural policy and museums in other world regions Discourse, Identity and the Question of Turkish Accession to the EU Catherine MacMillan, 2016-05-23 Discourse Identity and the Question of Turkish Accession to the EU Through the Looking Glass provides an invaluable analysis of the issues of Turkish accession to the EU The focus on elite discourse provides a new and engaging approach to this contentious topic and offers a unique understanding of the competing arguments within the EU regarding the question of Turkey's accession and the differing visions for the European Union that underlie them Utilising the Habermasian Theory of Communicative Action Catherine MacMillan focuses on how political elites from the member states and EU institutions engage with the issue analyses the different attitudes to the Turkish candidacy to the EU and explores the wider implications and competing visions of the EU the differences highlight By closely examining the different ways that EU elites view and react to this issue vital lessons about the potential wider enlargement of the union to central and eastern Europe can be drawn **Europe** Sharon Millar, John Wilson, 2007 In this volume we approach the question of what it is to be European by considering the way in which citizens talk about their everyday lives as they are perceived against the background of Europe and European issues Hence the volume will offer insights into the rarely glimpsed micro political world of ordinary talk and explore the way in which such talk in social interaction and other spheres might help us understand what Europe means to a range of its citizens Using a range of broadly discursive approaches we will touch on inter alia issues of identity youth borders ethnicity local politics and minority languages In the end we suggest it is a common sense view of pragmatic utility that centres what it is to be European and this is something which is continually fluid and shifting within ever changing social Critical Ancient World Studies Mathura Umachandran, Marchella Ward, 2023-12-27 historical and political circumstances This volume explores and elucidates critical ancient world studies CAWS a new model for the study of the ancient world operating critically setting itself against a long history of a discipline formulated to naturalise a hierarchical white supremacist origin story for an imagined modern West CAWS is a methodology for the study of antiquity that shifts away from the assumptions and approaches of the discipline known as classical studies and or classics Although it seeks to reckon with the discipline's colonial history it is not simply the application of decolonial theory or the search to uncover subaltern narratives in a subject that has special relevance to the privileged and powerful Rather it dismantles the structures of knowledge that have led to this privileging and questions the categories ideas themes narratives and epistemological structures that have been deemed objective and essential within the inherited discipline of classics The contributions in this

book by an international group of researchers offer a variety of situated embodied perspectives on the guestion of how to imagine a more critical discipline rather than a unified single view The volume is divided into four parts Critical Epistemologies Critical Philologies Critical Time and Critical Space and Critical Approaches and uses these as spaces to propose disciplinary transformation Critical Ancient World Studies The Case for Forgetting Classics is a must read for scholars and practitioners teaching in the field of classical studies and the breadth of examples also makes it an invaluable resource for anyone working on the ancient world or on confronting Eurocentrism within other disciplines The Open Access version of this book available at http www taylorfrancis com has been made available under a Creative Commons Attribution The Parliamentary Dimension of the Conference on the Future of Europe Karolina CC BY 4 0 license Borońska-Hryniewiecka, Lucy Kinski, 2024-09-16 This book offers a comprehensive and timely analysis of the parliamentary dimension of the Conference on the Future of Europe CoFoE an unprecedented experiment in which parliamentary representation met transnational citizen participation in the European Union EU Across twelve chapters the book investigates the CoFoE as an opportunity structure for both the European Parliament EP as the host of the process and national as well as regional parliaments as the guests in this process to fulfil and revitalise their key functions in EU multi level democracy The book also provides a valuable source of insights for representatives in national parliaments and the newly elected European Parliament 2024 2029 to hopefully prompt them to rethink their relationship with citizens in the ever evolving transnational democratic space of the EU Bringing together both academics and practitioners this book will be of key interest to anyone interested in parliamentary representation citizen participation and democratic legitimacy in the EU and beyond The Open Access version of this book available at www taylorfrancis com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license The Enlargement of Europe Stuart Croft, 1999 What will happen to the EU in the wake of enlargement What are the institutional and policy making changes in light of enlargement This book newly available in paperback deals with the theoretical conceptual and historical processes that led to European Union enlargement It discusses the effects of enlargement on selected European Union policies agriculture single market foreign security and defence policy immigration and looks at the effect of the institutional reforms that were made at Amsterdam and Nice as well as considering the significance of the debates on the Constitution It contains chapters by leading European scholars from both sides of the Atlantic The chapters report current research and employ a variety of methodological and theoretical perspectives This book is unique in looking at the issues that the EU faces in the aftermath of Eastern enlargement **Religiosity and Recognition** Thomas Sealy, 2021-06-28 This book argues that multiculturalism remains a relevant and vital framework through which to understand and construct inclusive forms of citizenship Responding to contemporary ethnic and religious diversity in European states and the position of religious minorities debates in multiculturalism have revitalized discussion of the public role of religion yet multiculturalism has been

increasingly challenged in both political as well as academic circles With a focus on Britain and through a study of the narratives of British converts to Islam this book engages in debates centered around multiculturalism particularly on the issues of identity recognition and difference Yet it also identifies and interrogates multiculturalism s shortcomings in relation to specifically religious identities and belonging In a unique and innovative analysis this book combines a discussion of multiculturalism in Britain with insights from political theology It juxtaposes multiculturalism s concepts of ethno religious identity and recognition with the notions of religiosity and hospitality to offer a new perspective on religious identity and the implications of this for thinking with and about multiculturalism and multicultural social and political relations A Short History of Europe, 1600-1815 Lisa Rosner, John Theibault, 2000 A concise survey of the people ideas and conflicts in European history from the Thirty Years War to the Napoleonic Era drawing on new work in gender studies environmental history anthropology and cultural history
