Määttä, Marika K. Hall, 2022-05-09 Discourse and ideology are quintessential albeit contested concepts in many functionally oriented branches of linguistics such as linguistic anthropology critical discourse studies sociolinguistics and sociology of language With many ways of understanding and utilizing the concepts the line between discourse and ideology can become blurry This volume explores divergent ways in which the concept of ideology may be applied in different branches of sociolinguistics and the sociology of language critical discourse studies and applied linguistics The goal is to provide an overview of the ways in which these two concepts can be used separately or together emphasizing one or the other depending on the ways in which the concepts and their relationship are defined The volume is targeted at scholars working in various fields of linguistics in which discourse and ideology are used as theoretical and analytical tools While the target audience includes both senior and junior scholars a particular goal is to reach junior scholars who often struggle with the distinction between discourse and ideology and their theoretical and methodological potential The volume is suitable for classroom use at the graduate level Schooling, Ideology and the Curriculum Len Barton, Roland Meighan, Stephen Walker, 2011 Although the different contributions to this book range over a wide spectrum of substantive issues they share a common interest This is a concern to explore the ways in which notions of the relations between theory and practice between belief and action can be used to develop three kinds of sensitivity in the sociology of education A sensitivity towards how school systems are created maintained and made to function towards developing a more refined critical and constructive

awareness of the reliability and validity of descriptions analyses and explanations offered in this field of study and a sensitivity towards the ways in which changes take place within the education system and how the insights and realisations generated in the discipline might be used to control such occurrences **Power, Ideology, and Control** John C.

Oliga,2007-08-20 One of the great challenges we face today is coming to grips with forces of power in both theoretical and methodological terms in a way that prepares us for action action that is not totally subject to existing forces The literature has some excellent theoretical accounts of power but these say little about what we should do Most often they are abstract and out of reach of all but a select few In this book however we have a clear cut account of power ideology and control that paves the way for practic minded people to make a genuine attempt at tackling issues of power on both organizational and societal levels John C Oliga suggests a division between what he calls objectivist subjectivist and relational perspectives With objectivism he refers to theories that focus on power as capacities located in social structures These tend to be either synergistic e g Parsonian collective or conflictual e g Marxian conflictual view theoretical orientations With subjectivism he discusses theories that focus on power possessed by agents With relational approaches he places theories that conceive power as a property of interaction among social forces *Media Studies: Institutions, theories, and issues* Pieter Jacobus

Fourie,2001 This outcomes based textbook provides comprehensive information on the makeup of media institutions theories in media studies and critical issues that face the media today With this guide media students learn the history of the media and learn how to keep up with the latest trends and developments in broadcasting printed press and film Outlined is how to develop an internal media policy with company mission statements news and programming policies The relationship of the media to the economy politics and society and how the media represents race gender violence and terrorism are also discussed **Schooling, Ideology and the Curriculum (RLE Edu L)** Len Barton,Roland Meighan,Stephen

Walker,2012-04-27 Although the different contributions to this book range over a wide spectrum of substantive issues they share a common interest This is a concern to explore the ways in which notions of the relations between theory and practice between belief and action can be used to develop three kinds of sensitivity in the sociology of education A sensitivity towards how school systems are created maintained and made to function towards developing a more refined critical and constructive awareness of the reliability and validity of descriptions analyses and explanations offered in this field of study and a sensitivity towards the ways in which changes take place within the education system and how the insights and realisations generated in the discipline might be used to control such occurrences *History and Truth* Adam Schaff,2014-05-09 History and Truth deals with the epistemological premises and the objectivity of historical truth as well as the social conditioning of historical cognition Both the problem of the model of cognitive relationship and the problem of truth are discussed in the context of true cognition Comprised of eight chapters this book begins with an overview of historians conflicting interpretations regarding the causes of the French Revolution to highlight the tendency of historians to differ in their visions

of the historical process resulting in different and sometimes even contradictory representations of one and the same fact. The discussion then turns to three models of the process of cognition: the cognitive subject, the object of cognition, and knowledge as the product of the process of cognition, as well as the concept of truth as a philosophical problem. Subsequent chapters focus on two concepts of history: namely positivism and presentism. The class character of historical cognition, historicism and relativism, and the selection of historical facts. The book also considers why history is continuously written anew, before concluding with an assessment of the objectivity of historical truth. This monograph will be of interest to students, practitioners, and researchers in the fields of history, philosophy, and the social sciences.

Ideology and Utopia Karl Mannheim, 2013-07-04

Ideology and Utopia argues that ideologies are mental fictions whose function is to veil the true nature of a given society. They originate unconsciously in the minds of those who seek to stabilise a social order. Utopias are wish dreams that inspire the collective action of opposition groups which aim at the entire transformation of society. Mannheim shows these two opposing elements to dominate not only our social thought but even unexpectedly to penetrate into the most scientific theories in philosophy, history, and the social sciences. This new edition contains a new preface by Bryan S Turner which describes Mannheim's work and critically assesses its relevance to modern sociology. The book is published with a comprehensive bibliography of Mannheim's major works.
