significant policy challenges and debates By advancing FPA along these trajectories the handbook directly addresses enduring criticisms of FPA including that it is isolated within IR it is state centric its policy relevance is not always clear and its theoretical foundations and methodological techniques are stale The Oxford Handbook of Foreign Policy Analysis provides an inclusive and forward looking assessment of this subfield Edited and written by a team of world class scholars and with a preface by Margaret Hermann and Stephen Walker the handbook sets the agenda for future research in FPA and in IR The Oxford Handbooks of International Relations is a twelve volume set of reference books offering authoritative and innovative engagements with the principal sub fields of International Relations The series as a whole is under the General Editorship of Christian Reus Smit of the University of Queensland and Duncan Snidal of the University of Oxford with each volume edited by specialists in the field The series both surveys the broad terrain of International Relations scholarship and reshapes it pushing each sub field in challenging new directions Following the example of Reus Smit and Snidal's original Oxford Handbook of International Relations each volume is organized around a strong central thematic by scholars drawn from different perspectives reading its sub field in an entirely new way and pushing scholarship in challenging new directions
