Concept Research And Design In Food Product Development

**Geoffrey W. Smithers, Mary Ann
Augustin**

Concept Research And Design In Food Product Development:

Concept Research in Food Product Design and Development Howard R. Moskowitz, Sebastiano Porretta, Matthias Silcher, 2008-02-28 Concepts are critical for the development and marketing of products and services They constitute the blueprint for these products and services albeit at the level of consumers rather than at the technical level A good product concept can help make the product a success by guiding developers and advertising in the right direction Yet there is a dearth of both practical and scientific information about how to create and evaluate concepts There has been little or no focus on establishing knowledge bases for concepts Concept development is too often relegated to the so called fuzzy front end Concept Research in Food Product Design and Development remedies this inattention to product concepts by providing a unique treatment of concepts for the business professional as well as for research scientists The book begins with simple principles of concepts moves forward to methods for testing concepts and then on to more substantive areas such as establishing validity testing internationally and with children creating databases and selling in new methods for concept testing The book combines a how to business book with a detailed treatment of the different facets of concept research As such the book represents a unique contribution to business applications in food and consumer research methods The book is positioned specifically for foods to maintain a focus on a coherent set of topics Concept Research in Food Product Design and Development appeals to a wide variety of audiences R D marketing sensory analysts and universities alike Corporate R D professionals will learn how to create strong concepts Marketers will recognize how concepts are at the heart of their business Sensory analysts will find the book a natural extension of their interest in product features University students will understand how concept research is a critical part of the consumer connection Concept Research in Food Product Design and Development is the definitive innovative text in describing how to create analyze and capitalize upon new product concepts

Food Product Development: From Concept to the Marketplace I. Sam Saguy, Ernst Graf, 1990-10-31 Food Product Development presents in depth how to guidance to successful food product development Drawing on the practical experience of 19 industry experts the book presents a broad overview of practical aspects of industrial food R D today In addition it details how to control the many facets of food product development and successfully integrate the work of professionals from many diverse areas

Sensory and Consumer Research in Food Product Design and Development Howard R. Moskowitz, Jacqueline H. Beckley, Anna V. A. Resurreccion, 2012-04-03 During the past thirty years companies have recognized the consumer as the key driver for business and product success This recognition has in turn generated its own drivers sensory analysis and marketing research leading first to a culture promoting the expert and then evolving into the systematic acquisition of consumer relevant information to build businesses Sensory and Consumer Research in Food Product Design and Development is the first book to present from the business viewpoint the critical issues faced by business leaders from both the research development and business development perspective This popular volume now in an updated

and expanded second edition presents a unique perspective afforded by the author team of Moskowitz Beckley and Resurreccion three leading practitioners in the field who each possess both academic and business acumen Newcomers to the field will be introduced to systematic experimentation at the very early stages to newly emerging methods for data acquisition knowledge development and to points of view employed by successful food and beverage companies The advanced reader will find new ideas backed up by illustrative case histories to provide another perspective on commonly encountered problems and their practical solutions This book is aimed at professionals in all sectors of the food and beverage industry Sensory and Consumer Research in Food Product Design and Development is especially important for those business and research professionals involved in the early stages of product development where business opportunity is often the greatest

An Integrated Approach to New Food Product Development Howard R. Moskowitz, I. Sam Saguy, Tim Straus, 2009-06-24 Today's rapidly evolving consumer frequently changes eating habits tastes and diet Therefore to secure financial solvency food and beverage companies must continually define develop and market new products This comprehensive volume integrates all aspects of the physical food and beverage product development cycle and provides perspectives on how to optimize each component of the new product equation in the food industry It discusses both the technical and the marketing sides emphasizing the necessity for a combined focus of both the product process and the people market The inclusion of case studies makes the book suitable for a classroom text or a professional reference

New Food Product Development Gordon W. Fuller, 1994-02-23 This book provides an objective overview of the hectic often chaotic and frequently unpredictable new food product development process The stages of development are described from the vantage points of the technologist marketer and senior management by an author who has worn all three hats The book covers the various stages of product development including generating and sifting ideas against the company's objectives the consumers perceived needs and expectations the competitiveness of the marketplace the technologist's ability to create and manufacture a safe product within budget and test marketing Problems facing both small and large companies are confronted and solutions are proposed Test marketing and the evaluation of such tests are discussed with some new suggestions for interpreting the criteria used A chapter on organization presents ideas for fostering creativity and avoiding communication and personality conflicts Trends in new ingredients and technologies to assist in the design of new products are given full coverage The last chapter is devoted to the future with stimulating discussion of new challenges to current trends in the industry

Nanotechnology Research Methods for Food and Bioproducts Graciela Wild Padua, PhD, Qin Wang, PhD, 2012-06-13 Food nanotechnology is an expanding field This expansion is based on the advent of new technologies for nanostructure characterization visualization and construction Nanotechnology Research Methods for Food and Bioproducts introduces the reader to a selection of the most widely used techniques in food and bioproducts nanotechnology This book focuses on state of the art equipment and contains a description of the essential tool kit of a nanotechnologist Targeted at

researchers and product development teams this book serves as a quick reference and a guide in the selection of nanotechnology experimental research tools New Food Product Development Holger York Toschka,2025-03-31 With a new subtitle to reflect its global perspective and a new author this book continues the mission of earlier editions to describe the stages of food development in detail beginning with sources of ideas and moving through development final screening and introduction into the marketplace Every chapter contains one or more case studies New chapters address the tools available for the food industry and manufacturers to select sharpen fine tune and support new food product launches More attention is given to the influence of global concerns about the deteriorating environment and here particularly the role and responsibility of the food industry and those working on new food products Key Features This edition adds the perspective from single product or product range development to the overall portfolio management This edition explains strategies for successful management of unpredictable uncertain and complex conditions in new food product development NFPD Chapters contain one or more case studies to add pedagogy for students and practical applications for professionals More focus is given to the role and responsibilities of research and development R D in innovation management Two chapters are used to predict the future direction for NFPD This book can serve as the core textbook for the capstone new food product development course typically found in the food science curriculum and is of equal value to early career food scientists finding themselves in a multidisciplinary team working on the creation of a new food product Consumer-Led Food Product Development Hal MacFie,2007-06-30 Consumer acceptance is the key to successful food products It is vital therefore that product development strategies are consumer led for food products to be well received Consumer led food product development presents an up to date review of the latest scientific research and methods in this important area Part one gives the reader a general introduction to factors affecting consumer food choice Chapters explore issues such as sensory perception culture ethics attitudes towards innovation and psychobiological mechanisms Part two analyses methods to understand consumers food related attitudes and how these methods can be effectively used covering techniques such as means end chains and the food related lifestyle approach The final part of the book addresses a wide variety of methods used for consumer led product development Opportunity identification concept development difference testing and preference trials are discussed as well as the use of techniques such as just about right scales and partial least squares methods Written by an array of international experts Consumer led food product development is an essential reference for product developers in the food industry Introduces the factors affecting consumer food choice Explores issues such as sensory perception culture and ethics Analyses methods to understand food related attitudes Handbook of Paper and Paperboard Packaging Technology Mark J. Kirwan,2012-11-07 The definitive industry reference on the paper and paperboard packaging sector Now in a fully revised and updated second edition this book discusses all the main types of packaging based on paper and paperboard It considers the raw materials the manufacture of paper and paperboard and the basic properties and features on

which packaging made from these materials depends for its appearance and performance The manufacture of twelve types of paper and paperboard based packaging is described together with their end use applications and the packaging machinery involved The importance of pack design is stressed as well as how these materials offer packaging designers opportunities for imaginative and innovative design solutions Environmental factors including resource sustainability societal and waste management issues are addressed in a dedicated chapter The book is directed at readers based in companies which manufacture packaging grades of paper and paperboard companies involved in the design printing and production of packaging and companies which manufacture inks coatings adhesives and packaging machinery It will be essential reading for students of packaging technology and technologists working in food manufacturing who are users of paper and paperboard packaging products Praise for the First Edition This book is a valuable addition to the library of any forward looking company by providing in depth coverage of all aspects of packaging which involve the most ecologically acceptable material namely paper and paperboard International Journal of Dairy Technology a welcome contribution to a field where coverage was previously limited to subject specific books or to single chapters in textbooks on broader aspects of packaging technology Packaging Technology and Science

Statistical Methods for Food Science John A. Bower, 2013-09-23 The recording and analysis of food data are becoming increasingly sophisticated Consequently the food scientist in industry or at study faces the task of using and understanding statistical methods Statistics is often viewed as a difficult subject and is often avoided because of its complexity and a lack of specific application to the requirements of food science This situation is changing there is now much material on multivariate applications for the more advanced reader but a case exists for a univariate approach aimed at the non statistician This second edition of Statistical Methods for Food Science provides a source text on accessible statistical procedures for the food scientist and is aimed at professionals and students in food laboratories where analytical instrumental and sensory data are gathered and require some form of summary and analysis before interpretation It is suitable for the food analyst the sensory scientist and the product developer and others who work in food related disciplines involving consumer survey investigations will also find many sections of use There is an emphasis on a hands on approach and worked examples using computer software packages and the minimum of mathematical formulae are included The book is based on the experience and practice of a scientist engaged for many years in research and teaching of analytical and sensory food science at undergraduate and post graduate level This revised and updated second edition is accompanied by a new companion website giving the reader access to the datasets and Excel spreadsheets featured in the book Check it out now by visiting www.wiley.com/go/bowerstatistical or by scanning the QR code below

Case Studies in Food Product Development M Earle, R Earle, 2007-12-18 New product development is vital for the future of the food industry Many books have been written on NPD theory over the last 40 years but much can still be learnt by studying actual experiences of NPD Case studies in food product development describes specific NPD projects in a variety

of industries internationally and also records overall comments written by the very people who have completed the projects Part one outlines new product development in the food industry and part two views product development strategy and management in different companies and organisations Parts three four and five are twelve case studies on respectively the product development process technological development consumer and market research Part six considers product development in practice and the final chapter demonstrates how product developers are being educated The case studies are written by experienced product developers talking openly about experiences with their own products It is hoped that those faced with similar challenges will gain from these real life experiences Mary and Dick are also co authors with Allan Anderson of Food product development which has achieved international success Case studies in food product development is a complement and a practical companion to this book Describes new product development in a variety of international industries Outlines new product development in the food industry and views product management and strategy in different organisations Includes case studies focusing on the product development process technological development and consumer and market research

Food and Beverage Packaging Technology Richard Coles, Mark J. Kirwan, 2011-04-25 Now in a fully revised and updated second edition this volume provides a contemporary overview of food processing packaging technologies It acquaints the reader with food preservation processes shelf life and logistical considerations as well as packaging materials machines and processes necessary for a wide range of packaging presentations The new edition addresses environmental and sustainability concerns and also examines applications of emerging technologies such as RFID and nanotechnology It is directed at packaging technologists those involved in the design and development of packaging users of packaging in food companies and those who specify or purchase packaging Key Features An up to date and comprehensive handbook on the most important sector of packaging technology Links methods of food preservation to the packaging requirements of the common types of food and the available food packages Covers all the key packaging materials glass plastics and paperboard Fully revised second edition now covers sustainability nanotechnology and RFID

Food Science A. S. Bawa, 2013-06-15 The book aims at imparting basics of the subject besides the latest trends in the evolution of technologies and important industrial practices Besides the technological aspects adequate emphasis has also been laid on the quality aspects and adequate knowledge input required for a student or professional in Food Science and Technology The book contains 16 chapters addressing various important aspects such as unit operations thermal processing hurdle technology preservation cold preservation dehydration freezing and advanced thermal techniques such as infrared and microwaves besides non thermal aspects such as high pressure and pulsed electric field processing as well as irradiation State of art subject areas such as functional foods could be an added flavour as the global food market has ample potential in the area of functional foods Food packaging and food laws are important in commercializing processed foods as well as fresh produce and the areas require due emphasis to make the book more comprehensive

The BRC Global Standard for Food Safety

Ron Kill,2012-06-12 This book will offer companies in the food industry a comprehensive guide to preparing for a British Retail Consortium Standard evaluation Issue 6 It will enable them to ensure that the correct systems are in place to achieve the Standard and also that they present themselves in the best possible light during the audit process It will also recommend the correct steps to take following evaluation and how to correct non conformities The book will be of interest not only to suppliers who are seeking certification for the first time but also to those already in the scheme and are seeking to improve their grades *Handbook of Seafood Quality, Safety and Health Applications* Cesaretti Alasalvar,Kazuo

Miyashita,Fereidoon Shahidi,Udaya Wanasundara,2011-06-15 The global market for seafood products continues to increase year by year Food safety considerations are as crucial as ever in this sector and higher standards of quality are demanded even as products are shipped greater distances around the world The current global focus on the connection between diet and health drives growth in the industry and offers commercial opportunities on a number of fronts There is great interest in the beneficial effects of marine functional compounds such as omega 3 polyunsaturated fatty acids Seafoods are well known as low calorie foods and research continues into the nutritional effects on for example obesity and heart disease In addition by products of marine food processing can be used in nutraceutical applications This book is a resource for those interested in the latest advances in the science and technology of seafood quality and safety as well as new developments in the nutritional effects and applications of marine foods It includes chapters on the practical evaluation of seafood quality novel approaches in preservation techniques flavour chemistry and analysis textural quality and measurement packaging the control of food borne pathogens and seafood toxins New research on the health related aspects of marine food intake are covered as well as the use of seafoods as sources of bioactives and nutraceuticals The book is directed at scientists and technologists in academia government laboratories and the seafood industries including quality managers processors and sensory scientists **Genetically Modified and non-Genetically Modified Food Supply Chains** Yves

Bertheau,2012-09-10 In the European Union nations and other countries including Japan Australia and Malaysia it is a legal requirement that food products containing genetically modified organism GMO materials are labelled as such in order that customers may make informed purchasing decisions For manufacturers and consumers to be confident about these assertions systems must be in place along the entire food chain which support the co existence of GM and non GM materials whilst maintaining a strict segregation between the two This book is an output of a European Union funded project entitled Co Extra GM and non GM food and feed supply chains their Co Existence and Traceability The objective of this four year project is to provide practical tools and methods for implementing co existence that will enable the co existence of genetically modified GM and non GM crops enable the segregation and tracing of genetically modified organism GMO materials and derived products along the food and feed chains anticipate the future expansion of the use of GMOs The project is designed to foster a robustly science based debate amongst all of the stakeholders involved in the food and feed

chains and the tools will be assessed not only from a technical point of view but with regard to the economic and legal aspects. It also surveys the GMO related legal regimes and practices that exist in and beyond the EU. This book examines the practical tools and methods available to implement the co-existence and traceability of GM and non GM food materials along the entire food and feed chains as demanded by consumers and by legislation in force in the EU and elsewhere. GM and Non GM Supply Foods is a source of valuable information for food manufacturers, food research institutions and regulatory bodies internationally.

Handbook of Meat, Poultry and Seafood Quality Leo M. L. Nollet, Terri Boylston, Feng Chen, Patti Coggins, Grethe Hydlig, L. H. McKee, Chris Kerth, 2012-05-29. A great need exists for valuable information on factors affecting the quality of animal related products. The second edition of Handbook of Meat Poultry and Seafood Quality focuses exclusively on quality aspects of products of animal origin in depth discussions and recent developments in beef, pork, poultry and seafood quality. Updated sensory evaluation of different meat products, revised microbiological aspects of different meat products. Also included are new chapters on packaging, new chapters and discussion of fresh and frozen products, new aspects of shelf life and recent developments in research of meat tainting. This second edition is a single source for up to date and key information on all aspects of quality parameters of muscle foods. It is a must have. The reader will have at hand in one focused volume covering key information on muscle foods quality.

Advances in Dairy Ingredients Geoffrey W. Smithers, Mary Ann Augustin, 2012-11-30. Advances in Dairy Ingredients provides an international perspective on recent developments in the area of dairy ingredients and dairy technology. Market and manufacturing trends and opportunities are aligned with the latest science tools that provide the foundation to successfully and rapidly capture these opportunities. Functional foods are emerging as key drivers of the global food economy and dairy ingredients and technology are at the forefront in these developments. Advances in Dairy Ingredients brings together food scientists, industry specialists and marketers from around the world to provide unique insight into the scientific basis for the success of dairy ingredients in modern food products and a glimpse into the future of new dairy ingredients and foods on the horizon.

Organic Production and Food Quality Robert Blair, 2012-01-03. The internet is rife with biased and unsubstantiated claims from the organic industry and the treatment of issues such as food safety and quality by the media. If it bleeds it leads, tends to have a negative impact on consumer perceptions about conventional food. Until recently more and more consumers in many countries were opting to buy organic food over conventional food, resulting in a radical shift in food retailing. This was due to concerns over chemical residues, food poisoning, resulting in recalls, food scares such as mad cow disease, issues like gene modified GM foods, antibiotics, hormones, cloning and concerns over the way plants and animals are being grown commercially as food sources. As a result there has been an expansion of the organic industry and the supply of organic foods at farmers markets, supermarkets and specialty stores. Organic Production and Food Quality: A Down to Earth Analysis is the first comprehensive book on how organic production methods influence the safety and quality of foods based on an unbiased assessment of the

latest scientific findings The title is a must have for everyone working within the food industry Comprehensive explanation of organic production methods and effects on the safety and quality of foods Authoritative unbiased and up to date examination of relevant global scientific research Answers the questions of whether organic food is more nutritious and or more healthy

Food Product Development M Earle,R Earle,A Anderson,2001-09-18 Product development is the lifeblood of the food industry from refining an established product range to developing completely new products It is however a process fraught with risk that often ends in failure So what then are the keys to making the process a success Drawing on a wealth of experience gathered over 40 years Food product development provides the answers The first half of the book examines the four core elements of product development the business strategy directing product development the various steps in the product development process the knowledge required to fuel the process the need for keeping the product development focused on the consumers needs and aspirations The second part of the book looks at managing the product development process in practice with four case studies of successful product launches It also discusses how to evaluate and improve the process to make future product innovation more successful Filled with examples and practical suggestions and written by a distinguished team with unrivalled academic and industry expertise Food product development is a essential guide for R D and product development staff and all managers concerned with this key issue throughout the food industry Provides comprehensive coverage of the complete product development process Includes a range of international case studies from various sectors of the food industry Written by a distinguished international panel of experts
