The Concept of a Person and Other Essays Alfred J. Ayer, 1968 **The Concept of a Person and Other Essays** Alfred Jules Ayer, 1968 *The Concept of a Person and Other Essays* A. J. Ayer, 2013 **The Category of the Person** Michael Carrithers, Steven Collins, Steven Lukes, 1985-12-27

The concept that people have of themselves as a person is one of the most intimate notions that they hold. Yet the way in which the category of the person is conceived varies over time and space. In this volume anthropologists, philosophers, and historians examine the notion of the person in different cultures past and present. Taking as their starting point a lecture on the person as a category of the human mind given by Marcel Mauss in 1938, the contributors critically assess Mauss's speculation that notions of the person rather than being primarily philosophical or psychological have a complex social and ideological origin. Discussing societies ranging from ancient Greece, India, and China to modern Africa and Papua New Guinea, they provide fascinating descriptions of how these different cultures define the person. But they also raise deeper theoretical issues: What is universally constant and what is culturally variable in people's thinking about the person? How can these variations be explained? Has there been a general progressive development toward the modern Western view of the person? What is distinctive about this? How do one's notions of the person inform one's ability to comprehend alternative formulations? These questions are of compelling interest for a wide range of anthropologists, philosophers, historians, psychologists, sociologists, orientalist, and classicists. The book will appeal to any reader concerned with understanding one of the most fundamental aspects of human existence.

The Human Person David Braine, 2019-07-09

A philosophical work that addresses the validity of the question: What is it for the human being to be an animal and for this animal to be a spirit? Braine argues that the perspectives of materialism and dualism are different casts of the same flawed mold and offers a holistic alternative. Braine further argues that perception is inseparable from behavior and that the human propensity to produce language separates us from other animals. Culminating in a discussion of the meaning of death, this is a rich and passionate philosophical argument for the human being as animal and soul.

Central Works of Philosophy v5 John Shand, 2014-12-18

Central Works of Philosophy is a major multi-volume collection of essays on the core texts of the Western philosophical tradition. From Plato's *Republic* to the present day, the five volumes range over 2500 years of philosophical writing, covering the best, most representative, and most influential work of some of our greatest philosophers. Each essay has been specially commissioned and provides an overview of the work, clear and authoritative exposition of its central ideas, and an assessment of the work's importance. Together, these books provide an unrivaled companion for studying and reading philosophy, one that introduces the reader to the masterpieces of the Western philosophical canon. This volume covers the central texts in the history of analytic philosophy from Quine's *Word and Object* (1960) to the present day. The texts range over political philosophy, ethics, metaphysics, and the philosophies of language, mind, and logic, and represent some of the most important philosophical work of the last forty years. Students and non-specialists

and Other Essays in Political Philosophy Gerald A. Cohen, 2011-01-03 G A Cohen was one of the most gifted influential and progressive voices in contemporary political philosophy At the time of his death in 2009 he had plans to bring together a number of his most significant papers This is the first of three volumes to realize those plans Drawing on three decades of work it contains previously uncollected articles that have shaped many of the central debates in political philosophy as well as papers published here for the first time In these pieces Cohen asks what egalitarians have most reason to equalize he considers the relationship between freedom and property and he reflects upon ideal theory and political practice Included here are classic essays such as Equality of What and Capitalism Freedom and the Proletariat along with more recent contributions such as Fairness and Legitimacy in Justice Freedom and Money and the previously unpublished How to Do Political Philosophy On ample display throughout are the clarity rigor conviction and wit for which Cohen was renowned Together these essays demonstrate how his work provides a powerful account of liberty and equality to the left of Ronald Dworkin John Rawls Amartya Sen and Isaiah Berlin

The Essence of the Self Geoffrey Madell, 2014-11-20 In this volume Geoffrey Madell develops a revised account of the self making a compelling case for why the simple or anti criterial view of personal identity warrants a robust defense Madell critiques recent discussions of the self for focusing on features which are common to all selves and which therefore fail to capture the uniqueness of each self In establishing his own view of personal identity Madell proposes a that there is always a gap between A is f and g and I am f and g b that a complete description of the world offered without recourse to indexicals will fail to account for the contingent truth that I am one of the persons described and c that an account of conscious perspectives on the world must take into account what it means for an apparently arbitrary one of these perspectives to be mine Engaging with contemporary positions on the first person embodiment psychological continuity and other ongoing arguments Madell contends that there can be no such thing as a criterion of personal identity through time that no bodily or psychological continuity approach to the issue can succeed and that personal identity through time must be absolute not a matter of degree Madell s view that the nature of the self is substantively different from that of objects in the world will generate significant discussion and debate among philosophers of mind
