Extending Self-Esteem Theory and Research Timothy J. Owens, Sheldon Stryker, Norman Goodman, 2006-11-02 Self esteem is an academic and popular phenomenon vigorously researched and debated sometimes imbued with magical qualities other times vilified as the bane of the West's preoccupation with self Though thousands of articles have been devoted to the topic and bookshops work to feed the public's appetite for advice on revealing enhancing and maintaining self esteem conflicting claims and findings have placed the field in disarray In a very real sense self esteem is a victim of its own popularity This book seeks to add clarity to a concept earlier examined by such notable self theorists as Morris Rosenberg but eminently worthy of re examination and extension We do this by asking some leading thinkers on self esteem theory measurement and application to assess what we know about self esteem and link it to important aspects of society and the human experience

Africa and the Metaphysical Empire Frank Aragbonfoh Abumere, 2025-02-03 This book investigates whether African cultures can appropriate some useful aspects of Western cultures or whether doing so risks falling into the metaphysical empire and diluting African identity Ngugi wa Thiong'o and Ndlovu Gatsheni characterise the metaphysical empire as an intangible non physical and non geographical invasion of the mental universe of formerly colonised peoples As mutual exclusivists they argue that authentic decolonization necessitates a complete dissociation of the African and her culture from colonial heritage However cultural appropriationists such as Wole Soyinka Chinua Achebe and Chimamanda Ngozi Adichie argue that the African adoption of colonial heritage such as the English language is in no way antithetical to decolonization This book delves into the debate by exploring the strengths and weaknesses of cultural appropriationism and on the other hand testing the validity of mutual exclusivism The book demonstrates that cultural appropriation without falling into the metaphysical empire is possible but that this poses important questions about the nature of the decolonization project itself and where it should start and stop A more accommodative decolonization would recognize the relationship between cultural universals and particulars whilst also creating room for cultural appropriation Ultimately the book argues that both cultural appropriationists and mutual exclusivists must simultaneously renounce absolutism By being amenable to a fusion of horizons discourse can move beyond the decolonization fallacy of arguing that things are always either or This original and important contribution to the metaphysical empire debate will be a seminal read for researchers across the fields of philosophy political science African studies and Black studies
