Oral-Scribal Dimensions of Scripture, Piety, and Practice Werner H. Kelber,Paula A. Sanders,2016-09-30 In April 2008 a conference was convened at Rice University that brought together experts in the three monotheistic religions of Judaism Christianity and Islam The papers discussed at the conference are presented here revised and updated The thirteen contributions comprise the keynote address by John Miles Foley three essays on Judaism and the Hebrew Bible three on the New Testament three on the Qur an and two summarizing pieces by the Africanist Ruth Finnegan and the Islamicist William Graham respectively The central thesis of the book states that sacred Scripture was experienced by the three faiths less as a text contained between two covers and a literary genre and far more as an oral phenomenon In developing the performative recitative aspects of the three religions the authors directly or by implication challenge their distinctly textual identities Instead of viewing the three faiths as quintessential religions of the book these writers argue that the religions have been and continue to be appropriated not only as written but also very much as oral authorities with the two media interpenetrating and mutually influencing each other in myriad ways

Social Representations Serge Moscovici,2001 Considered the leading contemporary European social psychologist for his groundbreaking work on social influence and crowd psychology Serge Moscovici has played a definitive role in shaping the trajectory of modern social inquiry Bringing together the key texts in which he outlines and defines his benchmark theory of social representationsincluding several essays never previously published in Englishhis indispensable sourcebook illustrates the enormous range and scope of Moscovici s work Moscovici purports a theory of social representations remarkably distinct from the dominant themes in contemporary U S social psychology In contrast to the traditionally individualistic emphasis Moscovici s work is embedded in a broader social and cultural tradition and is passionately concerned with the social context in which meaning is constructed and lives are enacted His radical and lucid approach offers fresh and multifarious ways of seeing the world while his clear and coherent perspective provides a rich

contribution to a discipline which has been notoriously fragmented Addressing contemporary social phenomena rather than being trapped within the artificial limits of laboratory experimentation Moscovici draws upon the diverse traditions of the wider social sciences making him a primary voice within the community of social theorists Sure to fascinate any researcher scholar student or practitioner of social psychology Social Representations provides a representative and long overdue collection of Moscovici's unique and important work

Light of Samantabhadra Go-rams-pa Bsod-nams-seng-ge, 2023-07-18 Among the many works produced in the rich philosophical tradition of India's classical age few have had more impact than Dharmakirti's Commentary on Valid Cognition Pramavarttika Composed in India in the seventh century it became the cornerstone for the study of logic and epistemology in the Tibetan Buddhist tradition This work translated here is by one of the premier scholars of the Sakya school Gorampa Snam Seng 1429-89 It illuminates the first two chapters of Dharmakirti's work those on using inference to enlighten oneself svrthnumna and on establishing valid cognition pramassiddhi both to determine the authority of the Buddha as a valid teacher and to eliminate the cognitive obstacles to awakening The root text is composed in compact verses and these are translated here along with Gorampa's word by word commentary that reveals their often veiled meanings These chapters explore key issues in the philosophy of language and the nature of conventional designation the way to employ sound reasoning the proof of past and future lives and the way to eliminate the view of self In the skilled hands of translator Gavin Kilty these insights are made accessible

Space Structures A. Loeb, 2012-12-06 xiv aggregates this touches on the very nature of things The concept of statistical symmetry which Loeb develops is particularly important it emphasizes the limitations in seemingly random aggregates and for permits general statements of which the crystallographer's symmetries are only special cases The reductionist and holistic approaches to the world have been at war with each other

since the times of the Greek philosophers and before. In nature parts clearly do fit together into real structures and the parts are affected by their environment. The problem is one of understanding. The mystery that remains lies largely in the nature of structural hierarchy for the human mind can examine nature on many different scales sequentially but not simultaneously. Arthur Loeb's monograph is a fundamental one but one can sense a development from the relations between his zero and three dimensional cells to the far more complex world of organisms and concepts. It is structure that makes the difference between a cornfield and a cake between an aggregate of cells and a human being between a random group of human beings and a society. We can perceive anything only when we perceive its structure and we think by structural analogy and comparison. Several books have been published showing the beauty of form in nature. This one has the beauty of a work of art but it grows out of rigorous mathematics and from the simplest of bases: dimensionality, extent and valency. **Business**

Animals have recently become recognized as significant agents of history as part of the animal turn in historical studies. Animals in Byzantium were human companions, a source of entertainment and food; it is small wonder that they made their way into literature and the visual arts. Moreover, humans defined themselves and their activities by referring to non-human animals, either by anthropomorphizing animals as in the case of the Cat Mice War or by animalizing humans and their unwanted behaviours. *The Routledge Handbook of Human-Animal Relations in the Byzantine World* offers an in-depth survey of the relationships between humans and non-human animals in the Byzantine Empire. The contributions included in the volume address both material zooarchaeology, animals as food, visual representations of animals and immaterial semiotics/philosophy aspects of human-animal coexistence in chapters written by leading experts in their field. This book will appeal to students and scholars alike researching Byzantine social and cultural history as well as those interested in the history of animals. This book marks an important step in the development of animal studies in Byzantium, filling a gap in the wider research on the history of human-animal relations in the Middle Ages.
