Concepts Of Criticism:

Concepts of Criticism René Wellek, 1963 Provocative and penetrating these essays attest to Mr Wellek's intense concern during the past two decades with the problems besetting the disciplines of literary theory criticism and history Each essay accordingly sets as its goal the development of a concept that will contribute to better understanding of the literary work Trenchant investigation of such significant critical concepts as baroque romanticism and realism are complemented by illuminating surveys of the current state of literary criticism and related commentaries on contemporary literary theory and scholarship Concepts of Criticism constitutes a valuable statement of Mr Wellek's theoretical position A number of the essays are published for the first time and a bibliography of Mr Wellek's publications is included René Wellek author of A History of Modern Criticism 1750-1950 is Sterling Professor of Comparative Literature at Yale

Species Concepts and Phylogenetic Theory Quentin D. Wheeler, Rudolf Meier, 2000 No question in theoretical biology has been more perennially controversial or perplexing than What is a species Recent advances in phylogenetic theory have called into question traditional views of species and spawned many concepts that are currently competing for general acceptance Once the subject of esoteric intellectual exercises the species problem has emerged as a critically important aspect of global environmental concerns Completion of an inventory of biodiversity success in conservation predictive knowledge about life on earth management of material resources formulation of scientifically credible public policy and law and more depend upon our adoption of the right species concept Quentin D. Wheeler and Rudolf Meier present a debate among top systematic biology theorists to consider the strengths and weaknesses of five competing concepts Debaters include 1 Ernst Mayr Biological Species Concept 2 Rudolf Meier and Rainer Willmann Hennigian species concept 3 Brent Mishler and Edward Theriot one version of the Phylogenetic Species Concept 4 Quentin Wheeler and Norman Platnick a competing version of the Phylogenetic Species Concept and 5 E. O. Wiley and Richard Mayden the Evolutionary Species Concept Each author or pair of authors contributes three essays to the debate first a position paper with an opening argument for their respective concept of species second a counterpoint view of the weakness of competing concepts and finally a rebuttal of the attacks made by other authors This unique and lively debate format makes

the comparative advantages and disadvantages of competing species concepts clear and accessible in a single book for the first time bringing to light numerous controversies in phylogenetic theory taxonomy and philosophy of science that are important to a wide audience Species Concepts and Phylogenetic Theory will meet a need among scientists conservationists policy makers and students of biology for an explicit critical evaluation of a large and complex literature on species An important reference for professionals the book will prove especially useful in classrooms and discussion groups where students may find a concise lucid entrance to one of the most complex questions facing science and society

The concepts of criticism Karl Aschenbrenner,1974 **Concepts** Andy Blunden,2012-07-20 Andy Blunden presents a critical review of theories of Concepts in cognitive psychology analytical philosophy linguistics conceptual change theory and other disciplines The problems in these disciplines has led many to abandon the idea of Concepts altogether particularly those taking an interactionist approach Blunden responds with an historical review focussing on the idealist philosophy of Hegel its reception and transformation in the development of positive science and finally the cultural psychology of Lev Vygotsky He then proposes an approach to Concepts which draws on Activity Theory Concepts are equally subjective and objective units of consciousness and of the cultural formation of which one is a part This continues the author's earlier work in An Interdisciplinary Theory of Activity Brill 2010 The Concepts of Criticism : an Essay F. E. Sparshott,1967 **Concepts of Criticism ... Edited and with an Introduction by Stephen G. Nichols** René Wellek,Stephen G. NICHOLS,1963

Dictionary of Concepts in Literary Criticism and Theory Wendell Harris,1992-04-13 Not a general dictionary of literary terms the Dictionary of Concepts in Literary Criticism and Theory treats seventy fundamental and overarching concepts from allegory and allusion to tragedy and unity By concepts is meant broad terms that designate modes of thought about approaches to or major classifications of literature that are of central importance to the history or present pursuit of literary criticism and commentary Particular attention has been given to distinguishing the different senses in which a term has been used or is presently used to noting major questions that have been debated in relation to the concept and to documenting points of view and specific aspects with full references Additional sources of information are appended in each case Useful especially to students and faculty in literature and to literary critics the concepts are lucidly presented in essays that can enlighten any reader interested in more than superficial definitions *Concepts of Criticism* René Wellek,1965 **The**

Logic as the Science of the Pure Concept Benedetto Croce, 2022-05-28 In *Logic as the Science of the Pure Concept* Benedetto Croce presents a nuanced exploration of logic as a vital philosophical discipline that transcends mere formalism The text argues for a conception of logic deeply intertwined with aesthetics and ethics emphasizing the role of human creativity in the formation of concepts Written in Croce's distinctive lyrical style the book advocates for a dynamic interpretation of logic that sees it as a living evolving science rather than a static set of rules reflecting the broader context of early 20th century thought that grappled with the implications of idealism and the limitations of empiricism Benedetto Croce 1866-1952 an influential Italian philosopher and historian was driven by the belief that philosophy should address the complexities of human experience His commitment to idealist thought and the dialectical method is evidenced in this work which draws upon his extensive background in aesthetics and historical materialism Croce's multifaceted career as a political figure and a cultural critic further informs his insights positioning him as a central figure in the revival of philosophical inquiry in post-Risorgimento Italy Highly recommended for scholars and students alike Croce's treatise offers a profound reexamination of logic that challenges preconceived notions and invites readers to engage with concepts in a novel way By bridging the gap between abstract reasoning and the lived experiences of individuals this work not only enriches our understanding of logic but also redefines its significance within the broader spectrum of human thought

In Defense of an Evolutionary Concept of Health Mahesh Ananth, 2008 One of the most controversial contemporary debates on the concept of health is the clash between the views of naturalists and normativists Naturalists argue that although health can be valued or disvalued the concept of health is itself objective and value free In contrast normativists argue that health is a contextual and value laden concept and that there is no possibility of a value free understanding of health This debate has fueled many of the often very acrimonious disputations arising from the claims of health disease and disability activists and charities and the public policy responses to them In responding to this debate Ananth both surveys the existing literature with special focus on the work of Christopher Boorse and argues that a naturalistic concept of health drawing on evolutionary considerations associated with biological function homeostasis and species design is defensible without jettisoning norms in their entirety
