**God and the Philosophy of Explanation** James W. Peterson, 2010-08 The purpose of this book is simple It is to tell the truth about GOD Learning the truth about GOD is the result of Mr Peterson's discovery of the meaning and purpose of his life It was discovered as a direct result of his need to learn it following his daughter's death in August of 1980 He discovered that the

purpose and course of his life is determined in the same manner as yours It matters not who you are or what your particular circumstance is It doesn't matter if you have lost a child to death It doesn't even matter if you have children It matters not if you are a murderer or a saint gay or straight male or female first world citizen or jungle savage plant or animal The purpose for living is the same for all living things A rather intriguing claim isn't it If one has experienced the death of a child Mr Peterson's experience is not different from one's own in any important way But the story of how he came about his particular experience probably is Mr Peterson says that his friends comprise a very special society of humans they are parents of children who died before they did it is not supposed to happen that way But because they did lose a child to death he says they are experts in the field of pain and grieving They are not proud of the knowledge they have gained but they realize they have gained knowledge of what life is and how it actually operates that can be achieved in no other way They have experienced the very worst pain a human being can experience and remain alive Mr Peterson uses his unique experience to guide his readers through a complex series of intellectual challenges with the ease of a master sculptor

**The Neoliberal Revolution in Eastern Europe** Paul Dragos?

Aligica?, Anthony John Evans, 2009-01-01 Very few studies have ventured to explore the shift in economic ideas that were

such a critical factor in shaping and understanding the East European transition process Paul Dragos Aligica and Anthony J Evans have seized upon the potential that this crucial case has to illuminate the larger phenomenon of diffusion and adoption of economic ideas Two different but related research agendas are developed the study of the spread of neoliberalism as seen from the perspective of Eastern European post communist evolutions and the study of Eastern European transition as seen from an ideas centered perspective Combining a distinctive synthesis of the existing data about the spread of neoliberal economic ideas in Central and Eastern Europe with an analysis of the processes at work the authors challenge a series of misunderstandings and myths about the spread of neoliberal economic ideas The disputed topics include the myth of an Eastern European rush to embrace the theories and ideas that may be considered the mark of market fundamentalism the notion that a harsh neoliberal dogmatism was somehow imposed on the region from outside the idea that the standardization and regimentation of economic thinking was a result of the spread of the Western way of doing economics and the belief that the Eastern Europeans passively embraced this uniformity and standardization due to pressure from the Westerners This unusual synthesis will appeal to scholars in economics political science communist post communist studies and new institutionalism as well as policymakers
