A Chesley Bonestell Space Art Chronology Melvin H. Schuetz,1999 Chesley Bonestell has been called the Father of Space Art His photorealistic paintings of the Moon and planets and other worlds beyond have awed us since they were first published over half a century ago Moreover he showed long before Gagarin or Glenn what it would be like for humans to explore the vastness of space As author Howard E McCurdy has written in his book Space and the American Imagination No artist had more impact on the emerging popular culture of space in America than Chesley Bonestell Through his visual images he stimulated the interest of a generation of Americans and showed how space travel would be accomplished Considering his great influence on both the public interest in space flight and the actual development of a national space program it is therefore both surprising and unfortunate that heretofore there has not been available a bibliography documenting those places where Bonestell's art appeared in print This book fills that void Written in cooperation with the artist's widow and his estate managers A Chesley Bonestell Space Art Chronology contains well over 700 entries and is the definitive reference guide to publications containing Bonestell's space art In praise of it the illustrator Vincent Di Fate says This entertaining and scholarly work is an invaluable and indispensable treasure for the vast legions of Bonestell's fans Thoughtful engrossing and utterly thorough it provides the cosmic ride of a lifetime
