The 1999 international conference on Information Processing in Medical Imaging IPMI 99 was the sixteenth in the series of biennial meetings and followed the successful meeting in Poultney Vermont in 1997 This year for the first time the conference was held in central Europe in the historical Hungarian town of Visegrád one of the most beautiful spots not only on the Danube Bend but in all Hungary The place has many historical connections both national and international The castle was once a royal palace of King Matthias In the middle ages the Hungarian Czech and Polish kings met here Recently after the summit meeting of reestablished democracies in the area it became a symbol for the cooperation between central European countries as they approached the European Union It was thus also symbolic to bring IPMI in the year of the 30th anniversary of its foundation to this place and organize the meeting with the close cooperation of local and traditional western organizers It also provided a good opportunity to summarize briefly a history of IPMI for those who were new to the IPMI conference This year we received 82 full paper submissions from all over the world Of these 24 were accepted as oral presentations These were divided into 6 sessions In spite of our efforts it was found to be impossible to make these sessions fully balanced and homogeneous
