Writing about Archaeology Graham Connah, 2010-03-08 In this book Graham Connah offers an overview of archaeological authorship its diversity its challenges and its methodology Based on his own experiences he presents his personal views about the task of writing about archaeology The book is not intended to be a technical manual Instead Connah aims to encourage archaeologists who write about their subject to think about the process of writing He writes with the beginning author in mind but the book will be of interest to all archaeologists who plan to publish their work Connah s overall premise is that those who write about archaeology need to be less concerned with content and more concerned with how they present it It is not enough to be a good archaeologist One must also become a good writer and be

able to communicate effectively Archaeology he argues is above all a literary discipline **Anglo-Saxon Studies in Archaeology and History 23** Helena Hamerow,2023-10-27 Volume 23 of Anglo Saxon Studies in Archaeology and History ASSAH a series concerned with the archaeology and history of England and its neighbours during the Anglo Saxon period circa AD 400 1100 **Medieval Archaeology** Pamela Crabtree,2013-05-13 This is the first reference work to cover the archaeology of medieval Europe No other reference can claim such comprehensive coverage from Ireland to Russia and from Scandinavia to Italy the archaeology of the entirety of medieval Europe is discussed **Urban Growth and the Medieval Church** Nigel Baker,Richard Holt,2017-05-15 It has long been recognised that the Church played a major role in the development of towns and cities from the earliest times a fact attested to by the prominence and number of ecclesiastical buildings that still dominate many urban areas Yet despite this physical evidence and the work of archaeologists and historians many important aspects of the early stages of urbanization in England are still poorly understood Not least there are many unanswered questions concerning the processes by which the larger towns emerged as planned settlements during the pre Conquest centuries Whilst the commitment of the Wessex kings is recognized questions remain concerning the participation of the Church in this process Likewise our understanding of the Church s influence in the later development of towns is not yet fully developed Many intriguing questions remain concerning such issues as the founding of parish churches and their boundaries and the extent to which the Church as a major landowner helped shape the evolving identity of towns and their suburbs It is questions such as these that this volume sets out to answer Employing a wealth of historical and archaeological evidence two key towns Gloucester and Worcester are closely examined in order to build up a picture of their respective developments throughout the medieval period Through this multi disciplinary and comparative approach a picture begins to emerge the Church s role in helping to shape not only the spiritual but also the social economic and cultural development of the urban environment
