

Concise Townscape

Paul Zanker

Concise Townscape:

Concise Townscape Gordon Cullen, 2012-09-10 This book pioneered the concept of townscape Townscape is the art of giving visual coherence and organization to the jumble of buildings streets and space that make up the urban environment It has been a major influence on architects planners and others concerned with what cities should look like The Concise Townscape Gordon Cullen, 1961 The Concise Townscape Gordon Cullen, 2010 **Visual Planning and the Picturesque** Nikolaus Pevsner, 2010 A previously unpublished work by Nikolaus Pevsner much of which was published as journal articles in the Architectural Review in the 1940s and 1950s during Pevsner's term as editor **The Concise Townscape** Gordon Cullen (Architekt, Grossbritannien), 1971 **Valences of Historiography** Gevork Hartoonian, 2024-12-30 The compiled essays offer various themes and ways of approaching historiography Each chapter probes the state of contemporary theorization of architecture histories working toward the theme of critically re writing history Essential to each author's contribution are specific traditions created by the mole of history burrowing through the past This book concerns the historian's conjectures towards capturing the past and present zeitgeist Temporality is the theme running through the narrative of this volume It raises the question of whether the ever growing body of work on architectural history should be considered as history More specifically what is the intersection between history and architectural history Furthermore can every text focused on architecture's past be considered categorically historiographic In what capacity does architectural history index history beyond contingencies and without reducing the text to empirical realities and the historian's interest in a specific subject including those collected through archival research itself an emblem of textuality This book upholds the conviction that the past should be recalled accurately and that there is no history but historical criticism the scope of which exceeds the historicity of Humanism Dialectically the timeline experienced across contemporary techno economic and cultural domains aesthetics offers an opportunity to explore architecture produced outside the Euro American continents Valences of Historiography offers a fresh take on architectural history that is useful for academics researchers and architecture students **Facadism** Jonathan Richards, 2002-09-11 Facadism the preservation of historic facades the creation of facsimiles in front of new buildings and the decorative exercises of postmodernism is accused of destroying architectural innovation of divorcing the interior and exterior of buildings and of reducing townscapes to theatre sets Its defenders describe facadism as the way urban tradition and progress walk hand in hand Facadism presents a critical analysis of a concept central to the way in which the city is being remodelled Assessing architectural and townscape philosophies and their aesthetics the principles of urban conservation the process of heritage planning and the market forces of urban development the book builds a complete picture of the causes and effects of facadism in the Twentieth Century **Pompeii** Paul Zanker, 1998 Paul Zanker a noted authority on Roman art and architecture shows us the images that marked Pompeii's development from country town to Roman imperial city At home or in public at work or at ease Pompeians and their world

come alive in Zanker's masterly rendering **The Urban Design Reader** Michael Larice, Elizabeth Macdonald, 2013-05-07

The second edition of *The Urban Design Reader* draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design. Nearly 50 generous selections include seminal contributions from Howard Le Corbusier, Lynch and Jacobs to more recent writings by Waldheim, Koolhaas and Sorkin. Following the widespread success of the first edition of *The Urban Design Reader*, this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today. The six-part structure of the second edition guides the reader through the history, theory and practice of urban design. The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century. Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s. These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places. The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places. These selections are largely describing the outcomes of mid-century urban design and voicing concerns over the placeless quality of contemporary urbanism. The fourth part of the Reader explores key issues in urban design and development. Ideas about sprawl, density, community health, public space and everyday life are the primary focus here. Several new selections in this part of the book also highlight important international development trends in the Middle East and China. Part Five presents environmental challenges faced by the built environment professions today, including recent material on landscape urbanism, sustainability and urban resiliency. The final part examines professional practice and current debates in the field where urban designers work: what they do, their roles, their fields of knowledge and their educational development. The section concludes with several position pieces and debates on the future of urban design practice. This book provides an essential resource for students and practitioners of urban design, drawing together important but widely dispersed writings. Part and section introductions are provided to assist readers in understanding the context of the material, summary messages, impacts of the writing and how they fit into the larger picture of the urban design field.

The Anxious City Richard J. Williams, 2004 A unique and provocative history of the development of the idea of the city in recent years. Key public spaces and buildings in England, Europe and the USA are discussed in relation to their socio-political context.

The Picturesque John Macarthur, 2013-03-07 In this fresh and authoritative account, John Macarthur presents the eighteenth-century idea of the picturesque when it was a risky term concerned with a refined taste for everyday things such as the hovels of the labouring poor in the light of its reception and effects in modern culture. In a series of linked essays, Macarthur shows what the concept of picture does in the picturesque and how this relates to modern theories of the image: how the distaste that might be felt today at the sentimentality of the picturesque was already at play in the eighteenth century; how

visual values such as irregularity become the basis of modern architectural planning how the concept of appropriating a view moves from landscape design into urban design why movement is fundamental to picturing the stillness of buildings cities and landscapes Drawing on examples from architecture art and broader culture John Macarthur s account of this key topic in cultural history makes engaging reading for all those studying architecture art history cultural history or visual studies

People and Computers XVII — Designing for Society Eamonn O'Neill,Philippe Palanque,Peter Johnson,2013-11-11 HCI is a fundamental and multidisciplinary research area It is fundamental to the development and use of computing technologies Without good HCI computing technologies provide less benefit to society We often fail to notice good HCI Good HCI passes us by without comment or surprise The technology lets you do what you want without causing you any further work effort or thought You load a DVD into your DVD player and it works why shouldn t it You take a photograph with your digital camera and without any surprise you easily transfer and view these on your computer You seamlessly connect to networks and devices with a common interface and interaction style Yet when HCI is wrong the technology becomes useless unusable disrupts our work inhibits our abilities and constrains our achievements Witness the overuse and inconsistent use of hierarchical menus on mobile phones or the lack of correspondence between call statistics on the phone handset itself and the billed call time on the account bill or the lack of interoperability between file naming conventions on different operating systems running applications and files of the same type e g the need for explicit filename suffixes on some operating systems Those programmers designers and developers who know no better believe that HCI is just common sense and that their designs are obviously easy to use

The Literature and Study of Urban and Regional Planning Brenda White,2024-02-29 First published in 1974 The Literature and Study of Urban and Regional Planning discusses the processes of spatial planning and the range of subject knowledge which is required to contribute to it It describes the physical forms in which the literature relating to spatial planning is usually presented and the ways in which this literature is made available in different types of organization The author gives details of the most useful libraries whose facilities are available to students and of the research which is being undertaken into the principal problems of planning information The second part of the book consists of a subject bibliography divided for ease of reference into twenty six sections each concerned with a component part of spatial planning and containing annotated references to books official publications developmental plans legislation and other material This book will be of interest to students of sociology and urban studies

Non-Design Anthony Fontenot,2021-07-09 Introduction Planned order versus spontaneous order New brutalism and the critique of socialism non design and the new visual order The borax debates from modern design to non design Spontaneous city Jane Jacobs and the critique of planned order Chaos or control non design and the American city The indeterminate city Conclusion **Urban Visions** Carmen Díez Medina,Javier Monclús,2018-06-23 This book is a useful reference in the field of urbanism It explains how the contemporary city and landscape have been shaped by certain twentieth century visions that have carried over into

the twenty first century Aimed at both students and professionals this collection of essays on diverse subjects and cases does not attempt to establish universal interpretations it rather highlights some outstanding episodes that help us understand why the planning culture has given way to other forms of urbanism from urban design to strategic urbanism or landscape urbanism Compared with global interpretations of urbanism based on socioeconomic history or architectural historiography *Urban Visions From Planning Culture to Landscape Urbanism* aims to present the discipline couched in international contemporary debate and adopt a historic and comparative perspective The book s contents pertain equally to other related disciplines such as architecture urban history urban design landscape architecture and geography Foreword by Rafael Moneo

Understanding Architecture Through Drawing Brian Edwards, 2008-08-20 This second edition is fully revised and updated and includes new chapters on sustainability history and archaeology designing through drawing and drawing in architectural practice The book introduces design and graphic techniques aimed to help designers increase their understanding of buildings and places through drawing For many the camera has replaced the sketchbook but here the author argues that freehand drawing as a means of analyzing and understanding buildings develops visual sensitivity and awareness of design By combining design theory with practical lessons in drawing *Understanding Architecture Through Drawing* encourages the use of the sketchbook as a creative and critical tool The book is highly illustrated and is an essential manual on freehand drawing techniques for students of architecture landscape architecture town and country planning and urban design

Creating Vibrant Public Spaces Ned Crankshaw, 2012-09-26 Public space and street design in commercial districts can dictate the success or failure of walkable community centers Instead of focusing our efforts on designing new compact town centers many of which are located in the suburbs we should instead be revitalizing existing authentic town centers This informative practical book describes methods for restoring the health and vibrancy of the streets and public spaces of our existing commercial districts in ways that will make them positive alternatives to suburban sprawl while respecting their historic character Clearly written and with numerous photos to enhance the text *Creating Vibrant Public Spaces* uses examples from communities across the United States to illustrate the potential for restoring the balance provided by older urban centers between automobile access and walkability In advice that can be applied to a variety of settings and scales Crankshaw describes the tenets of contemporary design theory how to understand the physical evolution of towns how to analyze existing conditions and how to evaluate the feasibility of design recommendations Good design in commercial centers Crankshaw contends facilitates movement and access creates dynamic social spaces and contributes to the sense of a center a place where social commercial and institutional interaction is more vibrant than in surrounding districts For all the talk of creating new green urban spaces the ingredients of environmentally aware design he points out can often be found in the deteriorating cores and neighborhoods of towns and cities across the United States With creativity planning and commitment these centers can thrive again adding to the quality of local life and contributing to the local

economy too Understanding Cities Alexander Cuthbert, 2011-06-06 Understanding Cities is richly textured complex and challenging It creates the vital link between urban design theory and praxis and opens the required methodological gateway to a new and unified field of urban design Using spatial political economy as his most important reference point Alexander Cuthbert both interrogates and challenges mainstream urban design and provides an alternative and viable comprehensive framework for a new synthesis He rejects the idea of yet another theory in urban design and chooses instead to construct the necessary intellectual and conceptual scaffolding for what he terms The New Urban Design Building both on Michel de Certeau's concept of heterology thinking about thinking and on the framework of his previous books Designing Cities and The Form of Cities Cuthbert uses his prior adopted framework history philosophy politics culture gender environment aesthetics typologies and pragmatics to create three integrated texts Overall the trilogy allows a new field of urban design to emerge Pre existing and new knowledge are integrated across all three volumes of which Understanding Cities is the culminating text Beyond Textual Literacy: Visual Literacy for Creative and Critical Inquiry Mary A.

Drinkwater, 2020-09-25 This volume contains chapters derived from papers presented at the 3rd Global Conference on Visual Literacies Exploring Critical Issues held in Oxford UK July 14th through the 16th 2009 The conference brought together a broad range of cultural artistic and academic participants Jane Jacobs is still here Roberto Rocco, 2023-06-06 On the occasion of Jane Jacobs 100 anniversary the chair of Spatial Planning and Strategy of the Delft University of Technology together with the OTB Research Institute for the Built Environment and the Rotterdam Erasmus University College organised a two day conference on Jane Jacob's legacy at TU Delft on 24 25 May 2016 This event was complemented one year later by a Jane Jacobs Year closing event We wished to celebrate the life and accomplishments of one of the most important urban thinkers of our time someone who has influenced generations of designers and planners and others concerned with the built environment the great Jane Jacobs This volume contains a number of papers presented at the celebratory conference held at TU Delft in May 2016 with six tracks coordinated by guest scholars Track 1 Jane Jacobs ethics and the just city Track 2 Jane Jacobs and Street Spaces Streets as public places Track 3 Jane Jacobs and the dynamics of neighbourhoods Track 4 Jane Jacobs and the Reshaping old urban fabrics in Chinese cities Track 5 Jane Jacobs and organised complexity Track 6 Jane Jacobs and safety in public space
