The concise and comprehensive information defines and focuses on past current and future technical trends. The handbook reviews over 20 000 different subjects and contains over 1 000 figures and more than 400 tables. Various plastic materials and their behavior patterns are reviewed. Examples are provided of different plastic products and relating to them critical factors that range from meeting performance requirements in different environments to reducing costs and targeting for zero defects. This book provides the reader with useful pertinent information readily available as summarized in the Table of Contents List of References and the Index.

Extruding Plastics D.V. Rosato, 2013-11-27. Worldwide extrusion lines successfully process more plastics into products than other processes by consuming at least 36 wt% of all plastics. They continue to find practical solutions for new products and or problems to meet new product performances. This book with its practical industry reviews is a unique handbook the first of its kind that covers over a thousand of the potential combinations of basic variables or problems with solutions that can occur from up stream to down stream equipment. Guidelines are provided for maximizing processing efficiency and operating at the lowest possible cost. It has been prepared with an awareness that its usefulness will depend greatly upon its simplicity and provision of essential information. It should be useful to:

- 1 those already extruding and desiring to obtain additional information for their line and or provide a means of reviewing other lines that can provide their line with operating improvements
- 2 those processing or extruding plastics for the first time
- 3 those considering going into another extrusion process
- 4 those desiring additional information about employing the design of various products more efficiently with respect to both performance and cost
- 5 those contemplating entering the business of extrusion
- 6 those in new venture groups materials development and or market development
