Archaeology and Language: Correlating archaeological and linguistic hypotheses Roger Blench, Matthew Spriggs, 1998 Using language to date the origin and spread of food production Archaeology and Language II represents groundbreaking work in synthesizing two disciplines that are now seen as interlinked linguistics and archaeology This volume is the second part of a three part survey of innovative results emerging from their combination Archaeology and historical linguistics have largely pursued separate tracks until recently although their goals can be very similar While there is a new awareness that these disciplines can be used to complement one another both rigorous methodological awareness and detailed case studies are still lacking in the literature This three part survey is the first study to address this Archaeology and Language II examines in some detail how archaeological data can be interpreted through linguistic hypotheses This collection demonstrates the possibility that where archaeological sequences are reasonably well known they might be tied into evidence of language diversification and thus produce absolute chronologies Where there is evidence for migrations and expansions these can be explored through both disciplines to produce a richer interpretation of prehistory An important part of this is the origin and spread of food production which can be modelled through the spread of both plants and words for them Archaeology and Language II will be of interest to researchers in linguistics archaeologists and anthropologists

Paul and Imperial Divine Honors D. Clint Burnett, 2024-03-19 How did the imperial cult affect Christians in the Roman Empire Jesus is lord not Caesar Many scholars and preachers attribute mistreatment of early Christians by Roman authorities to this fundamental confessional conflict But this mantra relies on a reductive understanding of the imperial cult D Clint Burnett examines copious evidence literary epigraphic numismatic and archaeological to more accurately reconstruct Christian engagement with imperial divine honors Outdated narratives often treat imperial divine honors as uniform and centralized focusing on the city of Rome Instead Burnett examines divine honors in Philippi Thessalonica and Corinth While all three cities incorporated imperial cultic activity in their social religious economic and political life the purposes and contours of the practice varied based on the city's unique history For instance Thessalonica paid divine honors to living Julio Claudians as tribute for their status as a free city in the empire and Christian resistance to the practice was seen as a threat to that independence Ultimately Burnett argues that early Christianity was not specifically antigovernment but more broadly countercultural and that responses to this stance ranged from conflict to apathy Burnett's compelling argument challenges common assumptions about the first Christians place in the Roman Empire This fresh account will benefit Christians seeking to understand their faith's place in public life today
