## **Concurrent Engineering Whats Working Where:**

Concurrent Engineering Christopher J. Backhouse, Naomi J. Brookes, 1996 The core of the book is a series of case studies written by senior industrialists In each chapter companies that have employed similar approaches to Concurrent Engineering are compared The case studies range from multinationals such as Rolls Royce IBM and Marconi through to smaller enterprises By reference to these real examples executives concerned with evaluating or implementing Concurrent Engineering can see how the most appropriate techniques can be selected and introduced into their own company

**Managing New Product Innovation** B. Jerrard, R. Newport, . Trueman, 2003-09-02 New product design and development is often the result of personal vision Harnessing this often requires a special receptiveness and enthusiasm at all levels of an organization which serves to unlock potential and can turn the entire organizational pyramid upside down It is particularly important to understand and develop those aspects of design which can be constructively employed by designers in a strategic alliance with management and research The papers in this volume result from the conference of the Design Society held at the University of Central England in September 1998 They show how design led product development has worked in a range of industries from engineering through to design and management consultancy Not only practitioners but also students of industrial design and management should find this a valuable contribution to the subject
