Condor Question Captive Or Forever Free:

The Condor Question David Phillips, Hugh Nash, 1981 **Current Ornithology** D.M. Power, 2013-06-29 This edited series has three principal goals The first is to provide information in a relatively concise way for researchers needing an overview of specific disciplines The second is to provide an update on specific schools of thought bringing together ideas from colleagues whose works often appear in a variety of journals And the third is to stimulate and suggest directions for new research Volume 6 continues the tradition established by the previous editor and editorial board in providing new information updating our understanding of specific disciplines and stimulating new research In the first chapter Randall Breitwisch examines mortality patterns and sex ratios in monogamous birds He argues that there are many more components to measuring parental investment than are often realized our knowledge is weak in several areas Understanding the evolution of mating systems depends on better distinguishing the different intensities of natural selection that operate on males and females Greg Ory Butcher and Sievert Rohwer develop a framework for assessing the role of colorfulness in birds They propose several hypotheses to test and advocate evaluating more than one hypothesis at a time Future work on the evolution of distinctive coloration and of sexual and age dimorphism must take these ideas into account **After the Grizzly** Peter S. Alagona, 2020-02-25 This book traces the history of threats to species and habitat in California from the time of the Gold Rush to the present The author shows how over the course of more than a century scientists and conservationists came to view the fates of endangered species as dependent on the ecological conditions and human activities in the places where those species lived The story begins with the tale of the state's extinct mascot the California grizzly and the conservation movements and laws that followed its disappearance The second half of the book focuses on four high profile endangered species the California condor the desert tortoise the San Joaquin kit fox and the Delta smelt The author offers an account of how Americans developed a civil system in which imperiled species serve as proxies for broader conflicts about the politics of place The book concludes that the challenge for conservationists in the twenty first century will be to expand habitat conservation beyond protected wildlands to build more diverse and sustainable landscapes **Return of the Condor** John Moir, 2023-11-21 A heart stopping saga of the rescue from the very brink of extinction of one of the grandest of all birds Thomas Lovejoy president of the Amazon Biodiversity Center RETURN OF THE CONDOR is the riveting account of one of the most dramatic attempts to save a species from extinction in the history of modern conservation Features a new Afterword by the author With the condor's population down to only twenty two birds in the 1980s and their very survival in doubt the condor recovery team flouted conventional wisdom and pursued a controversial strategy to pull the bird back from the brink of extinction Thus began the ongoing decades long program to reestablish America's largest bird in its ancient home in Western skies Award winning science writer John Moir takes readers into the backcountry to get to know the recovery program scientists as well as some of the individual condors These are stories of peril uncertainty and controversy Woven

throughout these tales of heartbreak and triumph is the extraordinary dedication of the humans who have sometimes risked their lives for this charismatic intelligent and social bird Despite the program s remarkable successes the condor s narrative is still unfolding with a number of challenges remaining This includes the dilemma of lead poisoning among free flying condors that is a major obstacle to the bird s recovery The new Afterword presents a compelling examination of the progress and continuing adversity facing the condor recovery effort since the first edition of the book was published Finalist for the William Saroyan International Writing Prize from the Stanford University Libraries Honorable Mention from the National Association of Science Writers

Imagining Extinction Ursula K. Heise,2016-08-10 We are currently facing the sixth mass extinction of species in the history of life on Earth biologists claim the first one caused by humans Activists filmmakers writers and artists are seeking to bring the crisis to the public s attention through stories and images that use the strategies of elegy tragedy epic and even comedy *Imagining Extinction* is the first book to examine the cultural frameworks shaping these narratives and images Ursula K Heise argues that understanding these stories and symbols is indispensable for any effective advocacy on behalf of endangered species More than that she shows how biodiversity conservation even and especially in its scientific and legal dimensions is shaped by cultural assumptions about what is valuable in nature and what is not These assumptions are hardwired into even seemingly neutral tools such as biodiversity databases and laws for the protection of endangered species Heise shows that the conflicts and convergences of biodiversity conservation with animal welfare advocacy environmental justice and discussions about the Anthropocene open up a new vision of multispecies justice Ultimately *Imagining Extinction* demonstrates that biodiversity endangered species and extinction are not only scientific questions but issues of histories cultures and values

A Wilder Kingdom Ben A. Minteer,Harry Greene,2023-09-12 Zoos have always had a troubled relationship to what is considered the real wild Even the most immersive and naturalistic zoos critics maintain are inherently contrived and inauthentic environments Zoo animals diet care and reproduction are under pervasive human control with natural phenomena like disease and death kept mostly hidden from public view Furthermore despite their growing commitment to conservation and education zoos are entertainment providers that respond to visitors expectations and preferences What would a wilder zoo one that shows the public a wider range of ecological processes look like Is it achievable or even desirable What roles can or should zoos play in encouraging humanity to find meaningful connections with wild animals and places *A Wilder Kingdom* is a provocative and reflective examination of the relationship between zoos and the wild It gathers a premier set of multidisciplinary voices from animal studies and psychology to evolutionary biology and environmental journalism to consider the possibilities and challenges of making zoos wilder In so doing the contributors offer new insights into the future of the wild beyond zoos and our relationship to wild species and places across the landscape in an increasingly human dominated era

David Brower Tom Turner,2015-10-01 In this first comprehensive authorized biography of David Brower a dynamic leader in the environmental movement over the last half of

the twentieth century Tom Turner explores Brower's impact on the movement from its beginnings until his death in 2000. Frequently compared to John Muir, David Brower was the first executive director of the Sierra Club, founded Friends of the Earth, and helped secure passage of the Wilderness Act among other key achievements. Tapping his passion for wilderness and for the mountains he scaled in his youth, he was a central figure in the creation of the Point Reyes National Seashore and of the North Cascades and Redwood national parks. In addition, Brower worked tirelessly in successful efforts to keep dams from being built in Dinosaur National Monument and the Grand Canyon. Tom Turner began working with David Brower in 1968 and remained close to him until Brower's death. As an insider, Turner creates an intimate portrait of Brower, the man and the decisive role he played in the development of the environmental movement. Culling material from Brower's diaries, notebooks, articles, books, and published interviews, and conducting his own interviews with many of Brower's admirers, opponents, and colleagues, Turner brings to life one of the movement's most controversial and complex figures.

Endangered Species Recovery Tim Clark, Richard Reading, Alice Clarke, 1994-10 Endangered Species Recovery presents case studies of prominent species recovery programs in an attempt to explore and analyze their successes, failures, and problems, and to begin to find ways of improving the process. It is the first effort to engage social scientists as well as biologists in a wide-ranging analysis and discussion of endangered species conservation and provides valuable insight into the policy and implementation framework of species recovery programs. The book features a unique integration of case studies with theory and provides sound practical ideas for improving endangered species policy implementation.

Problematic Wildlife II Francesco Maria Angelici, Lorenzo Rossi, 2020-05-07 In a world where habitats are constantly changing and the impact of anthropization on the environment is increasingly intense, interactions between human and wildlife are becoming more and more complex. Some species pose problems for human activities, while many others need to be helped in order to continue to exist. This book follows the first volume called *Problematic Wildlife*, edited by F. M. Angelici and published by Springer in 2016, which has had considerable success with readers and critics. The volume includes 21 chapters divided into 7 parts devoted to specific topics which are approached in a

multidisciplinary way There are both review chapters and specific cases always bearing in mind the interest for an international audience The book is useful both for scientists wildlife specialists conservationists zoologists ecologists university students nature managers and for those who live in contact with wildlife and its problems such as farmers shepherds hunters urban planners and staff of parks and nature reserves Its ultimate goal is to offer scientific and pragmatic approaches to manage each categories of problematic species The Sespe Wild Bradley John Monsma,2007 An intermingling of nature and culture **Nature's Ghosts** Mark V. Barrow,2024-05-31 The rapid growth of the American environmental movement in recent decades obscures the fact that long before the first Earth Day and the passage of the Endangered Species Act naturalists and concerned citizens recognized and worried about the problem of human caused extinction As Mark V Barrow reveals in Nature s Ghosts the threat of species loss has haunted Americans since the early days of the republic From Thomas Jefferson s day when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed through the pioneering conservation efforts of early naturalists like John James Audubon and John Muir Barrow shows how Americans came to understand that it was not only possible for entire species to die out but that humans themselves could be responsible for their extinction With the destruction of the passenger pigeon and the precipitous decline of the bison professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern industrial society That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle the California condor and the whooping crane A sweeping beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated individuals who have studied and struggled to protect them Nature s Ghosts offers an unprecedented view of what we ve lost and a stark reminder of the hard work of preservation still ahead **Conservation and Environmentalism** Robert Paehlke,1995 Focusing on problems and solutions this authoritative reference work covers all aspects of the environment from the Everglades to the Himalayas from legislation in Australia to pollution problems in Eastern Europe from tropical rain forests to the Porcupine Caribou herd of the Alaskan and Canadian Arctic Some of the best known environmental professionals from 14 countries around the world have written original articles for this multidisciplinary Encyclopedia including Norman Myers Eugene C Hargrove Reed F Noss Max Oelschlaeger J Baird Callicott George Sessions M S Swaminathan Gilbert F White Michael E Kraft Michael P Cohen Paul Ekins and many others BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Wild Souls* Emma Marris,2021-06-29 Winner of the 2022 Rachel Carson Environment Book Award Winner of the 2022 Science in Society Journalism Award Books Finalist for the Los Angeles Times Book Prize Thoughtful insightful and wise Wild Souls is a landmark work Ed Yong author of An Immense World Fascinating hands on philosophy put to test in the real world Marris believes that our idea of wildness our obsession with purity is misguided No animal remains untouched by human

hands the science isn't the hard part. The real challenge is the ethics: the act of imagining our appropriate place in that world.

Outside Magazine From an acclaimed environmental writer, a groundbreaking and provocative new vision for our relationships with and responsibilities toward the planet's wild animals. Protecting wild animals and preserving the environment are two ideals so seemingly compatible as to be almost inseparable. But in fact, between animal welfare and conservation science, there exists a space of underexamined and unresolved tension: wildness itself. When is it right to capture or feed wild animals for the good of their species? How do we balance the rights of introduced species with those already established within an ecosystem? Can hunting be ecological? Are any animals truly wild on a planet that humans have so thoroughly changed? No clear guidelines yet exist to help us resolve such questions. Transporting readers into the field with scientists tackling these profound challenges, Emma Marris tells the affecting and inspiring stories of animals around the globe, from Peruvian monkeys to Australian bilbies, rare Hawaiian birds to majestic Oregon wolves. And she offers a companionable tour of the philosophical ideas that may steer our search for sustainability and justice in the non-human world. Revealing just how intertwined animal life and human life really are, *Wild Souls* will change the way we think about nature and our place within it.

The Zoological Record, 1981. Zoological Record is published annually in separate sections. The first of these is Comprehensive Zoology, followed by sections recording a year's literature relating to a Phylum or Class of the Animal Kingdom. The final section contains the new genera and subgenera indexed in the volume. Each section of a volume lists the sections of that volume.
