Shield, Stanley M. Aronson, 2005 Never before in human existence have the aged been so numerous and for the most part healthy In this important new book two professionals an anthropologist and a physician wrestle with the complex subject of aging Is it inevitable Is it a burden or gift What is successful aging Why are some people better at aging than others Where is aging located How does it vary among individuals within and between groups cultures societies and indeed over the centuries Reflecting on these and other questions the authors comment on the impact age has in their lives and work Two unique viewpoints are presented While medicine approaches aging with special attention given to the body its organs and its functions over time anthropology focuses on how the aged live within their cultural settings As this volume makes clear the two disciplines have a great deal to teach each other and in a spirited exchange the authors show how professional barriers can be surmounted In a novel approach each author explores a different aspect of aging in alternating chapters These chapters are in turn followed by a commentary by the other Further the authors interrupt each other within the chapters to raise questions contradict ask for clarification and explore related ideas with these interjections emphasizing the dynamic nature of their ideas about age Finally a third voice that of a random old man periodically inserts itself into the text to remind the authors of their necessarily limited understanding of the subject *Elderly Chinese in Pacific Rim Countries* Iris

Chi, Neena L. Chappell, James Lubben, 2001-04-01 With longer life expectancy most countries are now experiencing rapid ageing among their populations Ethnic Chinese populations are no exception to these demographic transformations During the twentieth century there has been a wide dispersion of Chinese people throughout the world as well as dramatic socio political changes within China These unique factors have strained traditional filial norms and necessitated a re examination of intergenerational relationships and the roles of elderly Chinese people This book investigates the varied adaptations of social support systems and social integration among ageing Chinese populations within a diverse set of countries in the Pacific Rim region The book is a collection of scholarly papers addressing such topics as community care family support one child families and social isolation Each paper illustrates the importance of social support networks and social integration to the quality of life for elderly Chinese persons living in dissimilar circumstances Dimensions Christine L.
