Agricultural Biotechnology An Economic Perspective:

Agricultural Biotechnology Margriet F. Caswell, Keith Owen Fuglie, Cassandra A. Klotz, 2003 The development of agricultural biotechnology offers the opportunity to increase crop production lower farming costs improve food quality and safety and enhance environmental quality This new book describes the economic scientific and social factors that will influence the future of biotechnology in agriculture The supply of biotechnology innovations and products will be affected by public policies and by expectations of producer and consumer demand for the products The demand for biotechnology by farmers and food processors is derived from the expected profitability of using the technology as an input to production Ultimately the use of biotechnology in the farm sector will depend on consumer demand for the biotechnology derived agricultural products

As progressively more farmers in developing countries begin using biotech crops careful evaluation of such crops benefits becomes ever more important This food policy review examines the applied economics literature regarding the impact of biotech crops on non industrialized agriculture and investigates the research methods used in assessing how these crops affect farmers consumers

the agricultural sector as a whole and international trade This analysis offers a tool for researchers who seek to produce objective relevant analysis of emerging crop biotechnologies that can in turn be used by national policymakers in developing countries

The Media, the Public and Agricultural Biotechnology Dominique Brossard,James Shanahan,T. Clint Nesbitt,2007 This book reviews the literature on communication about biotechnology Other books deal with this topic however this book with the use of case studies looks at public opinion data communication theory and international examples to provide a complementary overview of how the public sees this controversial topic

A Comprehensive Assessment of the Role of Risk in U.S. Agriculture Richard E. Just,Rulon D. Pope,2002 After all the research on agricultural risk to date the treatment of risk in agricultural research is far from harmonious Many competing risk models have been proposed Some new methodologies are largely untested Some of the leading empirical methodologies in agricultural economic research are poorly suited for problems with aggregate data where risk averse behavior is less likely to be important This book is intended to i define the current state of the literature on agricultural risk research ii provide a critical evaluation of economic risk research on agriculture to date and iii set a research agenda that will meet future needs and prospects This type of research promises to become of increasing importance because agricultural policy in the United States and elsewhere has decidedly shifted from explicit income support objectives to risk related motivations of helping farmers deal with risk Beginning with the 1996 Farm Bill the primary set of policy instruments from U S agriculture has shifted from target prices and set aside acreage to agricultural crop insurance Because this book is intended to have specific implications for U S agricultural policy it has a decidedly domestic scope but clearly many of the issues have application abroad For each of the papers and topics included in this volume individuals have been selected to give the strongest and broadest possible treatment of each facet of the problem The result is this comprehensive reference book on the economics of agricultural risk
