Cook,Margaret Maurer-Fazio,2013-10-23 Among the most dramatic changes to affect China in the 1990s is the upsurge in labour mobility and the emergence of a market driven system of labour allocation changes which profoundly affect the working environment and livelihoods of the Chinese people Papers in this collection draw on a wide variety of data sources to analyse key elements of this transformation **Development Centre Studies Chinese Economic Performance in the**

Long Run, 960-2030 AD, Second Edition, Revised and Updated Maddison Angus, 2007-09-28 This book uses a comparative approach to explain why China's role in the world economy has changed so dramatically in the last thousand years. This edition has been revised and updated and Chapter 4 is new. It concludes that China will resume its role as the world's largest economy by 2015.

Farmland, Farming and Food in the National Economy of China, 1947 - 2020 Jane Du, 2024-11-29 This book presents a concise yet detailed analysis of China's agricultural economy and food security in historical perspective. The book begins with an overview of China's socialist economic transition and Deng Xiaoping's reforms with an emphasis on agricultural economy and food production before discussing China's food industry and security in more recent years. Combining accessible qualitative interpretations with a rich data set, the author analyses the transitions and evolving policies in China's agricultural production and shows how these are essential for understanding contemporary food security challenges in the country. Covering topics including food imports and supply, dietary changes, international trade policies, and other geopolitical factors impacting food security, the book presents new insights into the interplay between domestic and international systems. Bridging gaps between historical understanding and contemporary policy relevance, this book will be useful reading for researchers in varied disciplines including economic history, agricultural economics, China's economy, and economic development.

Distortions to Agricultural Incentives in Asia Kym Anderson, Will Martin, 2009-02-04 The vast majority of the world's poorest households depend on farming for their livelihoods. During the 1960s and 1970s, most developing countries imposed pro-urban and anti-agricultural policies, while many high-income countries restricted agricultural imports and subsidized their farmers. Both sets of policies inhibited economic growth and poverty alleviation in developing countries. Although progress has been made over the past two decades to reduce those policy biases, many trade and welfare-reducing price distortions remain between agriculture and other sectors and within the agricultural sector of both rich and poor countries. Comprehensive empirical studies of the disarray in world agricultural markets appeared approximately 20 years ago. Since then, the Organisation for Economic Co-operation and Development has provided estimates each year of market distortions in high-income countries, but there have been no comparable estimates for the world's developing countries. This volume is the third in a series; other volumes cover Africa, Europe's transition economies, and Latin America and the Caribbean, that not only fills that void for recent years but extends the estimates in a consistent and comparable way back in time and provides analytical narratives for scores of countries that shed light on the evolving nature and extent of policy interventions over the past half-century. *Distortions to Agricultural Incentives in Asia* provides an overview of the evolution of distortions to agricultural incentives caused by price and trade policies in the 12 largest economies of East and South Asia. Together, these countries constitute more than 95 percent of the region's population, agricultural output, and overall GDP. Sectoral trade and exchange rate policies in the region have changed greatly since the 1950s, and there have been substantial reforms since the 1980s, most notably in China and India. Nonetheless, numerous price

distortions in this region remain and others have added in recent years The new empirical indicators in these country studies provide a strong evidence based foundation for assessing the successes and failures of the past and for evaluating policy options for the years ahead *Unfinished Reforms In The Chinese Economy* Jun Zhang,2013-05-06 China has quickly moved into a critical point in the sense that its past performance in economic growth and development has created so many unsolved problems and for such problems to be addressed a better understanding of these problems and a clear policy framework are required for policy makers to conduct reforms Based on high level empirical research on China s economic development by each of the contributors this edited book provides an in depth and clear analysis of many of important issues facing China s move to new phase of economic development and transformation and discusses policy issues involved in further reforms **China's Economy** Arthur R. Kroeber,2016 In China s Economy What Everyone Needs to Know Arthur Kroeber offers an overview of the highlights of China s development from the manufacturing agricultural change and construction developments of 1980s and 1990s through the expansion of China s financial systems and to its present day status as the world leader in yearly economic growth **A Survey of Agricultural Economics Literature** Lee R. Martin,1992 *Agricultural Reform in China* Yiping Huang,1998-01-13 Chinese agriculture has experienced some radical changes over the past twenty years Following the successful introduction of the household production system in the early 1980s difficulties were encountered in establishing a unified domestic agricultural market in the later 1980s and 1990s Through a comprehensive analysis of the changes in the Chinese agricultural institutions between the late 1970s and the mid 1990s this study attempts to provide some answers to the main questions presently facing the agricultural sector It focuses on the key elements of the pre reform agricultural institutions reviews the ways these institutions were refashioned and assesses the resulting changes in agricultural development The implications of different policy choices are carefully considered with the assistance of a computable general equilibrium model The author argues that China should push forward with its market oriented reform measures and introduce the rigours of international competition into the agricultural sector
