Agriculture Reconnecting People Land And Nature:

Agri-Culture Jules Pretty, 2013-06-17 Refreshingly fluent narrative brimming full of stories and metaphors Tim O Riordan University of East Anglia UK A great balance between storytelling and analysis which points to the critical need for gaining control over resources Jacqueline Ashby CIAT Colombia Full of supporting evidence and clear arguments Norman Uphoff Cornell University US A wonderful book put together with such vision and passion Mark Ritchie Institute of Agriculture and Trade Policy US A superb volume This is a valuable monograph that all policy makers scholars and farmers must read to understand their roles and responsibilities Vo Tong Xuan Angiang University Vietnam Beautifully written The implications of the book s ideas are deep and extensive Julia Guivant University of Florianopolis Brazil Something is wrong with our agricultural and food systems Despite great progress in increasing productivity in recent decades hundreds of millions of people remain hungry and malnourished and further millions suffer for eating too much food or the wrong sort Agri Culture envisages the expansion of a new form of food production and consumption founded on more ecological principles and in harmony with the cultures knowledges and collective capacities of the producers themselves It draws on many stories of successful agricultural transformation in developing and industrialized countries but with a warning that true prosperity will depend on the radical reform of the institutions and policies that control global food futures and fundamental changes in the way we think The time has come for the next agricultural revolution

The SAGE Handbook of Environment and Society Jules Pretty, Andy Ball, Ted Benton, Julia Guivant, David R Lee, David Orr, Max Pfeffer, Professor Hugh Ward, 2007-10-30 A monumental and timely contribution to scholarship on society and environments The handbook makes it easy and compelling for anyone to learn about that scholarship in its full manifestations and as represented by some of the most highly respected researchers and thinkers in the English speaking world It is wide reaching in scope and far reaching in its implications for public and private action a definite must for serious researchers and their libraries Bonnie J McCay Rutgers University This is the desert island book for anyone interested in the relationship between society and the environment The editors have assembled a masterful collection of contributions on every conceivable dimension of environmental thinking in the social sciences and humanities No library should be without it Robyn Eckersley University of Melbourne The SAGE Handbook of Environment and Society focuses on the interactions between people societies and economies and the state of nature and the environment Editorially integrated but written from multi disciplinary perspectives it is organised in seven sections Environmental thought past and present Valuing the environment Knowledges and knowing Political economy of environmental change Environmental technologies Redesigning natures Institutions and policies for influencing the environment Key themes include locations where the environment society relation is most acute where for example there are few natural resources or where industrialization is unregulated the discussion of these issues at different scales local regional national and global the cost of damage to resources and the relation between principal actors in the

environment society nexus Aimed at an international audience of academics research students researchers practitioners and policy makers The SAGE Handbook of Environment and Society presents readers in social science and natural science with a manual of the past present and future of environment society links *People and Nature* Emilio F. Moran,2016-08-29 Now updated and expanded *People and Nature* is a lively accessible introduction to environmental anthropology that focuses on the interactions between people culture and nature around the world Written by a respected scholar in environmental anthropology with a multi disciplinary focus that also draws from geography ecology and environmental studies Addresses new issues of importance including climate change population change the rise of the slow food and farm to table movements and consumer driven shifts in sustainability Explains key theoretical issues in the field as well as the most important research at a level appropriate for readers coming to the topic for the first time Discusses the challenges in ensuring a livable future for generations to come and explores solutions for correcting the damage already done to the environment Offers a powerful hopeful future vision for improved relations between humans and nature that embraces the idea of community needs rather than consumption wants and the importance of building trust as a foundation for a sustainable future *Multifunctional Agriculture* G. A. Wilson,2007 In a time of great agricultural and rural change the notion of multifunctionality has remained under theorized and poorly linked to the debates in the social sciences This book analyses the extent to which the proposed transition towards post productivist agriculture holds up to scientific scrutiny and proposes a new transition theory

Agricultural Innovation in Rural India: The Paradox of Farmer Nonadoption in Bajwada, Madhya Pradesh Natasha Malpani,2011-08-19 Farmer adoption of sustainable agricultural practices is key to sustainable development as changes at the farm level are essential to ensuring food security and environmental protection Reasons for converting to sustainable farming have been studied in a number of instances However the underlying rationale that motivates this behaviour is not always made clear The village of Bajwada in Madhya Pradesh is used as a case to investigate farmer perceptions and attitudes regarding sustainable farming An innovator has been promoting what seems to be a highly productive and lauded method of sustainable farming called Natu eco farming for the past five years Strikingly this technique has had practically zero adoption in the village This study aims to examine this paradox by exploring farmer narratives about sustainability futures and development Semi structured interviews were conducted using 18 farmers in Bajwada Participatory observation was also undertaken for ten days The development discourse the drive for modernity and urbanization were found to be important in shaping farmer s perspectives on Natu eco farming and sustainable agriculture An understanding of the dominance of certain discourses and narratives offers a new approach to understanding farmer adoption and non adoption The results of this study are meant to attract the attention of policymakers and practitioners who are involved in the planning and implementation of schemes and projects promoting sustainable agricultural innovation **Participatory Research and Development for Sustainable Agriculture and Natural Resource Management** Julian F. Gonsalves,2005 Intended for

aspiring and new practitioners of Participatory Research and Development PR D as well as field based researchers in developing countries Highlights that agricultural research and development has become a joint approach to deal with diverse biophysical environments multiple livelihood goals rapid changes in local and global economies and an expanded range for stakeholders over agriculture and natural resources *Management of Agricultural, Forestry, Fisheries and Rural Enterprise - Volume II* Robert J. Hudson, 2009-12-10 Management of Agricultural Forestry and Fisheries Enterprises theme is a component of Encyclopedia of Food and Agricultural Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Growing populations and expectations have placed extreme pressure on agricultural forestry and fisheries resources Sustainability of resources and resource industries will be achieved only with commitment ingenuity and cooperation at unprecedented scale The theme on Management of Agricultural Forestry and Fisheries Enterprises begins with an assessment of the organization of agricultural forestry fisheries and rural enterprises introducing community based management traditional small farms cooperatives and marketing boards collective and state enterprises and integrated global corporate systems This is followed by thorough assessments of management systems for plants livestock forests and fisheries Plant management systems are based on genetic resources water management nutrient management and agronomic systems Livestock production systems are considered from the standpoints of genetic resources range and pasture based systems landless systems and options for diversification Trends in the forest industry are revealed in terms of demand for a variety of products from forests evolving policy regimens and silvicultural developments The final topic addresses the complex issues surrounding sustainability of the world s fisheries This theme assess the evolving state of the main resource industries interpreting trends and identifying challenges and opportunities Contributors have attempted to project these developments and raise questions about their impact and role in a changing world Clearly they are part of an unfolding story of adaptation of the resource industries in an increasingly global society These two volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs **Agriculture in an Urbanizing Society Volume Two** Rob Roggema, 2016-12-14 In two volumes selected papers presented at the sixth AESOP conference on Sustainable Food Planning are brought together representing the academic work of worldwide experts in the fields of food planning and urban agriculture This volume therefore provides an overview of the latest state of the art research in the field drawing from areas such as spatial planning urban design governance social innovation entrepreneurship and local initiatives among others to represent the current knowledge base for creating sustainable urban food projects Participation and Learning Alan Reid, Bjarne Bruun Jensen, Jutta Nikel, Venka Simovska, 2007-10-12 The Research in Participatory Education Network RIPEN was initiated by the Research Programme for Environmental and Health Education at the Danish School of Education University of Aarhus in 2003 It embraces a broad

spectrum of researchers scholars students and practitioners of participatory education working in or from Europe North America Africa and Australasia Given the international scope of the network and the range of interests it now has as initiators and early participants in the network the editorial team invited RIPEN to discuss what a critical perspective on participatory approaches to education might mean for education and the environment health and sustainability and how network members might research and substantiate their claims and arguments Following the introductory chapter on the scope of this collection 19 chapters illustrate the contributors responses to that invitation Our focus on critical perspectives was prompted by earlier work by Majid Rahnema in Wolfgang Sachs s 1992 Development Dictionary Critiquing concepts of participation in a volume that set out to stimulate cultural historical and anthropological debate on the key concepts of development Rahnema p 126 wrote Participation which is also a form of intervention is too serious and ambivalent a matter to be taken lightly or reduced to an amoeba word lacking any precise meaning or a slogan or fetish or for that matter only an instrument or methodology

Self-Sufficient Agriculture Robert Tripp, 2012-04-27 Low external input technology or LEIT is an increasingly prominent subject in discussions of sustainable agriculture There are growing calls for self sufficient agriculture in an era experiencing diminishing returns from reliance upon expensive synthetic pesticides and fertilizers There are many reasons to support strategies for low external input farming including a concern for environmental sustainability increased attention to resource poor farmers and marginal environments and the conviction that a better use of local resources in small scale agriculture can improve farm productivity and innovation But despite the increased attention to self sufficient agriculture there is little evidence available on the performance and impact of LEIT This book examines the contributions and limitations of low external input technology for addressing the needs of resource poor farmers For the first time a balanced analysis of LEIT is provided offering in depth case studies an analysis of the debates an extensive review of the literature and practical suggestions about the management and integration of low external input agriculture in rural development programmes

Research in Organic Farming Raumjit Nokkoul, 2011-12-16 This book has emerged as a consequence of the difficulties we experienced in finding information when we first started researching The goal was to produce a book where as many existing studies as possible could be presented in a single volume making it easy for the reader to compare methods results and conclusions As a result studies from countries such as Thailand Spain Sweden Lithuania Czech Mexico etc have been brought together as individual chapters and references to studies from other countries have been included in the overview chapters where possible We believe that this opportunity to compare results from different countries will open a new perspective on the subject allowing the typical characteristics of Organic Agriculture and Organic Food to be seen more clearly Finally we would like to thank the contributing authors and the staff at InTech for their efforts and cooperation during the course of publication I sincerely hope that this book will help researchers and students all over the world to reach new results in the field of Organic Agriculture and Organic Food

The World of Agricultural

Economics Carin Martiin,2013-04-12 This textbook takes a truly international approach towards agricultural economics uniting many different perspectives on the subject and providing insight into agriculture in general and into how practical farming works in particular The book is laced throughout with real world examples and other pedagogical features Topics covered are wide ranging and include world food production and population the food chain and food safety non foods derived from farming land and soil issues arable and animal production and management at farm level The World of Agricultural Economics an introduction is primarily an introductory textbook for students in agricultural economics agronomy and adjacent fields However its accessible approach means that it is also suitable for readers without any previous knowledge in the field who are seeking an introduction to agriculture

Urban Agriculture Craig Pearson,2011-05-17 Most of us live in cities These are becoming increasingly complex and removed from broad scale agriculture Yet within cities there are many examples of greenspaces and local food production that bring multiple benefits that often go unnoticed This book presents a collection of the latest thinking on the multiple dimensions of sustainable greenspace and food production within cities It describes the diversity of urban agriculture and seeks a balanced representation between the biophysical and the social It deals with urban agriculture across scales from indoor plants to farm scale filtration of greywater A range of examples and initiatives from both developed and developing countries is described and evaluated

Water Ethics David Groenfeldt,2013-10-01 This book introduces the idea that ethics are an intrinsic dimension of any water policy program or practice and that understanding what ethics are being acted out in water policies is fundamental to an understanding of water resource management Thus in controversies or conflicts over water resource allocation and use an examination of ethics can help clarify the positions of conflicting parties as preparation for constructive negotiations The author shows the benefits of exposing tacit values and motivations and subjecting these to explicit public scrutiny where the values themselves can be debated The aim of such a process is to create the proverbial level playing field where values favoring environmental sustainability are considered in relation to values favoring short term exploitation for quick economic stimulus the current problem or quick protection from water disasters through infrastructure which science suggests is not sustainable The book shows how new technologies such as drip irrigation or governance structures such as river basin organizations are neither good nor bad in their own right but can serve a range of interests which are guided by ethics A new ethic of coexistence and synergies with nature is possible but ultimately depends not on science law or finances but on the values we choose to adopt The book includes a wide range of case studies from countries including Australia India Philippines South Africa and USA These cover various contexts including water for agriculture urban domestic and industrial use the rights of indigenous people and river watershed and ecosystem management

The Pesticide Detox Jules N. Pretty, 2012-07-26 Since the 1960s the world's population has more than doubled and agricultural production per person has increased by a third Yet this growth in production has masked enormous hidden costs arising from widespread pesticide use massive ecological damage and high incidences of farmer poisoning and chronic health effects Whereas once the risks involved with pesticide use were judged to be outweighed by the potential benefits increasingly the external costs of pesticides to environments and human health are being seen as unacceptable In response to this trend recent years have seen millions of farmers in communities around the world reduce their use of harmful pesticides and develop cheaper and safer alternatives The Pesticide Detox explores the potential for the phasing out of hazardous pesticides and the phasing in of cost effective alternatives already available on the market This book makes clear that it is time to start the pesticide detox and to move towards a more sustainable agriculture
