Aids A Problem For Sociological Research:

AIDS Michael Pollak, Geneviève Paicheler, Janine Pierret, 1992 Published in cooperation with the International Sociological Association A timely and important volume AIDS provides an overview of social science research approaches theories and methodologies in the field of AIDS research Drawing on international and interdisciplinary work in the social sciences this volume covers such topics as the shaping of social representations of AIDS public attitudes towards AIDS theoretical problems specific to AIDS management the development of preventive policies the organization of self help services and changes in sexual behavior and research into sexuality Anyone concerned with the social cultural and political analysis of AIDS will want to add this significant volume to their collection The book is well written and very readable It is a welcome addition to the growing literature on AIDS and society It is excellent for introducing sociology of health and illness to undergraduate students in sociology as well as medicine social work or nursing studies As an overview of current sociological research it is also a useful introduction for researchers The book highlights issues such as the limitations of medical science issues of power stigma stereotypes cultural differences between nations and different groups in society to name but a few It is the kind of book I would personally recommend to policy makers Having read this book I feel that Pollak's death is a sad loss to the international sociological community Sociology of Health and Illness *The Social Construction of AIDS Issues* Suiming Pan, 2022-01-07 This book explores AIDS from a relatively macro perspective rather than concrete operational methods and focuses on the social construction of AIDS issues instead of its transmission level in the context of China First it begins with the theoretical analysis and the social significance of AIDS which is different from the simple conflict between different schools of thought Second it analyses the contest of various social powers in the process of AIDS construction and conclusion rather than making different explanations of policies Last but not least it elaborates on the central proposition i.e. the AIDS issue is a symbol of China's social restructuring process Only in an effort to advance such a process can we be more likely to find the best problem solving mode rather than clamouring repeatedly or giving countermeasures alone A Sociological Study on Emotion Regulation in People Living with HIV/AIDS in China Rongting Hou, 2021-06-23 This book explores the experiences and emotional expression of 30 people Living with HIV AIDS PLWHA using qualitative research methods such as illness narratives and analyzes the dilemmas of sicknesses of the society including Acquired Needs Deficiency Syndrome Acquired Expectation Insufficiency Syndrome and Acquired Punishment Syndrome at the micro meso and macro levels so as to investigate higher intensity negative emotions In turn the book draws on the perspectives of conflict and game structure and function and system and interaction in order to propose a dynamic mechanism of emotion and expression and argues that these negative emotions can be transformed strengthened and presented through defense mechanisms such as suppression and attribution which will influence social institutions at the micro meso and macro levels and even possibly bring about positive changes in the social structure AIDS in Europe Peter

Aggleton, Jean Paul Moatti, Annick Prieur, Theo Sandfort, Yves Souteyrand, 2002-09-09 Major changes in the nature and dynamics of the AIDS epidemic over the last few years are reflected in changing epidemiological trends as well as in the progress made in biomedical research and treatment AIDS in Europe brings together papers from leading social science researchers to look at the opportunities and challenges these changes bring and the different ways in which they are being responded to in both western and eastern Europe Papers are organised under three headings new challenges for HIV prevention care of people living with HIV AIDS in a new therapeutic context AIDS public policies from specialisation to normalisation AIDS in Europe provides a comprehensive overview of current social and behavioural research on HIV and AIDS for all health professionals Methodological Issues in AIDS Behavioral Research David G. Ostrow, Ronald C.

Kessler, 1993-10-31 We are pleased to introduce a new series Aids Prevention and Mental Health with the publication of this volume on methodology issues in AIDS mental health research The objective of the series is to publish high quality and up to date volumes that HIV prevention and mental health researchers clinicians policymakers and educators will find useful and that will thus contribute significantly to their work in these important areas *AIDS Bibliography*, 1994 **AIDS**, 1992

Deviance and Social Control: A Sociological Perspective Michelle Inderbitzin, Kristin A. Bates, Randy R. Gainey, 2013 A target blank href <http://www.sagepub.com/inderbitzin>  Stigma and Social Exclusion in Healthcare Caroline Carlisle, Tom Mason, Caroline Watkins, Elizabeth Whitehead, 2005-08-19 Whilst those in healthcare might like to think that they work to reduce stigma and social exclusion of others this book reveals many strategies by which healthcare professionals contribute to increasing these conditions Written by practitioners some of whom have themselves been stigmatised the book exposes the hidden processes of prejudice and the dogma of ideology that permeate contemporary healthcare Engaging with the realities of stigma through a grassroots approach topics covered include hearing sight sexuality HIV and AIDS drug use teenage pregnancy breastfeeding old age Stigma and Social Exclusion in Healthcare provides practical solutions to problems recommendations for training and a blueprint for the future It will prove a valuable reference for all those wanting to deal with the issues of stigmatisation

HIV/AIDS and the Social Consequences of Untamed Biomedicine Graham Fordham, 2014-11-13 Drawing on the case of HIV AIDS in Thailand this book examines how anthropological and other interpretative social science research has been utilized in modeling the AIDS epidemic and in the design and implementation of interventions It argues that much social science research has been complicit with the forces that generated the epidemic and with the social control agendas of the state and that as such it has increased the weight of structural violence bearing upon the afflicted The book also

questions claims of Thai AIDS control success arguing that these can only be made at the cost of excluding categories such as intravenous drug users the incarcerated and homosexuals who continue to experience extraordinarily high levels of levels of HIV infection Considered deviant and undeserving these persons have deliberately been excluded from harm reduction programs Overall this work argues for the untapped potential of anthropological research in the health field a confident anthropology rooted in ethnography and a critical reflexivity Crucially it argues that in context of interdisciplinary collaborations anthropological research must refuse relegation to the status of an adjunct discipline and must be free epistemologically and methodologically from the universalizing assumptions and practices of biomedicine *Social Research Methods* Alan Bryman, 2012-01-19 Now in its fourth edition this market leading textbook continues to provide students with an excellent explanation and demonstration of the main theories and techniques in social research methods

Social Research Methodology Avdhesh Jha, 2023-12-01 This book provides unrivalled coverage of both quantitative and qualitative research methods making it invaluable for anyone embarking on social research Divided into five parts sections it introduces tools techniques critical aspects and knowledge of conducting social research which include a detailed discussion about the basics of social research social research problem review of literature hypothesis sampling research design tools of research statistics and report writing The volume helps acquire knowledge develop an understanding apply the concepts in social research and curate checklists and rating scales designed to evaluate the statement of a problem research proposal hypothesis different methods of research and writing research reports It also includes a brief discussion about statistics the style of reporting and the criteria for evaluating social research This book will be a helpful reference text for graduates postgraduates doctoral scholars and all those interested in societal development It would also be useful to students researchers and teachers of the various social sciences disciplines like psychology sociology education social work and other allied subjects It would be an invaluable companion to professionals and data scientists working in the field of analytics

AIDS as a Gender Issue Lydia Bennett, Catherine Hankins, Lorraine Sherr, 2013-10-15 This international collection examines a wide range of psycho social aspects of AIDS and HIV infection including prevention education healthcare and policy in terms of gender challenges **Social Networks, Drug Abuse, and HIV Transmission**, 1995 *Doing Social Research: A Source Book For Preparing Dissertation* Dr. D.K. Lal Das, 2008-04 The book *Doing Social Research A Source Book for Preparing Dissertation* meets the long felt need of a comprehensive and up to date book on preparing dissertation The book provides for the basics of social research and highlights the intricacies of various stages of preparation of dissertation for a post graduate and doctoral degree The focus of the book is on operational aspects of dissertation The book answers well to the related questions to meet the quality of a dissertation at length the following questions about Doing Social Research How to select a research Problem How to identify objectives of the study How to formulate hypothesis How to select a sample How to construct a research instrument How to process data How to analyse data How to write a research

report **Challenge & Innovation** Mary Boulton, 2013-07-23 First published in 1994 This volume arises largely out of a meeting with the same title as part of efforts to disseminate the work of its AIDS Initiative The meeting brought together over forty British European and American researchers in the social and behavioural sciences as well as those involved in policy planning and evaluation to discuss methodological aspects of social research in relation to HIV AIDS Of relevance to those seeking insight into the contribution that social research can make to the epidemic this book is essential reading for all concerned with the social dimensions of health **Fundamentals of Social Research Methods** Claire Bless, Craig Higson-Smith, 2000 **Methodological Issues in Applied Social Psychology** Fred B. Bryant, John Edwards, R. Scott Tindale, Emil J. Posavac, Linda Heath, Eaaron Henderson-King, Yolanda Suarez-Balcazar, 2013-11-11 Many authors have argued that applying social psychology to the solution of real world problems builds better theories Observers have claimed for example that of human behavior applied social psychology reveals more accurate principles because its data are based on people in real life circumstances Helmreich 1975 Saxe Leventhal 1980 and discloses important gaps in existing theories Fisher 1982 Mayo LaFrance 1980 Undoubtedly many concrete examples can be mustered in support of these claims But it also can be argued that applying social psychology to social issues and problems builds better research methods Special methodological problems arise and new perspectives on old methodological problems emerge when researchers leave the laboratory and tackle social problems in real world settings Along the way we not only improve existing research techniques but also develop new research tools all of which enhance our ability to obtain valid results and thereby to understand and solve socially relevant problems Indeed Campbell and Stanley's 1966 seminal work on validity in research design grew out of the application of social science in field settings In this spirit the principal aim of this volume is to present examples of methodological advances being made as researchers apply social psychology in real life settings Social Problems Anna Leon-Guerrero, 2010-09-16 With an engaging writing style that has made it a popular choice at both 2 and 4 year schools the Third Edition of Anna Leon Guerrero's Social Problems textbook clearly presents contemporary social problems and addresses their consequences while emphasizing community involvement by both individuals and groups to achieve real solutions With an overarching focus on social inequalities this proven text provides a platform for discussion that encourages critical thinking through compelling illustrations boxed features learning checks discussion questions and online learning tools all designed to inspire hope rather than simply present a disheartening parade of maladies **AIDS: Rights, Risk and Reason** Peter Aggleton, Peter Davies, Graham Hart, 2004-01-14 Based on articles chosen from the sixth annual Social Aspects of AIDS conference this book focuses on up to date accounts of HIV AIDS research and associated social sexual issues
