Neglected Diseases Paul Hunt, Rébecca Steward, Judith Bueno de Mesquita, Lisa Oldring, 2007 In recent years there has been a growing interest in neglected diseases as a public health issue However there has been less attention given to the links between neglected diseases and human rights Neglected diseases are more likely to occur where human rights such as the rights to health education and housing are not guaranteed Neglected diseases also often result in violations of human rights and fundamental freedoms including equality and non discrimination This review authored by the United Nations Special Rapporteur on the right of everyone to the enjoyment of the highest attainable standard of physical and mental health aims to introduce and explore some of these connections Addressing the human rights issues that cause or are a consequence of neglected diseases has an important role to play in helping to prevent and treat these diseases as well as in ensuring the dignity and well being of those afflicted This report aims to equip practitioners with an understanding of human rights how human rights abuses cause and result from neglected diseases and it signals how a human rights approach can contribute to the fight against neglected diseases

Global Lessons from the AIDS Pandemic Bradly J. Condon, Tapen Sinha, 2008-07-22 We began to research for this book in 2000 with the idea that we might contribute to the search for solutions to the global HIV AIDS pandemic by combining perspectives from different disciplines Much has happened in the intervening years First the severity of the HIV AIDS pandemic in sub Saharan Africa and the threat it posed for many other regions of the world led to a movement among several countries to correct the imbalance between producers and users of pharmaceutical products This effort produced a clarification of the right of governments to produce generic medicine under compulsory licenses and an amendment of the World Trade Organization's TRIPS Agreement to allow exports of generic medicines from one WTO Member to another In 2007 the amended rules were put into practice with Canada authorizing the export of generic antiretroviral drugs to Rwanda However at the same time global patent laws have been undermined due to regulatory capture most notably in free trade agreements and through political pressure on countries like Thailand to not to exercise their right to issue compulsory licenses for pharmaceutical products Second the amount of money available for the treatment and prevention of HIV AIDS has increased dramatically with the establishment of the World Bank Multi Country HIV AIDS Program for Africa MAP the Global Fund to Fight AIDS Tuberculosis and Malaria and the US President's Emergency Plan for AIDS Relief PEPFAR among other funding initiatives

Disability & International Development Malcolm MacLachlan, Leslie Swartz, 2009-07-21 One of the greatest challenges facing modern global health is how to include the most marginalized and impoverished people in international efforts to promote social and

Politics in the Corridor of Dying Jennifer Chan, 2015-03 Drawing on more than one hundred interviews conducted across eighteen countries the author documents the emergence of a diverse range of community based nongovernmental and civil society groups engaged in patient focused AIDS advocacy worldwide She also critically evaluates the evolving role of these groups in challenging authoritative global health governance schemes put in place by what she describes as overcontrolling or sanctimonious governments scientists religious figures journalists educators and corporations From publisher description
