Aggression And Peacefulness In Humans And Other Primates:

Aggression and Peacefulness in Humans and Other Primates James Silverberg, J. Patrick Gray, 1992-03-19 This book explores the role of aggression in primate social systems and its implications for human behavior. Many people look to primate studies to see if and how we might be able to predict violent behavior in humans or ultimately to control war. Of particular interest in the study of primate aggression are questions such as how do primates use aggression to maintain social organization, what are the costs of aggression, why do some primates avoid aggressive behavior altogether. Students and researchers in primatology, behavioral biology, anthropology, and psychology will read with interest as the editors and contributors to this book address these and other basic research questions about aggression. They bring new information to the topic as well as an integrated view of aggression that combines important evolutionary considerations with developmental, sociological, and cultural perspectives. *Ethnic Conflict and Indoctrination* Irenäus Eibl-Eibesfeldt, Frank K. Salter, 1998 Violent ethno nationalist conflicts continue to mar the history of the current century yet no satisfactory answer to the question of why humans are susceptible to indoctrination by ideologies that lead to inter group hostility has so far been found. In this volume an international team of leading scientists from many different fields approach this complex issue from a biological perspective treating indoctrinability as a predisposition that has its roots in humanity's evolutionary past.

Indoctrinability, Ideology, and Warfare Irenäus Eibl-Eibesfeldt, Frank K. Salter, 1998 Violent ethno nationalist conflicts continue to mar the history of the twentieth century yet no satisfactory answer as to why humans are susceptible to indoctrination by ideologies leading to inter group hostility has thus far been found. This volume brings together an international team of leading scientists to address this complex issue from disciplines as diverse as anthropology, psychology, psychobiology, sociology, philosophy, ethology, sociology, and political science. Treating the processes of indoctrination as a biological phenomenon with physiological and psychological aspects, these essays explore the answers to this pressing question in humanity's evolutionary past. *Keeping the Peace* Graham Kemp, Douglas P. Fry, 2004-11-23 This collection of ethnographies discusses how non violent values and conflict resolution strategies can help to create and maintain peace.

Toward a Theory of Peace Randall Caroline Watson Forsberg, 2019-12-15 Military analyst, peace activist, teacher, and social theorist Randall Caroline Watson Forsberg 1943-2007 founded the Nuclear Freeze campaign and the Institute for Defense and Disarmament Studies. In *Toward a Theory of Peace* completed in 1997 and published for the first time here, she delves into a vast literature in psychology, anthropology, archeology, sociology, and history to examine the ways in which changing moral beliefs came to stigmatize forms of socially sanctioned violence such as human sacrifice, cannibalism, and slavery, eventually rendering them unacceptable. Could the same process work for war? Edited and with an introduction by political scientists Matthew Evangelista, Cornell University, and Neta C. Crawford, Boston University, both of whom worked with Forsberg. **Great Ape Societies** William C. McGrew, Linda F. Marchant, Toshisada Nishida, 1996-07-28 The great apes

chimpanzees bonobos gorillas and orangutans are our closest living relatives sharing a common ancestor only five million years ago We also share key features such as high intelligence omnivorous diets prolonged child rearing and rich social lives The great apes show a surprising diversity of adaptations particularly in social life ranging from the solitary life of orangutans through patriarchy in gorillas to complex but different social organisations in bonobos and chimpanzees As great apes are so close to humans comparisons yield essential knowledge for modelling human evolutionary origins Great Ape Societies provides comprehensive up to date syntheses of work on all four species drawing on decades of international field work zoo and laboratory studies It will be essential reading for students and researchers in primatology anthropology psychology and human evolution

In his Preface to the 1st edition, Editor in Chief Lester Kurtz wrote: "The problem of violence poses such a monumental challenge at the end of the 20th century that it is surprising we have addressed it so inadequately. We have not made much progress in learning how to cooperate with one another more effectively or how to conduct our conflicts more peacefully. Instead, we have increased the lethality of our combat through revolutions in weapons technology and military training. The Encyclopedia of Violence, Peace, and Conflict is designed to help us to take stock of our knowledge concerning these crucial phenomena. Ten years on, the need for an authoritative and cross-disciplinary approach to the great issues of violence and peace seems greater than ever. More than 200 authoritative multidisciplinary articles in a 3-volume set. Many brand new articles alongside revised and updated content from the First Edition. Article outline and glossary of key terms at the beginning of each article. Entries arranged alphabetically for easy access. Articles written by more than 200 eminent contributors from around the world."

humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon com **Masculinities, Violence and**

Fry, 2006 In The Human Potential for Peace An Anthropological Challenge to Assumptions about War and Violence renowned anthropologist Douglas P Fry shows how anthropology with its expansive time frame and comparative orientation can provide unique insights into the nature of war and the potential for peace Challenging the traditional view that humans are by nature primarily violent and warlike Professor Fry argues that along with the capacity for aggression humans also possess a strong ability to prevent limit and resolve conflicts without violence He draws on data from cultural anthropology archaeology and sociology as well as from behavioral ecology and evolutionary biology to construct a biosocial argument that challenges a host of commonly held assumptions
