Coming of Age in Films Mario Garrett,2019-02-14 The story of films is the story of human development From the very first story that defined the birth of our civilization the Sumerian Epic of Gilgamesh a story of immortality aging and death comes a tale of why we age We are a species of storytellers The stories we tell to each other define who we are However since we are living in a world marked by age apartheid our interaction with people across different generations is becoming more limited As a result the information we gain about older people comes mostly from secondary sources For the general public films remain the most accessible form of information regarding getting older From the early exposure of cartoons to more elaborate dramas our knowledge of what it means to become old relies on our exposure to films This volume provides insight into how accurate these representations are in line with current knowledge that we have about aging and older adults Arguing that films present a simplified view of aging this analysis relies on scientific evidence to explore why and how such stereotypes affect us Stereotypes have the ability of being internalized and becoming prescriptive of our behavior Numerous studies have attempted different ways of understanding the impact films have on aging Theories as seemingly disparate as feminism and disability have contributed to our understanding of how stereotypes influence our aging process This text builds upon this knowledge and provides new insights by applying current gerontological knowledge the science of aging to unpack and analyze the images of aging that films are providing By readdressing this focus on gerontological theories as diverse as biology and psychology the book readdresses an overlooked approach

Reflections on Old Age Cornelius F. Murphy Jr.,2015-04-07 The English writer

E M Forster described old age as a seductive combination of increased wisdom and decaying powers to which too little intelligence is devoted This book is a response to that criticism It explains how old age has been considered throughout the ages by philosophers poets and other literary figures and explores how the extraordinary increase of life expectancy that began in the last century has been sustained by science and medicine Unfortunately the general public still prefers to keep the elderly out of sight and especially out of mind To overcome this marginalization I call for the emergence of a more inclusive humanism one that is welcoming to persons of all ages To overcome the pervasive isolation of the elderly requires a new dialogue across all the living generations Echoing the sentiments of Cicero in his classic study of old age I also call for a reflective maturity to develop among the elderly one that reaches deeply into themselves and increases their understanding of the world around them Spiritual maturity demands growth in virtue and charity in the advance of years A reaching out to all in the pursuit of justice and the common good is strongly recommended The book concludes with some reflections upon hopes for personal immortality as well as the qualities of divine justice and mercy
