Agrarian Impasse In Bengal Institutional Constraints To Technological Change:

Agrarian Impasse in Bengal James K. Boyce, 1987 This is an investigation into the reasons for the poverty of this region which was once noted for its agricultural abundance The author examines the agricultural performance since 1949 and the current state of management and concludes that the agrarian structure is both unfair and inefficient **Institutional Choice In Irrigation: A Case Study Of Distribution In A Common Area In Kerala** N. Neetha, 2010 **Delivering on the Promise of Pro-poor Growth** Timothy Besley, Louise Cord, 2007 Economic growth is the most important determinant of poverty reduction But countries with similar rates of growth can experience different poverty reduction rates **Successes in Anti-poverty** Michael Lipton, Shahin Yaqub, Eliane Darbellay, 1998 This book explores successful efforts to alleviate poverty and asks whether any of the features of these policies or projects can be imported into environments where poverty has not yet declined significantly **Relevance of Environment** Narottam Gaan, 2005 This book attempts at cosmic whole approach challenging the established international relation theories based upon a Newtonian and Cartesian world view from an ecological perspective The realist liberal critical and post modern theories have been critically examined in their materialist premises with much of the inputs from the ecological insight eastern philosophy and the new paradigm thinking in the field of science *The Famine of 1896-1897 in Bengal* Malabika Chakrabarti, 2004 This book is a focussed treatment of a famine both as an event and a process It is a close up of a peasant economy in the throes of a crisis which temporarily eroded the value system determining the normal pattern of entitlements An investigation of the socio economic ecological and cultural determinants of the famine helps evolve a coherent framework The emphasis is on the distinctive problems of the various economic regions most notably the tribal belts Chakrabarti applies Amartya Sen's theory of exchange entitlements to a nineteenth century famine situation in Bengal and finds that a market based entitlement failure precipitating severe famine conditions even without receiving any impulse from food production has little relevance here Though the book underlines the predicament of the subalterns the famine is not seen from the viewpoint of any specific group or community The focus is rather on the phenomenon of famine in its totality on the agony and trauma of a peasant society thrown out of gear in an abnormal situation and the crisis of identities that ensued **Blueprint for a Sustainable Economy** David William Pearce, Edward Barbier, 2000 First Published in 2000 Routledge is an imprint of Taylor Francis an informal company Contested Grounds Daniel Deudney, Richard Anthony Matthew, 1999-01-01 Presents diverse views on the relationship between environmental politics and international security **Analytical Issues in Trade, Development and Finance** Ambar Nath Ghosh, Asim K. Karmakar, 2014-07-08 The book's 30 chapters are divided into three sections international trade economic development macroeconomics and finance and focus on the frontier issues in each Section I addresses analytical issues relating to trade environment linkage capital accumulation for pollution abatement possibility of technology diffusion by multinational corporations nature of innovation inducing tariff protection effects of import restriction

and child labour the links between exchange rate direction of trade and financial crisis the implications for India and global economic crisis financial institutions and global capital flows and balance of payments imbalances Section II consists of discussions on the causes of widespread poverty persisting in South Asia development dividend associated with peace in South Asia issues of well being and human development implications for endogenous growth through human capital accumulation on environmental quality and taxation the rationale for a labour supply schedule for the poor switching as an investment strategy the role of government and strategic interaction in the presence of information asymmetry government's role in controlling food inflation inter state variations in levels and growth of industry in India structural breaks in India's service sector development and the phenomenon of wasted votes in India's parliamentary elections Section III deals with the effectiveness of monetary policy in tackling economic crisis the effective demand model of corporate leverages and recession the empirical link between stock market development and economic growth in cross country experience in Asia an empirical verification of the McKinnon Shaw hypothesis for financial development in India the dynamics of the behaviour of the Indian stock market efficiency of non life insurance companies econometric study of the causal linkage between FDI and current account balance in India and the implications of contagious crises for the Indian economy

Economic Integration and Development in Africa Henry Kyambalesa, Mathurin C. Hounnikpo, 2016-04-29 The debates over what African economic integration and development actually entails continue across international economic organizations national governments and NGOs Despite the glare of media attention and the position this issue has on international political agendas few comprehensive accounts exist that fully examine why this process will be inevitable in the 21st century and how integration of national economies can be attuned to attaining the socio economic goals and aspirations of member countries This book addresses this problem It combines theory with application enumerating the imperatives and initiatives governments will be forced to confront providing insights for educators and students in African development for policy makers in African governments and for inter governmental organizations

Population and Land Use in Developing Countries National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population, 1993-02-01 This valuable book summarizes recent research by experts from both the natural and social sciences on the effects of population growth on land use It is a useful introduction to a field in which little quantitative research has been conducted and in which there is a great deal of public controversy The book includes case studies of African Asian and Latin American countries that demonstrate the varied effects of population growth on land use Several general chapters address the following timely questions What is meant by land use change Why are ecological research and population studies so different What are the implications for sustainable growth in agricultural production Although much work remains to be done in quantifying the causal connections between demographic and land use changes this book provides important insights into those connections and it should stimulate more work in this area
