King,2003     **Agricultural Statistics** ,2000     *Empty Pastures* Terence J. Centner,2010-10-01

Over the past century American agriculture has shifted dramatically with small commercial farms finding it increasingly difficult to compete with large scale mostly indoor animal feeding operations AFOs In this book Terence J Centner investigates the environmental social economic and political impact of the rise of the so called factory farm exposing the ramifications of the contemporary trend toward industrial scale food production Just as Rachel Carson s landmark *Silent Spring* used the disappearance of songbirds as a jumping off point for a work that raised public awareness of pesticides devastating environmental impact *Empty Pastures* sees the dwindling numbers of livestock in the American countryside as a symptom of a broader transformation one with serious consequences for the rural landscape and its inhabitants animal as well as human After outlining the rise of the AFO Centner examines the troubling consequences of consolidation in animal farming and suggests a number of remedies The issues he tackles include groundwater contamination the loss of biodiversity animal welfare concentrated odors and other nuisances soil erosion and the economic effects of the disappearance of the small family farm Inspired by largely abandoned traditional practices rather than a radical and unrealistic vision of a return to an idealized past Centner proposes a series of pragmatic reforms for regulating factory farms to halt ecological degradation and revitalize rural communities     **Statistical Abstract of the United States** ,2001     **Rangeland**
