EURO-QUAL Bastiaan J. Nijio,A. Stenvik,R. S. Ireland,1999 The benefits for the professional working within a quality culture are manifold

but even more important the patient is the final arbiter of quality care Therefore patient centred aspects of treatment are focused upon in this manual A quality manual intended for European use has to respect the national regulations and European diversity and therefore needs to be flexible The EOQM has been structured according to the treatment of the individual patient which is what all professionals have in common and which also is the most important target for quality improvement in orthodontic practice The EOQM is primarily designed as a stimulus for the orthodontic professional to assess and improve the quality of orthodontic care A Quality Improvement System QIS provides support for starting and maintaining activities The manual provides tools to systematically assess and develop quality related actions at individual patient treatment level and practice level A systematic and comprehensive description of the treatment process is essential in order to provide a basis for establishing a QIS Implementing a QIS will influence the provision of orthodontic care by Demonstrating the potentials for development of the organisational elements of orthodontics Planning and integrating systematic activities to monitor and improve treatment at the practice level and the patient related level Orthodontic treatment process is the central element in this manual The route taken by an individual patient is described step by step Flowcharts describe the orthodontic treatment of the individual patient step by step Guidelines indicate what the professional should do at the various steps in order to follow the generally accepted objectives of orthodontics as described in the policy statements Indicators are tools to measure the effectiveness and efficiency of treatment The indicators provide the professional with facts about own performance The EOQM provides the orthodontic professional with a model for incorporating quality improvement into daily practice which is based on European orthodontic consensus and current principles of quality in health care It can be incorporated in the quality initiatives that are already being developed nationally and vice versa

Economic Aspects of AIDS and HIV Infection Detlef Schwefel,Reiner Leidl,Joan Rovira,Michael F. Drummond,2012-12-06 From the early days of its recognized occurrence AIDS has been perceived as posing tremendous threats burdens and challenges to human beings Individuals societies and in a global point of view mankind are affected by the effects of the HN infection the nature and extent of which is still unclear in many ways In the beginning only biomedical and epidemiological analyses of the problem were the top research priori ties the former laden with great hopes that it may soon be possible to stop the spread of the disease and to overcome its physical impact Yet it soon became clear that AIDS would be something to be reckoned and coped with on a long term basis making a thorough investigation of its impact absolutely mandatory AIDS has serious economic consequences Taken seriously they can not be confined to predictions of costs intended to support the AIDS issue in the struggle for resources Besides cost calculations a method ologically tricky and wide ranging topic in itself and their application to cost effectiveness and other analyses economic issues include identifying and assessing patterns of care analyzing problems of financing exploring impacts on markets other than health care and modelling scenarios for future developments and strategies At present the economic aspects of AIDS still constitute a very

recent topic in European health economics and health systems research Many projects are just about to start and there must be a better exchange of information between research groups

Drug Metabolism N. J. Gooderham, 1998 With its roots in the last century and currently exploiting the technology of today the science of drug metabolism has made significant contributions to our understanding of chemico biological interactions This book reviews past successes and failures within the science and attempts to predict new directions Each of the chapters of this book deals with an aspect of xenobiotic metabolism which has featured prominently in the development of the discipline The volume is testimony to the breadth and depth of research into xenobiotic metabolism and covers the chemistry and enzymology of xenobiotic metabolism enzyme modeling and structure activity relationships pharmacokinetics the use of recombinant gene technology site directed mutagenesis transgenic and gene knockout models new analytical techniques including capillary electrophoresis mass spectrometry accelerator mass spectrometry high throughput analysis toxicological assessment pharmacogenetics drug development and therapeutics With new chemical entities constantly emerging and requiring evaluation the concepts and techniques developed in this book will help focus future lines of investigation and help set priorities in the next millennium

EURO-QUAL Gea Heege, 1997 The three keywords Orthodontics Europe and Quality represent the important issues in this book describing the EURO QUAL BIOMED 1 Programme In this Programme individuals and representatives of institutions have been asked to contribute to the discussion on the development of a quality system for orthodontic care The philosophy of Total Quality Management was adopted and specific emphasis was given to patient quality When considering how the structure and quality of European orthodontic care continuously can be improved there are certain conditions which are difficult to modify From the start this has been realised and respected and therefore the guidelines for the quality are flexible and can be adapted to different conditions Available knowledge has been bundled and an attempt has been made to understand the reality of orthodontic care in Europe the product and the process
