Sexual Behaviour and AIDS in India Moni Nag, 1996. **Sexuality, Sexual Behaviour and Reproductive Health** R.K. Mutatkar, Aarti Nagarkar, 2019-01-01. This book on Sexuality, Sexual Behaviour and Reproductive Health documents the research studies undertaken by Ford Foundation small grant awardees under the capacity development programme for social science research on these areas in the context of risk of pandemic of HIV/AIDS. The book presents eighteen field based studies classified in three sections: Sexuality and Sexual Behaviour, Gender and Sexuality, and Reproductive Health. Besides emphasis

is given on studies about adolescent sex behaviour in tribal rural and urban centres visitors and migrants to urban centres risky sexual behaviour life of traditional female sex workers and those residing in the brothels Range of awareness and practices to prevent sexually transmitted morbidity has been documented Reproductive practices of urban high caste reference groups have been studied In contrast the concepts and practices of tribal youth who are believed to be following the natural instincts with better gender equality have been presented Probably the reproductive health issues of brothel based sex workers have been studied first time The book presents field based data from Maharashtra Gujrat and Rajasthan The book could be used for undertaking similar studies elsewhere The studies on plurality and diversity of sexually related issues would provide insights for policy planning and implementation to prevent sexual morbidities *Sexual Behaviour and Health in Older Adults* Lee Smith,Igor Grabovac,2023-02-06 This book provides a comprehensive overview for those interested in research and promoting sexual health in older people as well as a go to guide on the topic of sexual behaviour in older adults Sexual activity is an essential part of intimate relationships though it tends to decline in frequency as people grow older Nevertheless for many older people sex still remains an important part of their life There s a common misconception that as people age they lose their interest in sex and capacity for sexual behaviour This is not the case as a number of national surveys show The new research presented here indicates that the less sex older people have the more likely they are to experience mental and physical health problems Men and women who reported a decrease in the frequency of sexual activities were also more likely to report a deterioration in self perceived health Additionally men with erectile dysfunction were also more likely to be diagnosed with cancer or coronary heart disease This research has also determined that older adults who experience a decline in sexual activity report poorer well being than those who maintain their levels of sexual desire activity and function in later life and that men who remain sexually active in later life continue to have better cognitive performance compared to those who don t Despite these health benefits medical professionals do little to promote sexual activity in older adults and the literature suggests that there is a lack of knowledge on how to approach the subject and how to promote such activities This is the first comprehensive book specifically exploring all areas of sexual behaviour and health in older adults and drawing on the latest research in this area It offers a valuable resource for researchers and clinicians in various health fields medicine nursing occupational therapy psychology public health etc as well as students in undergraduate and graduate programs
