Bureau of the Budget, 1962 **Sovereignty and Jurisdiction in Airspace and Outer Space** Gbenga Oduntan, 2011-09-12 Sovereignty and jurisdiction are legal doctrines of a complex nature which have been subject to differing interpretations by scholars in legal literature The tridimensionality of state territory recognised under customary international law subsists until the present but there are other territories that do not or cannot belong to any state or political entity which also must be accounted for in legal theory The issues surrounding sovereignty and jurisdiction are likely to become ever more pressing as globalisation growing pressure on resources and the need for energy and national security become acute and the resolution of special delimitation disputes seems likely to become a vital question in the twenty first century As a result of the fast pace of technological developments in air and space activities and the massive increases in air transportation satellite communications and space exploration the need for scholars and practitioners to sharpen their appreciation of the legal and political issues becomes crucial This book will focus primarily on the issues of sovereignty jurisdiction and control in airspace and outer space and their effects on public and private activities but it will also look at related issues pertaining to the Seas and Antarctica Commercial exploitation resource control and the international regime regulating contractual obligations in relation to transportation of goods and services over all forms of territory will be examined to the extent that they are necessary to explain jurisdictional rights and duties over territory Older problems of international law such as crimes in the air and airspace trespass are treated along with newer developments such as space tourism as well as growing demand for private ownership and involvement in outer space exploitation The book goes on to consider the distinction between airspace and outer space and puts forward legal criteria which would allow for the resolution of the spatial delimitation dispute These criteria would determine where in spatial terms the exclusive sovereignty of airspace ends and where outer space the province of all mankind begins and contribute to the jurisprudence of territorial sovereignty and jurisdiction Monthly Catalog of United States Government Publications , 1961 **FAA Air Traffic Activity** , Monthly Catalog of United States Government Publications United States.  Committee on Appropriations,1962 Cross-border Provision of Air Navigation Services with Specific Reference to Europe
 Niels Van Antwerpen,2008-01-01 The tremendous flow of air traffic traversing the airspace of the European Union demands
 extraordinary vigilance on the part of air navigation service providers Although the first requirement of air navigation
 services is obviously the enhancement of safety providers must also attend to the efficiency and optimisation of airspace
 capacity and the minimisation of air traffic delays As technological and operational improvements proceed in these areas
 jurisdictional issues of responsibility and liability particularly in cases of mid air collisions become ever sharper and more in
 need of precise definition This detailed and insightful exposition focuses on these issues from three overlapping perspectives
 the international and European legal framework dealing with air navigation services the question of state responsibility and
 the question of liability for damage inflicted by air navigation service providers The author s in depth analysis includes
 examination of many elements among them the following the interrelated roles of the International Civil Aviation
 Organization ICAO the European Civil Aviation Conference ECAC the European Organisation for the Safety of Air Navigation
 EUROCONTROL the European Community s European Aviation Safety Agency EASA and other international bodies the
 Single European Sky initiative its establishment of Functional Airspace Blocks FUA's and its ongoing research program
 SESAR establishment of transparent lines of state responsibility in the context of cross border provision of air navigation
 services and prospects for the imposition of a transparent liability regime on corporatized air navigation service providers In
 conclusion the author enumerates the essential elements required for cross border provision of air navigation services and
 offers well thought out final recommendations and conclusions on the most preferable way to pursue such cross border
 provision within and outside the European Community A model agreement for the delegation of air navigation service
 provision appears as an appendix All professionals concerned with air navigation in Europe and elsewhere will appreciate the
 depth of knowledge and commitment apparent in this book The deeply informed insights manifest in its pages will be of
 enormous value to aviation agency officials and air law practitioners everywhere *Civil Aeronautics Board, Civil Service*
