International Conference on Water Resource and Environmental Protection

,2014-07-23 The 2014 International Conference on Water Resource and Environmental Protection WREP2014 aims to bring researchers engineers and students to the areas of Water Resource and Environmental Protection WREP2014 features unique mixed topics of Water Resource and Environmental Protection in the context of building healthier ecology and environment The conference will provide a forum for sharing experiences and original research contributions on those topics Researchers and practitioners are invited to submit their contributions to WREP2014 This proceeding tends to collect the up to date comprehensive and worldwide state of art knowledge on water resource and environmental protection All of accepted papers were subjected to strict peer reviewing by 24 expert referees The papers have been selected for this proceedings based on originality significance and clarity for the purpose of the conference The selected papers and additional late breaking contributions to be presented will make an exciting technical program on WREP2014 conference The conference program is extremely rich featuring high impact presentation We hope this conference will not only provide the participants a broad overview of the latest research results on water resource and environmental protection but also provide the participants a significant platform to build academic connections

Mine Water Paul L. Younger, S.A. Banwart, Robert S. Hedin, 2012-12-06

Nowhere is the conflict between economic progress and environmental quality more apparent than in the mineral extraction industries The latter half of the 20th century saw major advances in the reclamation technologies However mine water pollution problems have not been addressed In many cases polluted mine water long outlives the life of the mining operation As the true cost of long term water treatment responsibilities has become apparent interest has grown in the technologies that would decrease the production of contaminated water and make its treatment less costly This is the first book to address the mine water issue head on The authors explain the complexities of mine water pollution by reviewing the hydrogeological context of its formation and provide an up to date presentation of prevention and treatment technologies The book will be a valuable reference for all professionals who encounter polluted mine water on a regular or occasional basis

Circular Economy Applications for Water Security Erick R. Bandala, 2024-08-13 In arid and semi arid regions where water demand exceeds water availability water security is becoming a significant concern not only related to water availability but also to rigorous and costly requirements to remove conventional and emerging contaminants from effluents discharging into drinking water sources or as water reuse becomes an alternate water supply for communities in these regions Water and wastewater treatment demands a great amount of energy and resources highlighting the need for novel applications of the circular economy concept Circular Economy Applications for Water Security examines knowledge gaps avenues of future research and challenges related to the potential of enhanced underutilized waste materials as a transition

to circular economy applications for ensuring the proper quality of water This book includes fundamental information and practical examples that helps to better understand the concepts included The circular economy concept is helpful to incept sustainability in the water treatment processes Every chapter includes the identification of knowledge gaps avenues for further research and challenges that guide readers towards real state of the art analysis Contributors are experts in their areas and will commit to explaining concepts in a user friendly way without missing scientific rigor
