López de Prado, 2023-11-09 Virtually all journal articles in the factor investing literature make associational claims in denial of the causal content of factor models. Authors do not identify the causal graph consistent with the observed phenomenon; they justify their chosen model specification in terms of correlations, and they do not propose experiments for falsifying causal mechanisms. Absent a causal theory, their findings are likely false due to rampant backtest overfitting and incorrect specification choices. This Element differentiates between type A and type B spurious claims and explains how both types prevent factor investing from advancing beyond its current phenomenological stage. It analyzes the current state of causal confusion in the factor investing literature and proposes solutions with the potential to transform factor investing into a truly scientific discipline. This title is also available as Open Access on Cambridge Core. **Design for Ergonomics** Francesca Tosi, 2019-11-21 This book focuses on the global quality of the design of systems that people interact with during their work activities and daily lives: a quality that involves the globality of people's experience, physical, sensory, cognitive, and emotional. The book also explores physical ergonomics and cognitive ergonomics, which are essential components of design culture. The final section addresses the main design problems and intervention criteria.

Zollikon Seminars Martin Heidegger,2001 Long awaited and eagerly anticipated this remarkable volume allows English speaking readers to experience a profound dialogue between the German philosopher Martin Heidegger and the Swiss psychiatrist Medard Boss A product of their long friendship Zollikon Seminars Protocols Conversations Letters chronicles an extraordinary exchange of ideas Heidegger strove to transcend the bounds of philosophy while Boss and his colleagues in the scientific community sought to better understand their patients and their world Boss approached Heidegger during World War II asking for help in reflective

thinking on the nature of Heidegger's work. A correspondence ensued followed by visits that soon became annual two week meetings in Boss's home in Zollikon Switzerland. The protocols from these seminars recorded by Boss and reviewed, corrected and supplemented by Heidegger himself make up one part of this volume. They are augmented by Boss's record of the conversations he had with Heidegger in the days between seminars and by excerpts from the hundreds of letters that Heidegger wrote to Boss between 1947 and 1971. For the first time Heidegger makes the fundamental ideas of his philosophy accessible to nonphilosophers. Heidegger confronts certain philosophical psychological theories including Freudian psychoanalysis, Ludwig Binswanger's and Boss's forms of Dasein, existential psychoanalysis and Indian philosophy that he has never previously addressed. The lectures, correspondence and conversations span twenty five years offering an ongoing view of Heidegger's career and philosophical development. A richly detailed picture of one of the century's great philosophers. Zollikon Seminars is the best and clearest introduction to Heidegger's philosophy available. **Politics and Heidegger's**

Concept of Thinking in Contemporary Art Louise Carrie Wales, 2021-09-16. Responding to Heidegger's stark warnings concerning the essence of technology, this book demonstrates art's capacity to emancipate the life world from globalized technological enframing. Louise Carrie Wales presents the work of five contemporary artists: Martha Rosler, Christian Boltanski, Krzysztof Wodiczko and collaborators Noorafshan Mirza and Brad Butler who challenge our thinking and compel a dramatic re-positioning of social norms and hidden beliefs. The through line is rooted in Heidegger's question posed at the conclusion of his technology essay as understood through artworks that provides a counter to enframing while using increasingly sophisticated technological methods. The themes are political in nature and continue to have profound resonance in today's geopolitical climate. The book will be of interest to scholars working in art history, aesthetics, philosophy and visual culture. Resources in Education, 2000-10. *Catalog of Copyright Entries. Third Series*. Surgery Jonathan McFarland, Susana Magalhaes, Jacek Mostwin, René Genadry, 2025-08-12 Medical Humanities and Narrative Medicine have been increasingly relevant in view of the challenges that new health technologies and the digital world pose to truly person centered healthcare By Narrative Medicine we understand the practice of healthcare with narrative skills that allow professionals to recognize the suffering of others and of themselves be able to interpret verbal and non verbal narratives of illness and be motivated to act in a way that respects the Person of the Patient and of the Professional Surgery like other medical specialties requires space for reflection and debate on the meaning of humanism and its impact on the quality of care This requirement is more pressing in this area because it has escaped inquiry by Medical Humanities and Narrative Medicine We believe that this is due to the nature of the surgical activity carried out in an enclosed place characterized by the use of sophisticated technologies including robotics and artificial intelligence and inaccessible to patients relatives In addition the patients own expectations about surgery reinforce the technological and highly specialized nature of this area often marked by the neglect of the relational context with clear prejudice to the parties involved and the activity itself Although this gap has been identified there has been no space for reflection on the humanization of care in surgery This book is therefore innovative precisely because it responds to the previously mentioned shortcomings offering its readers the opportunity to reflect on Humanism in Surgery
