Landscape, Well-Being and

Environment Richard Coles,Zoe Millman,2013-11-07 Well being is now firmly established as an overarching theme of key

concern to all professionals that work manage or design the environment However well being is a complex multi dimensional issue rooted in the ways that we encounter perceive and interpret the environment No single discipline can claim to have sufficient knowledge to fully explain the types of interactions that occur therefore there is a need to draw together a wide range of professions who are exploring the consequences of their actions upon the well being of individuals and communities This edited work addresses the above consisting of a collection of studies which embrace different aspects of environment landscape and well being to consider current approaches to well being research and practice that fall outside the traditional concepts of well being as part of medical research making links with architecture landscape design environmental perception social interaction and environmental sustainability The contributors originally presented at the international conference Well Being 2011 jointly hosted by Birmingham City University and the Royal Institute of British Architects RIBA the chapters have been developed to present a coherent series of themes reviewing a wide range of literature presenting case studies appropriate to diverse audiences

Housing the North American City Michael Doucet, John C. Weaver, 1991-08-06

Doucet and Weaver begin this empirical analytical and narrative study with an analysis of the evolution of land development as an enterprise and continue with an examination of house design and construction practices the development of the apartment building and an account of class and age as they relate to housing tenure They also relate developments in Hamilton to the current state of urban historiography using their case study to resolve discrepancies and contradictions in the literature Among the major themes the authors deal with is a controversial exploration of what they see as a central North American urge the desire to own a home Other themes include the social allocation of urban space the quality and affordability of housing the increased interest of large corporations in the land development and financial service industries and a comparative analysis of housing in Canada and the United States The authors have drawn on civic and business records dating from the early nineteenth century to the latest planning data Combining this information with their comprehensive analysis Doucet and Weaver show that current housing problems and potential solutions are better understood when seen as part of a historical process They provide a critical assessment of the ways in which contemporary society produces shelter and question the use of technical innovations alone to resolve housing crises
