It is critical that scene evidence is collected and recorded efficiently as the scene can quickly change. The sooner evidence can be collected, reviewed and analyzed the better an understanding investigators will have as to how and why the incident occurred. Crime Scene Documentation Preserving the evidence and the growing role of 3D laser scanning demonstrates at length the value of laser scanning through the use of numerous case studies of investigators who have utilized various 3D technologies and laser scanning to document scenes. Thorough and accurate scene documentation is an essential function at a scene and proves particularly valuable in courtroom presentations to help jurors understand a crime or accident's likely chain of events. The more advanced a scene documentation method is the better it can be utilized to capture details that will lead to optimal scene diagramming. Currently 3D laser scanning is the most advanced method of scene documentation available, capturing detailed and realistic digital scans capturing scenes in their entirety and yielding a permanent representation of the scene for study and analysis at any time even years after a crime scene has vanished. The book explains current technology, the latest advances and how to best utilize the technology. Case examples come from various applications from tools to programs can help crash scene investigators understand how scanning can improve scene documentation, provide better and more evidence details and build more credible diagrams that possibly may be used in court presentations to help support a case. Key Features Describes 3D scene recording methods in use and how well they work. Outlines the variables and inherent challenges associated with documenting crime and crash scenes. Illustrates the positive and dramatic impact of having a well documented scene particularly in the courtroom. Explores how 3D laser scanning has vastly changed the way and extent to which crime and crash scenes can be captured accurately and completely and subsequently analyzed. Explains how laser scanning is highly flexible and presents strategies to integrate it into other crime scene incident recording techniques and technologies. Crime Scene Documentation details the many benefits of 3D laser scanning technology relative to its reliability and accuracy as well as the multiple case scenarios in which it can be used. The book serves as an invaluable resource to crime scene technicians, investigators and reconstructionists on the best ways to document a crime or crash scene.

Investigation of Road Traffic Fatalities Jay Dix, Michael Graham, Randy Hanzlick, 2017-09-20 The screech of rubber against asphalt. And then the crash, a violent two-car collision resulting in a twisted mass of metal, plastic and glass and worse, the deaths of both drivers. Accident reconstruction is but one phase of road traffic fatality (RTF) cases. Even as police officers draw their last diagram, interview their last witness and reconstruct the scene, Forensic Medical Investigation of Motor Vehicle Incidents Michael P. Burke, 2006-11-27 Forensic Medical Investigation of Motor Vehicle Incidents provides an in-depth study of the circumstances underlying motor vehicle incidents and allows for a reasoned analysis of a crash victim's

injuries It also gives law enforcement the tools to communicate relevant information to the forensic pathologists and trains pathologists to infer crucial facts from the evidence. **Current Publications in Legal and Related Fields**, 2000 **Lawyers' Medical Cyclopaedia of Personal Injuries and Allied Specialties**, 2002 *SNJ National Criminal Justice Reference Service* (U.S.), 1980 *Highway Safety Literature*, 1980 **Departments of Transportation, and Housing and Urban Development, and Related Agencies Appropriations for 2016** United States.
