Drakakis-Smith, Anders Närman, 1993 UN Ideas That Changed the World Richard Jolly, Louis Emmerij, Thomas G. Weiss, 2009-09-01 Ideas and concepts have been a driving force in human progress and they may be the most important legacy of the United Nations UN ideas have set past present and future international agendas in many global economic and social arenas and have also led to initiatives and actions that have improved the quality of human life This capstone volume draws upon findings of the other 14 books in the acclaimed United Nations Intellectual History Project Series The authors not only assess the development and implementation of UN ideas regarding sustainable economic development and human security but also apply lessons learned to suggest ways in which the United Nations can play a fuller role in confronting the challenges of human survival with dignity in the 21st century *War on Hunger*, 1977 The World Health Organization between North and South Nitsan Chorev, 2012-05-01 Since 1948 the World Health Organization WHO has launched numerous programs aimed at improving health conditions around the globe ranging from efforts to eradicate smallpox to education programs about the health risks of smoking In setting global health priorities and carrying out initiatives the WHO bureaucracy has faced the challenge of reconciling the preferences of a small minority of wealthy nations who fund the organization with the demands of poorer member countries who hold the majority of votes In The World Health Organization between North and South Nitsan Chorev shows how the WHO bureaucracy has succeeded not only in avoiding having its agenda co opted by either coalition of member states but also in reaching a consensus that fit the bureaucracy s own principles and interests Chorev assesses the response of the WHO bureaucracy to member state pressure in two particularly contentious moments when during the 1970s and early 1980s developing countries forcefully called for a more equal

international economic order and when in the 1990s the United States and other wealthy countries demanded international organizations adopt neoliberal economic reforms In analyzing these two periods Cherev demonstrates how strategic maneuvering made it possible for a vulnerable bureaucracy to preserve a relatively autonomous agenda promote a consistent set of values and protect its interests in the face of challenges from developing and developed countries alike

The State of World Rural Poverty Idriss Jazairy, Mohiuddin Alamgir, Theresa Panuccio, 1992. Despite almost four decades and billions of dollars in development activities, we are barely in a position to track the changing dynamics of poverty or to define with conviction the processes that entrap the poor in their misery. Accounting for about 90% of global poverty, rural poverty through transmigration is also a main contributor to urban poverty. It is in the rural areas of the world where poverty is most severe in human terms, where the hunger, hopelessness, hardship and despair commonly associated with entrenched poverty are most pronounced, where basic health services, sanitation, educational opportunities and other common amenities are most lacking. The alleviation of rural poverty is therefore tantamount to the alleviation of global poverty in its entirety. *The State of World Rural Poverty* offers the first comprehensive look at the economic conditions and prospects of the world's rural poor.
