*Basic Ways to Teach in the 80's* Sharon K. Zenger, Weldon F. Zenger, 1985      Jobs and Training in the 1980s P.B. Doeringer, B. Vermeulen, 2012-12-06 In February 1979 I wrote to the Alfred P Sloan Foundation seeking support for the Aspen Institute for Humanistic Studies to embark on a policy oriented program in vocational education The reason for the request which was generously granted by the foundation was stated as follows The federal program on vocational education dates from World War I Important changes were made in later legislation in 1963 and 1976 affecting the programs conducted by the Department of Health Education and Welfare The recently enacted Comprehensive Employment and Training Act CETA of the Department of Labor has brought large federal support to efforts to reduce unemployment especially for youth by providing preparatory training It may be an understatement to report that the programs of these two government departments have lacked adequate coordination in Washington or in the field Certainly there is a long way to go in improving both policy and program and an opportunity presents itself in preparing the policies to be proposed to the Congress when the vocational education program next comes up for reconsideration in 1980 and 1981 Responsibility for preparing the administration's position and recommendations lies with the Deputy Assistant Secretary for Planning and Evaluation of HEW Michael O Keefe      **How Chinese Teach Mathematics and Improve Teaching** Yeping Li, Rongjin Huang, 2013 *How Chinese Teach Mathematics and Improve Teaching* builds upon existing studies to examine mathematics classroom instruction in China It combines contributions from Chinese scholars with commentary from key Western scholars to offer a truly systematic examination of some important and distinctive features of mathematics classroom instruction Viewing classroom instruction as part of teachers' instructional practices this book goes beyond teachers in classroom instructional practice by also examining Chinese teachers' approaches and practices in developing and improving teaching Through this unique approach *How Chinese Teach Mathematics and Improve Teaching* expands and unpacks the otherwise fragmented knowledge about Chinese practices in developing and carrying out mathematics classroom instruction

North America The contributions show that the post communist trend in language policy has been vastly represented by attempts to eliminate the language and even the cultural legacy of the formerly hegemonic nation s in countries emerging after the collapse of the system In doing so officials in these countries tend to link the harmonisation of a diverse society with the idea of homogenising its population and prioritising the cultural legacy of the titular nation In contrast some post colonial countries are more tolerant of the language of their colonisers but consequently do not sufficiently promote the institutionalisation of their indigenous languages Furthermore the absence of visible efforts to follow any legal pattern in this regard often result in a communication gap between government and the various communities
