First Language Acquisition David Ingram,1989-09-07

This major textbook setting new standards of clarity and comprehensiveness will be welcomed by all serious students of first language acquisition. Written from a linguistic perspective it provides detailed accounts of the development of children's receptive and productive abilities in all the core areas of language: phonology, morphology, syntax and semantics. With a critical acuity drawn from long experience and without attempting to offer a survey of all the huge mass of child language literature, David Ingram directs students to the fundamental studies and sets these in broad perspective. Students are thereby introduced to the history of the field and the current state of our knowledge in respect of three main themes: method, description and explanation. Whilst the descriptive facts that are currently available on first language acquisition are central to the book, its emphasis on methodology and explanation gives it a particular distinction. The various ways in which research is conducted is discussed in detail as well as the strengths and weaknesses of various approaches leading to new perspectives on key theoretical issues. *First Language Acquisition* provides advanced undergraduate and graduate students alike with a cogent and closely analysed exposition of how children acquire language in real time. Equally importantly, readers will have acquired the fundamental knowledge and skill not only to interpret primary literature but also to approach their own research with sophistication. *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),

Les fondements anatomophysiologiques et neurobiologiques des fonctions langagières sont présentés en premier lieu suivis de l'exposé du cours de l'acquisition du langage oral et écrit et des considérations théoriques et expérimentales relatives au traitement du langage oral et écrit. Une autre section traite du rôle de la mémoire principalement court terme dans le fonctionnement langagier. Les procédés non verbaux de communication font l'objet d'une section particulière de même que les problèmes et la conduite de l'évaluation du langage oral et du langage écrit.
