Cybercartography in a Reconciliation Community Engaging Intersecting Perspectives Volume Eight gathers perspectives on issues related to reconciliation primarily in a residential boarding school context and demonstrates the unifying power of Cybercartography by identifying intersections among different knowledge perspectives Concerned with understanding approaches toward reconciliation and education preference is given to reflexivity in research and knowledge dissemination The positionality aspect of reflexivity is reflected in the chapter contributions concerning various aspects of cybercartographic atlas design and development research and related activities In this regard the book offers theoretical and practical knowledge of collaborative transdisciplinary research through its reflexive assessment of the relationships processes and knowledge involved in cybercartographic research Using most specifically the Residential Schools Land Memory Mapping Project for context Cybercartography in a Reconciliation Community provides a high speed tour through the project s innovative collaborative approach to mapping institutional material and volunteered geographic information Exploring Cybercartography through the lens of this atlas project provides for a comprehensive understanding of both Cybercartography and transdisciplinary research while informing the reader of education and reconciliation initiatives in Canada the U S the U K and Italy Includes a variety of examples of reconciliation work especially related to residential boarding schools and examines common themes in the issues discussed Offers both conceptual and applied dimensions and provides a good example of a reflexive approach to both research and knowledge dissemination Addresses a modern application for Cybercartography that is of considerable societal importance Provides historiographical accounts of atlas making processes multidisciplinary perspectives on research issues and conceptual explorations *Cartography and Art* William Cartwright,Georg Gartner,Antje Lehn,2009-02-26 This book is the fruition of work from contributors to the Art and Cartography Cartography and Art symposium held in Vienna in February 2008 This meeting brought together cartographers who were interested in the design and aesthetics elements of cartography and artists who use maps as the basis for their art or who incorporate place and space in their expressions The outcome of bringing together these like minds culminated in a wonderful event spanning three evenings and two days in the Austrian capital Papers exhi tions and installations provided a forum for appreciating the endeavors of artists and cartographers and their representations of geography As well as indulging in an expansive and expressive occasion attendees were able to re ect on their own work and discuss similar elements in each other s work It also allowed cartographers and artists to discuss the potential for collaboration in future research and development To recognise the signi cance of this event paper authors were invited to further develop their work and contribute chapters to this book We believe that this book marks both a signi cant occasion in Vienna and a starting point for future collabo tive efforts between artists and cartographers The editors would like to acknowledge the work of Manuela

Schmidt and Felix Ortig who undertook the task of the design and layout of the chapters

Multimedia Cartography William Cartwright, Michael P Peterson, Georg Gartner, 2007-02-13 Multimedia Cartography provides a contemporary overview of the issues related to multimedia cartography and the design and production elements that are unique to this area of mapping. The book has been written for professional cartographers interested in moving into multimedia mapping for cartographers already involved in producing multimedia titles who wish to discover the approaches that other practitioners in multimedia cartography have taken and for students and academics in the mapping sciences and related geographical fields wishing to update their knowledge about current issues related to cartographic design and production. It provides a new approach to cartography one based on the exploitation of the many rich media components and an avant garde approach that multimedia offers.

Paradigms in Cartography Pablo Iván Azócar Fernández, Manfred Ferdinand Buchroithner, 2013-08-04 In this book the main trends, concepts and directions in cartography and mapping in modernism and post modernism are reviewed. Philosophical and epistemological issues are analysed in cartography from positivist, empiricist, neo positivist and post structuralist stances. In general in cartography technological aspects have been considered as well as theoretical issues. The aim is to highlight the epistemological and philosophical viewpoint during the development of the discipline. Some main philosophers who have been influential for contemporary thinking such as Immanuel Kant, Ludwig Wittgenstein, Karl Popper and Bertrand Russell are considered. None of these philosophers wrote about cartography directly excepting Kant but their philosophies are related to cartography and mapping issues. The book also analyses the concept of paradigm or paradigm shift coined by Thomas Kuhn who applied it to the history of science. Different cartographic trends that have arisen since the second half of the twentieth century are analysed according to this important concept which is implicit inside the scientific or disciplinary communities. Further the authors analyse the position of cartography in the context of the sciences and other disciplines adopting a positivistic point of view. Additionally they review current trends in cartography and mapping in the context of information and communication technologies in a post modernistic or post structuralistic framework. Thus since the 1980s and 1990s new mapping concepts have arisen which challenge the discipline's traditional map conceptions.
