Formations of Terror Simon Bell, 2017-03-07 There are a host of books about fear but as yet there has been little attempt to methodically and systemically assess how fear emerges and is targeted This highly readable yet rigorous book sets about the methodical assessment of fear as an emergent property Working from the personal experience of fear as everyman and then using examples and case studies it explores the main principles which lie behind the manifestation of fear of all kinds Using climate change as its specific point of focus fear is seen to be a major force in problem assessment and analysis and by accident or intention a significant confusion to human decision making By the systemic development of the main features of the Paradigm of Fear and the identification of Fear Amplifying and Fear Attenuating systems the book demonstrates how fear can be contained how new social forms can arise and how new behaviours and social qualities can mitigate the Formations of Terror

The Golden Thread Fuad Udemans, 2013 This book is an account of a ten year experiment whereby the scientist became an entrepreneur so as to experience his own theoretical model applied in a live social system society Profit motives and the clinical nature of science became muddled with norms rules and laws of social systems and how different people applied and responded to these rules The insights to be gained from this journey are often surprising The book highlights many counter intuitive outcomes It also reveals how certain individuals interpret society's rules and norms despite their design to ensure fair and equitable social systems Indeed the manipulation of social laws and standards by those with strong fields of power is self evident and it is explored in a unique manner Understanding how the field of power can be manipulated suggests that no matter how bleak one's current position may be it is very possible and relatively easy to escape conditions of poverty oppression and
