Cycles Of Child Maltreatment Facts Fallacies And Interventions:

Understanding Child Maltreatment Maria Scannapieco, Kelli Connell-Carrick, 2005-02-10 Child maltreatment professionals from all disciplines struggle to find better ways of understanding and treating the families and children affected by maltreatment Since the mid 1960s the battered child syndrome and recent high profile abuse cases a plethora of research and literature on child maltreatment has emerged yet this is the first volume to offer a comprehensive integrated analysis for understanding assessing and treating child maltreatment within the ecological framework in a developmental context This framework systematically organizes and integrates the complex empirical literature in child maltreatment and development including the often overlooked period of adolescence Viewing child maltreatment from an ecological perspective this volume identifies the risk and protective factors correlated with abuse and neglect The authors present a comprehensive assessment framework addressing the multiple developmental and environmental factors unique to each case This framework fully considers risk and protective factors and their relationship to individuals families and environmental elements presenting a much needed perspective for today s child protective services workers *Understanding Child Maltreatment* is the first of its kind While most books broadly address the developmental consequences of maltreatment this volume goes further by proposing assessment and intervention strategies based on a deep understanding of each stage of a child s development Interventions center on the caregiver and the family with particular attention to parenting skills and the challenges the child may experience within his or her developmental stage Each chapter emphasizes empirically based interventions and includes a case illustration that guides readers in applying these concepts to their own practice Providing a comprehensive nuanced perspective on maltreatment this book will be invaluable to students researchers and professionals *A Community Health Approach to the Assessment of Infants and their Parents* Kevin D. Browne, Jo Douglas, Catherine Hamilton-Giachritsis, Jean Hegarty, 2006-10-02 This book is a practical guide to the CARE programme a home visiting programme that aims to assess infants growth development and psycho social transitions in their first year of life and that together with the Index of Need checklist aims to engage parents in risk assessment It provides evidence based research for the programme and gives clinical examples of how to use the assessment tools including the Index of Need and how to work with parents The authors take a partnership with parents approach throughout while bearing in mind the practical workload issues that practitioners face

The Importance of Fathers in the Healthy Development of Children Jeffrey Rosenberg, William Bradford Wilcox, 2006 **Trauma, Drug Misuse and Transforming Identities** Kim Etherington, 2008 Looking at the life stories of ex drug misusers in their own words this book offers insights into the nature of addiction and how it can be tackled Etherington highlights the therapeutic value of listening to drug misusers life stories and the importance of understanding how social environments and wider cultural influences shape people s lives **Child Abuse, Gender and Society** Jackie Turton, 2007-11-21 This book investigates the silence that surrounds the sexual abuse of children by women uncovering the

denial minimization and rationales used by the victims the perpetrators and the professionals *Handbook of Stress, Trauma, and the Family* Don. R. Catherall, 2013-01-11 The Handbook of Stress Trauma and the Family is broken down into three sections compiling research theory and practice The first section focuses on how traumatic stress affects intimate others what familial characteristics affect individual susceptibility to trauma as well as evaluation of the effectiveness of various interventions The section on theory explores concepts of stress and intrapsychic processes underlying the intergenerational transmission of trauma addressing how families can buffer or enhance anxiety The final section entitled practice covers assessment presenting both the Circumplex Model and Bowenian family theory models treatment models and treatment formats for specific populations The major family treatment models applicable to stress and trauma are discussed including contextual object relations emotionally focused and critical interaction therapy **The Changing Japanese Family** Marcus Rebeck, Ayumi Takenaka, 2006-04-18 The Japanese family is shifting in fundamental ways specifically in terms of attitudes towards family and societal relationships and also the role of the family in society Changing Japanese Family explores these significant changes which include an ageing population delayed marriages a fallen birth rate which has fallen below the level needed for replacement and a decline in three generational households and family businesses The authors investigate these changes and the effects of them on Japanese society whilst also setting the study in the context of wider economic and social changes in Japan They offer interesting comparisons with international societies especially with Southern Europe where similar changes to the family and its role are occurring This fascinating text is essential reading for those with an enthusiasm in Japanese studies but will also engage those with a concern in Japanese culture and society as well as appealing to a readership with a wider interest in the sociology of the family Protecting Children from Abuse and Neglect in Primary Care Michael J. Bannon, Yvonne H. Carter, 2002-12-05 This book deals with child abuse and neglect as it presents itself in primary care Readers will gain a better understanding of how the child protection process works The book takes a broad perspective taking into account domestic violence adult survivors of abuse and the often forgotten plight of children who are in the care of local authorities A primary care perspective of this complex and challenging subject is maintained throughout *Women Who Sexually Abuse Children* Hannah Ford, 2006-08-04 Until recently the topic of female sexual offenders remained under researched and many incorrect assumptions and beliefs still surround the subject This book is organised in to five parts around eleven chapters It provides a comprehensive overview of the latest research in this often overlooked area and discusses both adult female offenders and adolescents younger children who commit sexual offences against children After an in depth evaluation of research literature the author then considers a range of treatment approaches and directions for future research Cycles of Child Maltreatment Ann Buchanan, 1996-11-27 Although most families do not repeat the patterns of abuse of their childhood there is evidence that for whatever reason substantial numbers do This book explores continuing intergenerational cycles of child maltreatment and the controversies that

surround the theories focusing mainly on physical abuse neglect and emotional abuse rather than sexual abuse Examining the facts and the fallacies permeating the international literature the author suggests that in intergenerational child maltreatment there may not be just one cycle but four separate cycles sociopolitical factors recurring cultural patterns psychological factors and biological factors Interventions need to be focused on each cycle independently to attempt to break the cycle of child maltreatment Ann Buchanan draws on her wide range of both academic and research experience in this field as well as on her clinical experience to bring together both the theories and research in the mechanisms of transmission and the practical aspects of interventions The book is easily accessible with clear summaries and will prove an excellent introduction to all those working with children and families *Studies in the Assessment of Parenting* Peter Reder, Sylvia Duncan, Claire Lucey, 2004-06-02 Offers a review of the latest literature but moreover a practical guide essential to professionals who give their expert opinions to courts in child care cases **Family Matters** Peter Reder, Mike McClure, Anthony Jolley, 2005-08-19 Family Matters focuses on research and clinical material which bridges the traditional gap between child and adult mental health Rather than considering child and adult problems separately the authors address the often complex interactions between the two covering such topics as The implications of childhood trauma in later life The impact of parental mental health problems on children How interactions within a family can affect the mental health of all individuals within the family The authors review existing research and cover their own recent studies and practical experience and put forward new theoretical models to underpin their recommendations for changes in practice such as liaison initiatives between child and adult services and specialised services to treat adolescents parenting breakdown and perinatal psychiatric illness The findings and recommendations in Family Matters have important implications for the organisation and funding of mental health and related services and staff training and should be read by all those in professions concerned with child and adult mental health including psychiatrists family therapists psychotherapists nurses health visitors and social workers and health service managers **Parental Substance Misuse and Child Welfare** Brynna Kroll, Andy Taylor, 2003 Focusing on the needs of children of substance misusing parents and the dilemmas faced by professionals working with them this comprehensive book brings together for the first time theoretical and practice issues for all those involved with the crossover between responses to drug and alcohol problems and child welfare Describing the effects of substance misuse on good enough parenting and attachment and taking into account theories about substance use the authors analyse the issues facing children including the impact on psychological and emotional development Emphasising the importance of developing holistic approaches involving both child care and drug and alcohol agencies as well as families this book presents a practical model for risk assessment and intervention that balances the competing needs of parents and their children It is an essential resource for all those working or training to work in the fields of child welfare substance misuse health education and criminal justice **International Handbook of Multigenerational Legacies of Trauma**

Yael Danieli,2013-03-09 In this extraordinary new text an international array of scholars explore the enduring legacy of such social shocks as war genocide slavery tyranny crime and disease Among the cases addressed are instances of genocide in Turkey Cambodia and Russia the plight of the families of Holocaust survivors atomic bomb survivors in Japan and even the children of Nazis the long term effects associated with the Vietnam War and the war in Yugoslavia and the psychology arising from the legacy of slavery in America

Thinking Psychologically About Children Who Are Looked After and Adopted Kim S. Golding,Helen R. Dent,Ruth Nissim,Liz Stott,2006-02-22 Assessment intervention and living with children who are looked after or adopted all require an understanding of psychology and its application This innovative collection makes thinking psychologically about looked after and adopted children accessible and in doing so provides an insight into the world of these children Informed by research practice and psychological theory this volume provides an overview of the area and considers the context for helping children change and develop It goes on to describe in detail the techniques and approaches used by clinicians and explains how interventions can be developed and adapted for children and young people living in residential foster and adoptive care Careful consideration is also given to carers and families living with these children With its multi disciplinary approach Thinking Psychologically About Children Who Are Looked After and Adopted will appeal to all professionals involved in the care and education of placed children It will also be of interest to policy makers and lecturers and students of social work

Policing Domestic Abuse Katy Barrow-Grint,Jacqueline Seibre,Jackie Turton,Ruth Weir,2022-11-01 This book is dedicated to improving the practice of the policing of domestic abuse Its objective is to help inform those working in policing about the dynamics of how domestic abuse occurs how best to respond to and investigate it and in the longer term how to prevent it Divided into thematic areas the book uses recent research findings to update some of the theoretical analysis and to highlight areas of good practice what works and why An effective investigation and the prosecution of offenders are considered as well as an evaluation of the success of current treatment options Policing domestic abuse can only be dealt with through an effective partnership response The responsibilities of each agency and the statutory processes in place when policy is not adhered to are outlined Core content includes A critique of definitions and theoretical approaches to domestic abuse including coverage of the myths surrounding domestic abuse and their impact on policing An exploration on the challenges of collecting data on domestic abuse looking at police data and the role of health and victim support services A critical review of different forms of abuse different perpetrators and victims and risk assessment tools used by the police A critical examination of the law relating to domestic abuse how police resources are deployed to respond to and manage it and best practice in investigation gathering evidence and prosecution Key perspectives on preventing domestic abuse protecting victims and reducing harm Written with the student and budding practitioner in mind this book is filled with case studies current research reports and media examples as well as a variety of reflective questions and a glossary of key terms to help shed light on the challenges of policing domestic violence and the links

between academic research and best practice *Adolescent Psychopathology and the Developing Brain* Daniel Romer, Elaine F. Walker, 2007-03-01 Recent advances in our understanding of the human brain suggest that adolescence is a unique period of development during which both environmental and genetic influences can leave a lasting impression To advance the goal of integrating brain and prevention science two areas of research which do not usually communicate with one another the Annenberg Public Policy Center's Adolescent Risk Communication Institute held a conference with the purpose of producing an integrated volume on this interdisciplinary area Presenters chapter contributors were asked to address two questions What neurodevelopmental processes in children and adolescents could be altered so that mental disorders might be prevented And what interventions or life experiences might be able to introduce such changes The book has a 5 part structure biological and social universals in development characteristics of brain and behavior in development effects of early maltreatment and stress on brain development effects of stress and other environmental influences during adolescence on brain development and reversible orders of brain development The twenty chapters include contributions from some of the most well known researchers in the area *Child Protection* Iain Moody, Barry Fearnley, 2014-05-22 Ensuring the safeguarding of children is a highly important and challenging task for all professionals working in a healthcare environment This pocket sized guide will help you develop your understanding of the issues and enable you to identify and respond to difficult child protection concerns with confidence The Nursing Health Survival Guides have evolved take a look at our app for iPhone and iPad *Communicating Successfully in Groups* Richard Hammersley, Marie Reid, 2014-04-23 This practical guide to the psychology of effective communication is suitable for anyone for whom communication in groups is a key part of their job No previous knowledge of psychology is assumed and the emphasis is on exercises key point summaries assessment and improving your skills in everyday situations like committees project teams seminars and focus groups Suitable as an introduction for psychology students it will be invaluable for students of business medicine allied health social work and probation whether studying on a short course or attending an intensive training session as part of their continuing professional development **MALE CRIME AND DEVIANCE** Barri R. Flower, 2003-01-01 **MALE CRIME AND DEVIANCE** seeks to explore in depth the types of offenses most identified with and committed by males dynamics of male crime characteristics of male offenders how male criminality and delinquency compare with and differ from female delinquent and criminal behavior explanations for male crime and efforts at combating crime in this country Particular attention is given to exploring the relationship between male aggression and masculinity as well as the role that testosterone and other biological factors play in male crime and violence The book also focuses on the correlation between male violence and aggressive behavior and firearms violence involving intimates male sexual violence bias crimes workplace violence terrorism male perpetrated sexual offenses youth gang crime and school violence These areas of male criminality and deviance are examined within the context of all male offending arrest self report and inmate data along with criminological

theoretical approaches to understanding the causes and related factors of male deviant behavior The book is written primarily for undergraduate and graduate level students for coursework in criminal justice criminology male aggression violent behavior homicide youth studies gang studies delinquency law law enforcement sociology social science psychology biology and related areas of study However it is appropriate as well for academicians social scientists psychologists law officers medical workers and a general readership with a vested interest in antisocial behavior and its implications on the greater society
