The Church on British Television Marcus Harmes,Meredith Harmes,Barbara Harmes,2020-04-28 This book will be the

first systematic and comprehensive text to analyze the many and contrasting appearances of the Church of England on television. It covers a range of genres and programs including crime drama, science fiction, comedy, including the specific genre of ecclesiastical comedy, zombie horror, and non-fiction broadcasting. Readers interested in church and political history, popular culture, television and broadcasting history, and the social history of modern Britain will find this to be a lively and timely book. Programs that year after year sit enshrined as national favourites, for example *Dad's Army* and *Midsomer Murders*, foreground the Church. From the Queen's Christmas Message to royal weddings and Coronation Street, the clergy and services of England's national church abound in television. This book offers detailed analysis of landmark examples of small screen output and raises questions relating to the storytelling strategies of program makers, the way the established Church is delineated, and the transformation over decades of congregations into audiences.

National Service Life Stories Peter Gurney, Matthew Grant, Joel Morley, 2025-01-25. National service was a defining feature for a generation of young men in post-war Britain. Around 2.3 million of them were called up between the end of World War Two and 1963 when conscription ended. However, national service was forgotten almost before it had ended, a process aided subsequently by professional historians who have been reluctant to assess its longer-term influence on British social and political history. Based on original oral interviews with well over one hundred men, this book explores the ways in which compulsory military participation reverberated in the memories of interviewees long beyond the end of conscription, and how these early military experiences shaped their later life stories. Unlike existing accounts that tend to rely on memoirs written by officers or else oral interviews that concentrate narrowly on the details of military service, this study focusses instead on men from working-class backgrounds and situates national service in the context of the life course and the wider transformations that have occurred in British society since conscription ended. In so doing, the work shines new light on important areas of current scholarly interest and historiographical concern, including the changing meaning and experience of class, masculinity, and citizenship, as well as the complexities of popular memory.
