Basic Sciences For Obstetrics And Gynecology:

Basic Sciences for Obstetrics and Gynaecology: Core Materials for MRCOG Part 1 Austin Ugwumadu, 2014-06-19 This textbook takes a new dynamic approach to the basic sciences in obstetrics and gynaecology. It teaches candidates all they need to know for the MRCOG Part 1 examination by extending the understanding of the basic medical sciences and their relevance to obstetrics and gynaecology. Like conventional textbooks it teaches what is true but it also what is false and why. The most complex concepts are discussed in a problem based format so that the relevant basic sciences are taught and drawn together in context.

Basic Sciences for Obstetrics and Gynaecology Tim Chard, 1998 Basic Sciences for Obstetrics and Gynaecology has become the standard revision aid for students preparing for examinations in obstetrics and gynaecology particularly those candidates for the MRCOG Part I. A wealth of information is presented in a concise didactic format focusing on those facts that are generally considered to be neither contentious nor speculative. The fifth edition has been substantially updated to reflect the current understanding of the basic sciences underpinning the practice of obstetrics and gynaecology. This book will also be of value to professionals wishing to refresh their basic scientific knowledge. Cell Biology Embryology and the Placenta Anatomy General Physiology and biochemistry Endocrinology Pathology Microbiology Pharmacology. Tim Chard is Professor of Obstetrics and Gynaecology at St Bartholomew's Hospital in London. Richard Lilford is Professor of Health Services Research at the University of Birmingham.

Basic Science in Obstetrics and Gynaecology Sir John Dewhurst, Michael De Swiet, Geoffrey Chamberlain, 1986 *Basic Sciences for Obstetrics and Gynaecology* T. Chard, R. Lilford, 2012-12-06 The aim of this book is to provide a straightforward summary of the knowledge required for preliminary examinations in specialist obstetrics and gynaecology. The first part of the examination for Membership of the Royal College of Obstetricians and Gynaecologists would be a good example. Thus the field covered is that of the basic sciences anatomy physiology biochemistry etc as applied to human reproduction. Most examinations of this type are based on multiple choice questions MCQ. No apology is made for the fact that the present book addresses the sort of fact which lends itself to testing by this approach. There is no discussion of speculative or contentious areas no account of present or future research and no references. Excellent books are available which treat the topic in a much fuller and more discursive manner and the present volume does not seek to emulate them. Readers will be aware that even apparently immutable facts are subject to occasional revision. We have attempted to present the state of the art. Most of the material is generally if not universally accepted. A particular problem arises with numerical information.

Textbook for MRCOG - 1 Richa Saxena, 2016-04-30 Textbook for MRCOG 1 Basic Sciences in Obstetrics Gynaecology is a comprehensive resource for candidates preparing for the MRCOG Part 1 exam and all medical students wishing to pursue specialisation in obstetrics and gynaecology in the UK. Includes over 1000 SBA questions and answers for self assessment. The book is further enhanced by over 230 illustrations and images making this an ideal revision guide.
