NAFTA and the Energy Charter

Treaty:Compliance With, Implementation and Effectiveness of International Investment Agreements Mirian

Omalu,1999-01-01 The North American Free Trade Agreement NAFTA and the Energy Charter Treaty ECT are the first major

multilateral treaties to impose obligations on governments concerning the protection and treatment of foreign investments. These obligations are enforceable by private companies. NAFTA and the ECT examines the effectiveness of the investment rules of these treaties and analyses the mechanisms adopted to enhance compliance and to facilitate the implementation and enforcement of the relevant rules and regulations. Coverage of this work includes a conceptual analysis of the precise meaning and theoretical foundation of compliance implementation and effectiveness; an examination of issues of direct effect and direct international responsibility in terms of the practical question of the treaties' impact on the domestic regimes of states; an exploration of the issues of transparency and monitoring to achieve enhanced compliance; and a close look at a number of key links in the field andndash between the investment rules and the workings of national legal and governmental systems between national and international law between different disciplines involved: international law, international relations, international politics and economics, and between transparency and compliance monitoring. NAFTA and the ECT also offers several helpful features including results from a questionnaire based survey circulated to the main players in the realm of foreign investment which offer unique insights on the prevalent perception of the industry towards NAFTA and the ECT and original suggested provisions and frameworks which would enhance the effectiveness of the investment rules. The thought provoking issues probed and conclusions reached and the interdisciplinary and comparative approach taken make NAFTA and the ECT a compelling new resource for academics, policymakers and others interested in the effectiveness of international investment agreements and the tools employed in their implementation and enforcement.
