professionals working in sport development Strategic Sport Management Michal Varmus, Milan Kubina, Roman Adámik, 2021-02-17 Sport and in particular the sporting environment has undergone significant changes in recent decades. The social significance and commercialization of sport, the use of new technologies and organizational structures and the involvement of various stakeholders matter more today than ever before. This book addresses the key influence of stakeholders in particular on the activities of sports organizations, taking into account certain territorial differences around the world but also within Europe. The authors explain the key characteristics of the management of sports organizations as opposed to other organizations. These include the strategic management and setting of long term goals such as sporting success, sustainable funding, youth training and community building. The authors present a strategic model for these goals and stakeholders in the context of sport together with research based case studies in which the critical factors in the strategic management of successful and unsuccessful sports organizations are identified.

The State of the World's Children 2003 UNICEF., 2002 Each generation is faced with new challenges. Listening for and to the views of children is one of ours. This year The State of the World's Children focusses on the responsibility of adults to seek out the perspectives and opinions of children and to take them seriously and on the responsibility of adults to help children and adolescents develop their competencies for authentic and meaningful participation in the world.

Youth Sport, Physical Activity and Play Andrew Parker, Don Vinson, 2013-06-26 Sport, physical activity and play are key constituents of social life impacting such diverse fields as healthcare, education and criminal justice. Over the past decade governments around the world have begun to place physical activity at the heart of social policy, providing increased opportunities for participation for young people. This groundbreaking text explores the various ways in which young people experience sport, physical activity and play as part of their everyday lives and the interventions and outcomes that shape and define those experiences. The book covers a range of different sporting and physical activities across an array of social contexts, providing insight into the way in which sport, physical activity and play are interpreted by young people and how these interpretations relate to broader policy objectives set by governments, sporting organisations and other NGOs. In the process it attempts to answer a series of key questions including: How has sport policy developed over the last decade? How do such policy developments reflect changes at the broader political level? How have young people experienced these changes in and through their sporting lives? By firmly locating sport, physical activity and play within the context of recent policy developments and exploring the moral and ethical dimensions of sports participation, the book fills a significant gap in the sport studies literature. It is an important reference for students and scholars from a wide range of sub-disciplines including sports pedagogy, sports development, sport and leisure management, sports coaching, physical education, play and playwork and health studies.

Encyclopedia of British Football Richard Cox, Dave Russell, Wray Vamplew, 2020-07-24 This reference work aims to provide sports enthusiasts, journalists, librarians, students and scholars with an authoritative source of information on a comprehensive range of subjects.
