Basic Principles Of Modern International Law:

Principles of International Environmental Law Philippe Sands, 2003-10-09 This second edition of Philippe Sands' leading textbook on international environmental law provides a clear and authoritative introduction to the subject revised to December 2002. It considers relevant new topics including the Kyoto Protocol, genetically modified organisms, oil pollution, chemicals, etc. and will remain the most comprehensive account of the principles and rules relating to environmental protection and the conservation of natural resources. In addition to the key material from the 1992 Rio Declaration and subsequent developments, Sands also covers topics including the legal and institutional framework, the field's historic development and standards for general application. This will continue to be an invaluable resource for both students and practitioners alike.

Akehurst's Modern Introduction to International Law Peter Malanczuk, 2002-04-12 First published in 2002, Routledge is an imprint of Taylor & Francis, an information company.

Butler, 2024-12-02 **The Perplexities of Modern International Law** Académie de Droit International de la Haye Staff, Shabtai Rosenne, 2002 The Academy is an institution for the study and teaching of Public and Private International Law and related subjects. Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law. The courses deal with the theoretical and practical aspects of the subject, including legislation and case law. All courses at the Academy are in principle published in the language in which they were delivered in the *Collected Courses of the Hague Academy of International Law*. The contents of this volume consist of *The Perplexities of Modern International Law: General Course on Public International Law* by Shabtai ROSENNE, former Ambassador of Israel, Jerusalem. The Mysterious and Obvious in American Diplomacy Insur Farkhutdinov, 2020-07-09 The book analyses the origins of the idea of interference in the internal affairs of other states and preventive strike in international law, beginning with the Monroe Doctrine. 1823 American diplomacy has not changed in principle in the last two centuries and is still based on the Monroe doctrine. This is proven here through the study of the foreign policy of the vast majority of US presidents from Monroe to Trump. As the book shows, one of the main tools of American domination throughout the world in the second half of the 20th century and the beginning of the 21st is the doctrine of the preventive strike and interference in the affairs of other states.

Contemporary International Law and China's Peaceful Development Lingliang Zeng, 2020-10-30 This book discusses selected frontier and hot theoretical and practical issues of international law in the 21st century and in the process of China's peaceful development strategy, such as interactions between harmonious world, international law, and China's peaceful development; close connections of China's rule of law with international rule of law; issues of international law resulting from the war in Former Yugoslavia; establishment of ICC; DPRK nuclear test; Iraq War; Independence of Crimea; features of WTO rule of law and its challenges, as well as legal and

practical disputes between China and other members in the WTO recent tendency of regional trade agreements and characteristics of Chinese practices in this aspect legal issues in relations between China and the European Union with a view of the framework of China EU Comprehensive Strategic Partnership

Research Handbook on International Law and Peace Cecilia M. Bailliet, 2019 Peace is an elusive concept especially within the field of international law varying according to historical era and between contextual applications within different cultures institutions societies and academic traditions This Research Handbook responds to the gap created by the neglect of peace in international law scholarship Explaining the normative evolution of peace from the principles of peaceful co existence to the UN declaration on the right to peace this Research Handbook calls for the fortification of international institutions to facilitate the pursuit of sustainable peace as a public good

General Principles of Law and International Due Process Charles T. Kotuby, Luke A. Sobota, 2017 Article 38 of the Statute of the International Court of Justice defines international law to include not only custom and convention between States but also the general principles of law recognized by civilized nations within their municipal legal systems In 1953 Bin Cheng wrote his seminal book on general principles identifying core legal principles common to various domestic legal systems across the globe This monograph summarizes and analyzes the general principles of law and norms of international due process with a particular focus on developments since Cheng's writing The aim is to collect and distill these principles and norms in a single volume as a practical resource for international law jurists advocates and scholars The information contained in this book holds considerable importance given the growth of inter state intercourse resulting in the increased use of general principles over the past 60 years General principles can serve as rules of decision whether in interpreting a treaty or contract determining causation or ascertaining unjust enrichment They also include a core set of procedural requirements that should be followed in any adjudicative system such as the right to impartiality and the prohibition on fraud Although the general principles are by definition basic and even rudimentary they hold vital importance for the rule of law in international relations They are meant not to define a rule of law but rather the rule of law

Contemporary Challenges to the Fundamental Principles of International Law and EU Interaction Gloria Fernández Arribas, 2024-11-25 This book finished in September 2023 addresses the fundamental principles enshrined in Resolution 2625 XXV sovereignty the principle of non intervention the prohibition of the use of force and self determination Studying these principles can help us understand some of the main features of international law and the international community in the 21st century the role of traditional and new subjects alike the sources of international law issues of international responsibility and new international challenges For this purpose the book analyses in each chapter the main controversial practices regarding principles In addition a section is devoted to an analysis of the particular relationship between the European Union and these principles given the EU's unique role as an important evolution in international law as both a subject and treaty maker Further the EU provides an example of the institutionalisation of the international community and helps to solidify the concept The book is

chiefly intended for experts on International Law Its purpose is to offer an updated vision of the international community through analysis of the core principles of international law highlighting contradictions and problems regarding its application and interpretation The book should also be of great interest and value to those starting careers in international law offering them key insights into the international community and the roots of the international system *International Law Reports* E. Lauterpacht, C. J. Greenwood, 1997-08-28 *International Law Reports* is the only publication in the world wholly devoted to the regular and systematic reporting in English of decisions of international courts and arbitrators as well as judgements of national courts It is therefore an essential work of reference Cases are drawn from every relevant jurisdiction international and national The volumes are prepared at the University of Cambridge Research Centre for International Law All decisions in other languages are translated into English Because of the standing and scope of its coverage the series is widely cited in judgements of international and national tribunals No other publication provides a comparable coverage of case law in this field Essential for every library providing even minimal international coverage The most economical and efficient way of accessing the whole range of international case law material *Problems of boundaries and security in the Helsinki Declaration*, 1979-03-01 The Academy is a prestigious international institution for the study and teaching of Public and Private International Law and related subjects The work of the Hague Academy receives the support and recognition of the UN Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law The courses deal with the theoretical and practical aspects of the subject including legislation and case law All courses at the Academy are in principle published in the language in which they were delivered in the *Collected Courses of the Hague Academy of International Law* **International Law in Post-Colonial Africa** Tiyanjana Maluwa, 2023-12-28 African States have contributed to the development of modern international law in various ways This contribution can be assessed through an examination of the actual practice of these States in their interactions with each other and with other States in the wider international community on various matters which have a bearing on the creation of legal rules for the international community Taken together the case studies presented in this book demonstrate that despite its apparent marginalization in the international system Africa can stake a valid claim to being part of the on going process of shaping new rules and principles of international law while strengthening existing ones Some of the more important examples are the broadening of the refugee definition and the principle of non refoulement in the area of refugee law the rights of access and transit to the sea and the concept of the exclusive economic zone in the law of the sea the principle of uti possidetis the concept of peoples rights as distinguished from that of human rights the very expansion of the traditional categorization of human rights to embrace the so called third generation rights such as the right to development the Nyerere doctrine of State succession and in general certain principles in the area of international fluvial law concerning the common management and utilization of shared watercourses The discussions in this book are informed by the belief that post colonial African States

have tended to view the creation and application of international law as a historically engaged activity through which they can now empower themselves as part of the modern international community International Law Reports Elihu Lauterpacht, C. J. Greenwood, Andrew Oppenheimer, 2007-10-18 Reports in English on decisions of international courts and arbitrators and judgments of national courts Interpretation of Tax Treaties under International Law F. A. Engelen, 2004 This publication considers the interpretation of tax treaties primarily from the standpoint of public international law The principal purpose of this study is to analyse and discuss the rules and principles of international law relevant to the interpretation of treaties in general and their application to tax treaties in particular The rules of international law enshrined in articles 31 32 and 33 of the Vienna Convention on the Law of Treaties are therefore central to this study Where appropriate reference is made to the jurisprudence of the International Court of Justice and to the law and procedure of other international court and tribunals Considers also the extent to which the relevant rules and principles of international law are binding on domestic court and taxpayers The importance of international law for the purpose of the interpretation of tax treaties is illustrated by a number of leading cases decided by the Dutch Supreme Court Hoge Raad The Use of Force against Ukraine and International Law Sergey Sayapin, Evhen Tsybulenko, 2018-09-08 Written by a team of international lawyers from Europe Asia Africa and the Caribbean this book analyses some of the most significant aspects of the ongoing armed conflict between the Russian Federation and Ukraine As challenging as this conflict is for the international legal order it also offers lessons to be learned by the States concerned and by other States alike The book analyses the application of international law in this conflict and suggests ways for this law's progressive development It will be useful to practitioners of international law working at national Ministries of Defence Justice and Foreign Affairs as well as in Parliaments to lawyers of international organizations and to national and international judges dealing with matters of public international law international humanitarian law and criminal law It will also be of interest to scholars and students of international law and to historians of international relations Sergey Sayapin is Assistant Professor in International and Criminal Law at the School of Law of the KIMEP University in Almaty Kazakhstan Evhen Tsybulenko is Professor of Law at the Department of Law of the Tallinn University of Technology in Tallinn Estonia **The Muslim Conception of International Law and the Western Approach** Mohammad Talaat Ghunaimi, 2012-12-06 The traditional doctrine of Islamic law in regard to international relations is well known The Shari'a includes many excellent provisions about declarations of war treaties of peace armistices diplomatic envoys negotiations and guarantees of safe conduct But the fact remains that it divides the world broadly speaking into the Abode of Islam and the Abode of War and that it envisages the continuance of intermittent war between them until the latter is absorbed in the former In the course of such fighting and in the intervals in between many civilities were to be meticulously observed but prisoners of war could be killed sold or enslaved at the discretion of the Muslim authorities and the women of those who resisted the advance of Islam could be taken as slave concubines regardless of

whether they were single or married The Abode of Islam did not indeed consist exclusively of Muslims for those whose religion was based on a book accepted by Islam as originally inspired and in practice indeed those other religions too were not forced to embrace Islam but only to accept Muslim rule They were granted the status of dhimmis were protected in their persons and their property were allowed to follow their own religion in an unobtrusive fashion and were accorded the position of essentially second class citizens They were also of course perfectly free to embrace Islam but for a Muslim to be converted to another faith involved the death penalty The Position of the Individual in International Law according to Grotius and Vattel Peter Pavel Remec,2012-12-06 According to democratic theory the state is for man not man for the state This theory has been implemented by bills of rights in many national constitutions giving the individual a legal opportunity to redress abuses by his state In Federal Constitutions however difficulties have been faced when central authority seeks to enforce the standards of the constitution against the legislation and customs of the constituent states The latter habitually resist proclaiming the virtues of home rule and local self government also supported by democratic theory Thus the opposition of man versus the state develops into a double opposition of man versus the state and the state versus the super state To what extent should the super state take the part of man demanding respect for human rights or of the state demanding self government when the two conflict The failure to solve this problem precipitated the American Civil War and continues to agitate American politics Should the human right of equal educational opportunities prevail over the State's Right of autonomy in the organization of its schools The same problem appears in more virulent form in the efforts of the United Nations to promote respect for human rights and for fundamental freedoms for all without distinction as to race sex language or religion without intervening in matters which are essentially within the domestic jurisdiction of any state

Universal Jurisdiction: The Sierra Leone Profile Justice Bankole Thompson,2015-03-12 The doctrine of universal jurisdiction has evolved throughout modern times in the context of global criminal justice as a paramount agent of combating impunity emanating from international criminality Sierra Leone as a member of the international community and the United Nations has in recent times been a pioneer in the progressive application and development of international criminal law in the African region Despite this role the country's profile both in terms of the incorporation and application of the doctrine of universal jurisdiction is deficient in several major respects falling far short of its dual international obligation not to provide safe havens from justice for perpetrators of international crimes and to combat impunity from such criminogenic acts Hence a compelling reason for the author to write this book was to provide a seminal scholarly work on the subject articulating the existing state of the law in Sierra Leone and highlighting the deficiencies in the law and factors inhibiting the exercise of universal jurisdiction in this UN member state It was also to propose necessary substantive and procedural law reforms in the state's jurisprudence on the subject The book is recommended reading for practitioners and scholars in international criminal law and related disciplines Its accessibility is highly enhanced by relevant tables and summaries of each chapter

Justice Rosolu J B Thompson is Professor Emeritus of Criminal Justice Studies Eastern Kentucky University USA He was a member of and Presiding Judge in Trial Chamber I of the Special Court for Sierra Leone **International Law in the Twentieth Century** American Society of International Law,1969
