Corporate Social Responsibility and Customer Integration - Heike Löber, 2011-11-09 Inhaltsangabe Introduction There is a difference between a good company and a great company A good company offers excellent products and services A great company also offers excellent products and services but also strives to make the world a better place As this quote clearly demonstrates the importance of corporate social responsibility CSR is on the rise Indeed more and more companies are engaging in CSR related activities such as cause related marketing CRM employee volunteering EV or corporate philanthropy CP According to Bhattacharya and Sen more than 80% percent of Fortune 500 companies deal with CSR issues in the United States US In European countries such as Germany the numbers of companies with CSR initiatives is similarly growing Among those firms are famous examples such as Starbucks and The Body Shop as well as the German companies BMW or SAP There are several reasons for this trend On the one hand companies are increasingly put under pressure to behave socially responsible from different sides First consumers today are more sensitive to business practices of companies and can exert their power by means of boycotts resulting in negative economic consequences for firms This is especially the case in times of increasing media coverage and advances in information technology where bad business practices become more easily transparent Particularly recent corporate scandals like those of Enron or Shell among others make a contribution to consumers skepticism Then globalization leads to new challenges for companies because on the one hand they are operating in countries with lower standards of living resulting in higher needs for socially responsible behavior in the respective society On the other hand worldwide competition is being strengthened in markets which are characterized by low levels of product differentiation CSR offers a source of competitive advantage because it enhances the overall reputation of the company and provides a valuable basis for differentiation Besides that companies are feeling pressure by a rise in public standards for social performance e.g. the United Nations Global Compact On the other hand there is evidence that CSR is not only the right thing to do but it also leads to doing better because there is a positive relationship between a company's CSR activities and its stakeholders especially consumers can be positively influenced For one thing market

Hax, 2009-11-27 Strategy is the most central issue in management It has to do with defining the purpose of an organization understanding the market in which it operates and the capabilities the firm possesses and putting together a winning plan There are many influential frameworks to help managers undertake a systematic reflection on this issue The most dominant approaches are Michael Porter's Competitive Strategy and the Resource Based View of the Firm popularized by Gary Hamel and C K Prahalad Arnaldo Hax argues there are fundamental drawbacks in the underlying hypotheses of these approaches in that they define strategy as a way to achieve sustainable competitive advantage This line of thinking could be extremely dangerous because it puts the competitor at the center and therefore anchors you in the past establishes success as a way of beating your competitors and this obsession often leads toward imitation and congruency The result is commoditization which is the worst outcome that could possibly happen to a business The Delta Model is an extremely innovative view of strategy It abandons all of these assumptions and instead puts the customer at the center By doing that it allows us to be truly creative separating ourselves from the herd in pursuit of a unique and differentiated customer value proposition Many years of intense research at MIT supported by an extensive consulting practice have resulted in development of powerful new concepts and practical tools to guide organizational leaders into a completely different way of looking at strategy including a new way of doing customer segmentation and examining the competencies of the firm with an emphasis on using the extended enterprise as a primary way of serving the customer This last concept means that we cannot play the game alone that we need to establish a network among suppliers the firm the customers and complementors firms that are in the business of developing products and services that enhance our own offering to the customer Illustrated through dozens of examples and discussion of application to small and medium sized businesses and not for profits the Delta Model will help readers in all types of organizations break out of old patterns of behavior and achieve strategic flexibility an especially timely talent during times of crisis intense competition and rapid change Innovation Heroes: Understanding Customers As A Valuable Innovation Resource Fiona Schweitzer, Joe Tidd, 2018-05-08 This book provides the knowledge necessary for succeeding in a world where companies increasingly work side by side with customers to create new products and services It is a pivotal navigation tool that helps cruise the ocean of customer integration methods and explains how the methods work when to choose which and how to seize advantages while avoiding pitfalls This title is an essential read for research and development managers marketing professionals and other practitioners who are involved in new product development to apply customer integration methods effectively and efficiently to drive new product development success While the application of methods is no guarantee of success knowledge of the correct selection and appropriate application increases the probability of new product and service
