Parliament. House of Commons. Home Affairs Committee,2013 The threat of a cyber attack to the UK is so serious it is marked as a higher threat than a nuclear attack One can steal more on the internet than they can by robbing a bank and online criminals in 25 countries have chosen the UK as their number one target Astonishingly some are operating from EU countries If we don t have a 21st century response to this 21st century crime we will be letting those involved in these gangs

off the hook After a 10 month inquiry the Committee concluded that a dedicated state of the art espionage response team should be established so that attacks can be immediately reported Banks must be required to report all e crime fraud to law enforcement it is alarmed that CEOP is having its budget cut by 10% over 4 years its experienced Chief Executive is leaving and it could lose its laser like focus when merged with the National Crime Agency it is still too easy for people to access inappropriate online content and those responsible need to take stronger action to remove such content the Government should draw up a mandatory code of conduct with them to remove material which breaches acceptable standards the DPP should review sentencing guidance and ensure e criminals receive the same sentences as if they had stolen the same amount of money or data offline the Government should look at setting up a similar organisation to the Internet Watch Foundation focused on reporting and removing online terrorist content

The UK Cyber Security Strategy Great Britain: National Audit Office,2013-02-12 The cost of cyber crime to the UK is currently estimated to be between 18 billion and 27 billion Business government and the public must therefore be constantly alert to the level of risk if they are to succeed in detecting and resisting the threat of cyber attack The UK Cyber Security Strategy published in November 2011 set out how the Government planned to deliver the National Cyber Security Programme through to 2015 committing 650 million of additional funding Among progress reported so far the Serious Organised Crime Agency repatriated more than 2 3 million items of compromised card payment details to the financial sector in the UK and internationally since 2011 preventing a potential economic loss of more than 500 million In the past year moreover the public reported to Action Fraud over 46 000 reports of cyber crime amounting to 292 million worth of attempted fraud NAO identifies six key challenges faced by the Government in implanting its cyber security strategy in a rapidly changing environment These are the need to influence industry to protect and promote itself and UK plc to address the UK s current and future ICT and cyber security skills gap to increase awareness so that people are not the weakest link to tackle cyber crime and enforce the law to get government to be more agile and joined up and to demonstrate value for money The NAO recognizes however that there are some particular challenges in establishing the value for money
